Rise and Fall of Strategic Planning Henry Mintzberg, 1994-01-31 In this definitive and revealing history Henry Mintzberg the iconoclastic former president of the Strategic Management Society unmasks the press that has mesmerized so many organizations since 1965 strategic planning One of our most brilliant and original management thinkers Mintzberg concludes that the term is an oxymoron that strategy cannot be planned because planning is about analysis and strategy is about synthesis That is why he asserts the process has failed so often and so dramatically Mintzberg traces the origins and history of strategic planning through its prominence and subsequent fall He argues that we must reconceive the process by which strategies are created by emphasizing informal learning and personal vision and the roles that can be played by planners Mintzberg proposes new and unusual definitions of planning and strategy and examines in novel and insightful ways the various models of strategic planning and the evidence of why they failed Reviewing the so called pitfalls of planning he shows how the process itself can destroy commitment narrow a company's vision discourage change and breed an atmosphere of politics In a harsh critique of many sacred cows he describes three basic fallacies of the process that discontinuities can be predicted that strategists can be detached from the operations of the organization and that the process of strategy making itself can be formalized Mintzberg devotes a substantial section to the new role for planning plans and planners not inside the strategy making process but in support of it providing some of its inputs and sometimes programming its outputs as well as encouraging strategic thinking in general This book is required reading for anyone in an organization who is influenced by the planning or the strategy making processes

**Assessing the Balance of Power in Central-Local Relations in China** John Donaldson, 2016-07-01 How do we understand the evolution of central local relations in China during the reform period This book addresses this question by focusing on eight separate issues in which the central local relationship has been especially salient government finance investment control regional development administrative zoning implementation culture social welfare and international relations Each chapter introduces a sector and the way the center and various local governments have shared or divided power over the different periods of China's reform era The balance of power is gauged dynamically over time to measure the extent to which one level of government dominates influences or shares power in making decisions in each of these particular domains as well as what is likely to occur in the foreseeable future The authors assess the winners and losers of these changes among key actors in China's society The result provides a dynamic view of China's changing power relations
