## **Strategies Of Social Research:**

*Beyond Method* Gareth Morgan, 1983-05 Research is often seen as a neutral technical process through which researchers simply reveal or discover knowledge. A broader and more self-reflective stance is advocated in *Beyond Method* one in which a knowledge of technique needs to be complemented by an appreciation of the nature of research as a distinctively human process through which researchers make knowledge. Such an appreciation requires a reframing of understanding and debate about research in a way that goes beyond considerations of method alone. Strategies of Social Research Herman W. Smith, 1975 During a visit with her great aunt a young girl learns the story behind her name and learns to feel proud of her biracial heritage. Critical Strategies for Social Research William K. Carroll, 2004 Edited by Canadian sociologist William K. Carroll this thought provoking volume is designed for research methods courses in sociology and social sciences. *Critical Strategies for Social Research* explores ways in which several key research strategies bring an emancipatory dimension to social analysis. The new approaches recognize that social analysis is a form of knowledge production that takes place in a human constructed world marked by injustice and persistent inequality. Carroll considers five influential and productive strategies of inquiry: Dialectical Social Analysis, Institutional Ethnography, Participatory Action Research, Critical Discourse Analysis, Social Inquiry as Communicative Reason. **Strategies of Social Research** Herman W.
