

STRETCHING EXERCISES

WHY WARM UP?

Warming up allows the body to adjust from a state of rest to activity in a controlled manner. Raising the body's temperature, metabolic, respiratory and heart rates improves physical efficiency and performance. Warming up stretching muscles and mobilizing joints prior to dynamic activity minimises the risk of incurring a strain injury.

WHEN STRETCHING

Stretching exercises are recommended before and after participating in sport or strenuous manual work as they prepare the body for the forthcoming physical activity by enabling joints to move through their full range of motion optimising flexibility. Pre-stretching reduces the risk of potential strain injury, post-stretching aids recovery.

Neck Stretch

Rotate head in both directions then forward, backward and side to side.
Option: Use pressure from hand on head to increase intensity.

Overhead Arm Stretch

Hands clasped push upwards with straight arms.
Option: Lean forward and backwards whilst arms outstretched.

HOW TO WARM UP

For 5-10 minutes engage in progressively intense light cardio exercise closely related to your sporting activity e.g. football kick about, rugby ball passing, swing arm weights, aerobic boxing etc. varied with general exercises such as jogging, shuttle runs, high knee sprints. When feeling adequately energised perform stretching exercises prior to commencing your sport/activity.

POSTURE

Adopt a relaxed, balanced stance standing tall with spine aligned, head up, shoulders back, abdomen flat. During stretches concentrate on controlled, slow, deep breathing. Flexibility is increased when the mind and muscles are relaxed. Everyone's mobility and flexibility is different being dependent on personal physical characteristics, fitness levels and age. Stretch within your limitations DO NOT try to compete.

Shoulder Circles

Pull elbows close in both directions.
Option: Gradually decrease circles and arms are fully outstretched in gradually increased back or full circles.

Push straight arms towards each other stopped.
Option: Lean forward whilst pushing hands upwards to increase intensity.

Abdomen Stretch

With hands under shoulders lift upper body with arms raising chest and head whilst keeping hips on floor.

PERSONAL ROUTINE

Assume the mindset that your Warm Up/Stretch/Cool Down routine is an integral part of your sport/activity session. Develop an achievable routine that you enjoy. DO keep it fresh by including variations. DO NOT view physical preparation as a "chore" to be hummed. DO NOT allow your routine to evolve into an excessively long activity.

EXERCISE TECHNIQUE

Be methodical starting from the head down. Perform exercises in a considered, controlled manner. Dynamic Stretches involve rotational motions. Static Stretches involve progressively extending to the point of maximum discomfort. Perform each stretch 3-5 times holding static stretches for between 5-30 seconds. DO NOT "recoil" or "bounce" relying on momentum. DO NOT grope or "push through" pain. DO NOT exercise if ill or injured.

WHY COOL DOWN?

Cooling Down provides the body with a period of adjustment from activity to rest where the body's temperature, metabolic, respiratory and heart rates can be lowered in a controlled manner. It also presents an opportunity to reflect on your performance, calm down and relax.

HOW TO COOL DOWN

For 5-10 minutes after dynamic activity leisurely repeat the warm-up routine varied with stretching exercises. This can aid recovery by dispersing lactic acid and other waste products created by muscle activity, minimise "blood pooling" in lower limbs and reduce Delayed Onset Muscle Soreness (DOMS).
