Nuclear Confrontation in Europe Jeffrey H. Boutwell, Paul Doty, Gregory F. Treverton, 2020-11-19 Originally published in 1985 this book explores the nuclear confrontation between East and West in Europe where we stand how we got there and what the future may hold Its concluding chapter outlines the prospects for nuclear arms control in Europe and it frames the debate over NATO strategy and the role of nuclear weapons in the years ahead Can NATO reduce its reliance on nuclear weapons Can it cope with the issues at all The chapters on NATO theatre nuclear forces and doctrine provide a rich

background to current policy issues The public debate over NATO's 1979 decision to deploy new American cruise and Pershing nuclear missiles in Europe was hardly unprecedented in NATO's history similar controversy surrounded NATO deliberations in the late 1950s and early 1960s That debate however subsided in the mid 1960s the nuclear question in Europe was relegated to the wilderness though efforts largely unavailing continued within official circles to define more clearly the role of nuclear weapons in NATO's defense Against this backdrop the nuclear debate emerged again in the 1970s This title unravels the military and political considerations at play in that debate and maps the European politics surrounding it Today it can be read in its historical context Strategic Review, 1983 dedicated to the advancement and understanding of those principles and practices military and political which serve the vital security interests of the United States

European Security Bjørn Møller, 2016-04-22 Europe has undergone quite profound changes since the end of the Cold War Having been a highly militarised conflict ridden and war ridden region the core of Europe today constitutes a security community where armed conflicts among the constituent states has become inconceivable This comprehensive book offers a theoretically founded and thoroughly documented analysis of European security with a special emphasis on the role played by the United Nations and the various regional and sub regional organisations especially the North Atlantic Treaty Organisation the Organisation for Security and Cooperation in Europe the Council of Europe and the European Union When it comes to explaining peace in Europe opinions differ widely Some argue that it was only because the West refused to give in to Soviet threats that the latter eventually gave up or that the long peace in Europe was due to the combination of a bipolar alliance structure pitting the North Atlantic Treaty Organisation NATO against the Warsaw Pact with the presence of nuclear weapons on both sides Others point instead to the extraordinarily dense network of international institutions and organisations in Europe offering a wide panoply of fora in which to handle disputes peacefully or to the web of interdependence in economic and other affairs tying together all states in Europe in relations which militate strongly against war Still others believe that the external peace between the states in Europe is simply a reflection of a convergence of cultures democracies with marked economies that are open towards the world market These questions are the focal point of this book which concentrates on security albeit not in the sense of being a treatise on military matters but security obtainable by much more indirect and non military means It will be required reading for all students and scholars of European security and the organisations which underpin it Parameters, 1986 Defending Europe Derek Paul, 2021-01-26 This book first published in 1985 examines the questions of European security that lie at the heart of the confrontation between the superpowers It concentrates on ways of achieving defence by conventional means rather than a reliance on nuclear or chemical weapons and at the same time focuses on possible force reductions *Alternative Defence Policy* Gordon Burt, 2021-05-30 This book first published in 1988 represents a unique attempt to combine a discussion of an alternative British defence policy in terms of military strategy and new technology with a consideration of how this policy might be

secure in political terms Written against a background of a possible future Labour government in the late 1980s with a radically different defence policy to the Conservative Government of the day it considers questions such as Would conventional deterrence really be effective Just what is the Labour Party s defence policy How precisely might Britain be transformed into a non aligned non militarist state
