Stress Inoculation Training:

Stress Inoculation Training Donald Meichenbaum, 1985 **Stress Inoculation Training** Jack A. Digliani, 1994 Fifty one Colorado patrol and detention officers from the Fort Collins Police Services Loveland Police Department and Larimer County Sheriff's Department participated in a stress inoculation training program Officers were stratified by agency and primary function then randomly assigned to either the treatment or delayed control group Treatment group officers participated in a five session two hour per session stress inoculation training program conducted over approximately seven weeks Measures of trait anxiety trait anger current stressors overall stress level and self efficacy were obtained for both groups prior to following and approximately four weeks after stress inoculation training Analyses of covariance demonstrated significant interaction effects on the second current stressor measure Overall stress level indicated change in the predicted direction however the degree of change lacked statistical significance There were no significant differences between the treatment and control groups on trait anxiety trait anger and self efficacy Treatment group feedback revealed that officers found the training program beneficial The results generally supported stress inoculation training as an effective stress management approach for law enforcement officers *Stress Inoculation Training* Donald Meichenbaum, 1990 Stress Inoculation Training Meichenbaum, 1985-01-01 **Stress Inoculation Training** Meichenbaum, 1985-01-01 *Efficacy of Stress Inoculation Training in improving the overall well-being of school students* Dr. Bani LekhaPhukan Dr. K. Mason, 1988 **Anxiety Management Training** Richard M. Suinn, 2013-11-11 This book

owes its existence to an ideal a burning frustration and a trusted believer The ideal was the sense that governed my feelings about systematic desensitization during my early introduction to its benefits It is hard to put into words the initial doubts that pervaded me during my first attempt with desensitization with a seriously phobic client as I religiously worked my way through the procedure Will this client really become relaxed And then what will the visualization actually occur And then what will the fear really vanish just like that And oh the feeling of discovery and validation when indeed the process worked and worked well Desensitization was everything it was claimed to be systematic clean theoretically grounded empirically tested applicable as a behavioral technology regardless of one's own theoretical bias And there were testable outcomes concrete evidence for change So I became invested and aimed at doing more with desensitization My students and I raised some theoretical questions in order to open the doors for revising the desensitization to improve on its applications We tested the rapidity with which desensitization could be accomplished shortening the time by shortening the anxiety hierarchy Along with others we studied the question of group delivery and reducing the total number of sessions as well as examining the use of audiotaped delivery of services
