This book contributes to that debate in its study of the impact of financial regulation on Spanish banking performance, especially profitability, from the end of the Spanish Civil War to the end of the Franco regime. Maria Pons discusses the Francoist authorities' policy of forced industrialization based on heavy industry and the huge interventionist apparatus that it set up to involve banks in its industrialistic programme. This included several items of banking legislation related to the fixing of interest rates, the expansion of the sector, mergers and so forth. Pons explains the emergence of this regulatory framework and its development to the mid 1970s, as well as examining in detail the response of the Spanish banks to these regulations and their attempts to take advantage of the opportunities they offered to reduce competition and uncertainty. The book also analyzes the 1962 reforms and subsequent legislation and the lack of success they had in reducing public intervention in the banking sector.
