This essay collection comes from an economist and so is not, strictly speaking, a philosophy book. But the author is an outstanding economist, and *Strategies of Commitment* is a very philosophical book. All pieces in it are remarkably lucid and truly engaging; each contains an original idea, and some read as series of insights; many offer examples of the kind that works effectively in a variety of settings – a conference talk, a journal article, a university class or even at the dinner table. Topics covered include old as well as relatively recent interests of the author: commitment as it figures in the contexts of threats, promises, bargaining and self-command, the dynamics of social segregation, arms control and climate change. The book will be of interest to philosophers of economics, rational choice theory, game theory, ethics, political theory and environmental philosophy.

Strategies of Commitment contains a total of nineteen essays grouped in eight chapters. Two chapters will serve as focal points of this discussion: the opening chapter which gives title to the collection and section number three under the heading, “Commitment as Self-Command.”

What is “commitment”? The term “commitment” is likely to trigger two groups of associations in the mind of a philosopher. Associations from one group have their origin in a Kantian understanding of commitment traceable back to Plato and recently revived by neo-Kantians. On that understanding, to make a commitment is to bind oneself with reasons, reasons to pursue particular courses of action and avoid others. If one fails a commitment, on this view, one fails as a moral being and possibly, echoing more recent versions of the account, scathes one’s own practical identity. The other chain of associations begins with Hobbes’s idea that commitments should be made and kept for self-interested reasons. Keeping a commitment is in one’s own interest, on Hobbes’s reckoning, just in case a strong

The Evolved Apprentice Kim Sterelny, 2014-08-29 A new theory of the evolution of human cognition and human social life that emphasizes the role of information sharing across generations Over the last three million years or so our lineage has diverged sharply from those of our great ape relatives Change has been rapid in evolutionary terms and pervasive Morphology life history social life sexual behavior and foraging patterns have all shifted sharply away from those of the other great apes In *The Evolved Apprentice* Kim Sterelny argues that the divergence stems from the fact that humans gradually came to enrich the learning environment of the next generation Humans came to cooperate in sharing information and to cooperate ecologically and reproductively as well and these changes initiated positive feedback loops that drove us further from other great apes Sterelny develops a new theory of the evolution of human cognition and human social life that emphasizes the gradual evolution of information sharing practices across generations and how these practices transformed human minds and social lives Sterelny proposes that humans developed a new form of ecological interaction with their environment cooperative foraging The ability to cope with the immense variety of human ancestral environments and social forms he argues depended not just on adapted minds but also on adapted developmental environments

Inside the Situation Room Hillary Rodham Clinton, Keren Yarhi-Milo, 2015-09-15 Combining decades of diplomacy and world renowned scholarship *Inside the Situation Room* bridges the gap between politics and academia to illuminate how world leaders make decisions in times of crisis For decades people have sought to understand how and why decisions are made in times of crisis but very few get the opportunity to witness leaders decision making process The result has been a persistent disconnect between the theory and the practice of decision making Now a former US Secretary of State has joined forces with a world renowned scholar to bridge that gap first in their ground breaking class at Columbia University's School of International and Public Affairs and now in the pages of this book In *Inside the Situation Room* Secretary Hillary Rodham Clinton and Dr Keren Yarhi Milo bring together insights from more than a dozen leading policymakers and scholars so readers can experience a masterclass in global policy and crisis decision making The book includes everything from the psychology and mechanics of threat assessment the role of advisors the effects of group think and trust real life stories of diplomatic efforts and covert operations how women have shaped decisions over peace and security and the impact of public opinion *Inside the Situation Room* offers an insider look at how decisions are actually made what theoretical insights might be useful to current and future generations of leaders and where research still needs to be done This book will serve as the first step toward a new standard engagement more active iterative collaboration among two communities scholars and practitioners who have a great deal to contribute and learn from one another

War, Peace, and Security Jacques Fontanel, Manas Chatterji, 2008-10-13 In the name of international and domestic security billions of dollars

are wasted on unproductive military spending in both developed and developing countries when millions are starving and living without basic human needs This book contains articles relating to military spending military industrial establishments and peace keeping *The Art of Coercion* Reid B. C. Pauly, 2025-08-15 The Art of Coercion presents a fresh explanation for the success and failure of coercive demands in international politics Strong states are surprisingly bad at coercion History shows they prevail only a third of the time Reid B C Pauly argues that coercion often fails because targets fear punishment even if they comply In this damned if you do damned if you don't scenario targets have little reason to obey Pauly illustrates this logic in nuclear counterproliferation efforts with South Africa Iraq Libya and Iran He shows that coercers face an assurance dilemma When threats are more credible assurances not to punish are less so But without credible assurances targets may defy threats bracing for seemingly inevitable punishment For coercion to work as such coercers must not only make targets believe that they will be punished if they do not comply but also that they will not be if they do Packed with insights for any foreign policy challenge involving coercive strategies The Art of Coercion crucially corrects assumptions that tougher threats alone achieve results [India, Climate Change, and The Global Commons](#) A. Damodaran, 2023-05-11 This book explores the genesis of the concept of global commons against the backdrop of the global environmental problems of climate change biodiversity conservation desertification and the transboundary movement of hazardous wastes It highlights blockchains and cryptocurrencies and their role in transforming global institutions It delves on the advent of COVID 19 as a global common and the way the pandemic has been handled by the world community The book also explores the way the current geopolitics of the world is contributing to the resolution of the conservation problem associated with global commons

Elusive Balances Prashanth Parameswaran, 2022-01-13 This book undertakes an in depth examination of the dynamics of commitment in U S Southeast Asia strategy Drawing on cases including the U S withdrawal from Vietnam and Washington's pivot to Asia amid China's growing regional role it constructs an original balance of commitment model to explain continuity and change in U S Southeast Asia policy Balance of commitment goes beyond balance of power approaches to explain how translating Southeast Asia's importance in U S thinking into actual commitments has proven challenging for policymakers as it requires simultaneously calibrating adjustments to power shifts threat perceptions and resource extraction The book applies the balance of commitment approach to several practical case studies based on hundreds of conversations with policymakers and experts in the United States and Southeast Asia personal experiences across nearly two decades and primary and secondary source material across a half century The findings suggest that the challenges of U S commitment to the region are rooted not simply in differences between administrations or divergences in outlook between Washington and regional capitals but tough balancing acts for U S policymakers in domestic politics and wider foreign policy As such shaping U S strategy in Southeast Asia and calibrating and sustaining commitment requires not just appreciating Southeast Asia's significance but committing to the region in ways that manage structural aspects of U S thinking capabilities and resourcing

In the Shadow of International Law Michael Poznansky, 2020 In this book Michael Poznansky asks why countries sometimes pursue activities such as regime change in the shadows rather than out in the open for the world to see He finds that international law plays a key role in this decision making process because senior government officials especially in the United States are sensitive to brazenly violating rules surrounding when countries should and shouldn't intervene in the internal affairs of others He argues that while the existence of such restrictions don't always prevent great powers from undertaking regime change when it suits their interests they do have meaningful impacts
