**Chronic Diseases** Marvin Stein, Andrew Baum, 1995 First Published in 1995 Routledge is an imprint of Taylor & Francis an informa company Handbook of Human Stress and Immunity Ronald Glaser, Janice K. Kiecolt-Glaser, 2014-06-28 In 1964 George Solomon coined the term psychoneuroimmunology In the intervening 30 years this term has emerged into a dynamic field of study which investigates the unique interactions between the nervous endocrine and immune systems The Handbook of Human Stress and Immunity is a comprehensive reference for this dynamic new field Focusing on how stressors impact the central nervous system and the resulting changes in immune responses the Handbook is the first to describe how stress specifically affects human immune systems It discusses how stress generally makes people more susceptible to infection how personal support systems can counteract the physiological effects of stress and how stress or lack of stress affects the aging process Chapters are authored by the leading names in the field and cover such diseases as autoimmune disease viral pathogenesis herpes HIV and AIDS **Handbook of Research Methods in Cardiovascular Behavioral Medicine** Neil

pathogenesis herpes HIV and AIDS      **Handbook of Research Methods in Cardiovascular Behavioral Medicine** Neil Schneiderman, Stephen M. Weiss, Peter G. Kaufmann, 2013-11-21 Cardiovascular disease continues to be the number one cause of death in the United States. Behavioral medicine was developed and shaped into the one source of morbidity and mortality in our country following the definition of the field by the American Psychosomatic Society. Despite a 35% reduction in mortality since 1964, cardiovascular disease remains the leading cause of death. Behavioral medicine is the interdisciplinary field concerned with the development and integration of behavioral and biomedical science knowledge and techniques to the prevention, diagnosis, treatment, and rehabilitation of cardiovascular disease. The United States alone claims nearly 1,000,000 lives each year in cardiovascular disease. The Framingham study among others has identified the application of this knowledge and these techniques to prevention, diagnosis, treatment, and rehabilitation. Three major risk factors implicated in the development of CHD are smoking, elevated serum cholesterol, and high blood pressure. This concept of biobehavioral collaboration is relevant to the understanding of health and illness. Given that these factors account for less than 50% of the variance associated with CHD, it is clear that other factors must be identified if further progress is to be made. This book provides a comprehensive overview of the field of cardiovascular behavioral medicine and discusses the challenges and opportunities for future research and clinical practice.
