Advances in Traffic Psychology Mark Sullman,2019-07-23 Traffic psychology is a rapidly expanding and broad field within applied psychology with a considerable volume of research activities and a growing network of academic strands of enquiry The discipline primarily focuses on the behaviour of road users and the psychological processes underlying these behaviours looking at issues such as cognition distraction fatigue personality and social aspects often delivering practical applications and educational interventions Traffic psychology has been the focus of research for almost as long as the motor car has been in existence and was first recognised as a discipline in 1990 when the International Association of Applied Psychology formed Division 13 Traffic and Transportation Psychology The benefits of understanding traffic psychology are being increasingly recognised by a whole host of organisations keen to improve road safety or minimise health and safety risks when travelling in vehicles The objective of this volume is to describe and discuss recent advances in the study of traffic psychology with a major focus on how the field contributes to the understanding of at risk road user behaviour The intended readerships include road safety researchers from a variety of different academic backgrounds senior practitioners in the field including regulatory authorities the private and public sector personnel and vehicle manufacturers concerned with improving road safety

Human Performance on the Flight Deck Don Harris,2016-12-05 Taking an integrated systems approach to dealing exclusively with the human performance issues encountered on the flight deck of the modern airliner this book describes the inter relationships between the various application areas of human factors recognising that the human contribution to the operation of an airliner does not fall into neat pigeonholes The relationship between areas such as pilot selection training flight deck design and safety management is continually emphasised within the book It also affirms the upside of human factors in aviation the positive contribution that it can make to the industry and avoids placing undue emphasis on when the human component fails The book is divided into four main parts Part one describes the underpinning science base with chapters on human information processing workload situation awareness decision making error and individual differences Part two of the book looks at the human in the system

containing chapters on pilot selection simulation and training stress fatigue and alcohol and environmental stressors Part three takes a closer look at the machine the aircraft beginning with an examination of flight deck display design followed by chapters on aircraft control flight deck automation and HCI on the flight deck Part four completes the volume with a consideration of safety management issues both on the flight deck and across the airline the final chapter in this section looks at human factors for incident and accident investigation The book is written for professionals within the aviation industry both on the flight deck and elsewhere for post graduate students and for researchers working in the area The Wiley Blackwell Handbook of the Psychology of Occupational Safety and Workplace Health Sharon Clarke,Tahira M.
