Territories Anselm Franke, 2003 Edited by Anselm Franke Essays by Ariella Azoulay Matthew Buckingham David Campbell Zvi Efrat Rudolf Maresch Sean Snyder and Rafi Segal Outlaw Territories Felicity D. Scott, 2016-05-20 Outlaw Territories Environments of Insecurity Architectures of Counterinsurgency traces the relations of architecture and urbanism to forms of human unsettlement and territorial insecurity during the 1960s and 70s Investigating a set of responses to the growing urban unrest in the developed and developing worlds Outlaw Territories revisits an era when the discipline of architecture staked out a role in global environmental governance and the biopolitical management of populations Felicity D Scott demonstrates how architecture engaged the displacement of persons brought on by migration urbanization environmental catastrophe and warfare and at the same time how it responded to the material environmental psychological and geopolitical transformations brought on by postindustrial technologies and neoliberal capitalism after World War II At the height of the US led war in Vietnam and Cambodia and ongoing decolonization struggles in many parts of the world architecture not only emerged as a target of political agitation on account of its inherent normativity but also became heavily imbricated within military legal and humanitarian apparatuses and scientific and technological research dedicated to questions of international management and security Once architecture became aligned with a global matrix of forces concerned with the environment economic development migration genocide and war its conventional role did not remain unchallenged but shifted at times toward providing strategic expertise for institutions responding to transformations born of neoliberal capitalism Outlaw Territories interrogates this nexus and questions how and to what ends architecture and the environment came to be intimately connected to the expanded exercise of power within shifting geopolitical frameworks of this time **Territories, Environments, Politics** Andrea Mubi Brighenti, Mattias Kärrholm, 2022-04-19 This collection seeks to illustrate the state of the art in territoriological research both empirical and theoretical The volume gathers together a series of original previously unpublished essays exploring the newly emerging territorial formations in culture politics and society While the globalisation debate of the 1990s largely pivoted around a general deterritorialisation hypothesis since the 2000s it has become apparent that rather than effacing territories global connections are added to them and represent a further factor in the increase of territorial complexity Key questions follow such as How can we further the knowledge around territorial complexities and the ways in which different processes of territorialisation co exist and interact integrating scientific advances from a plurality of disciplines Where and what forms does territorial complexity assume and how do complex territories operate in specific instances Which technological political and cultural facets of territories should be tackled to make sense of the life of territories How and by what different or combined methods can we describe territories and do justice to their articulations and meanings How can the territoriological vocabulary relate to contemporary social theory advancements such as ANT the ontological turn the mobilities paradigm sensory urbanism and atmospheres research

How can territorial phenomena be studied across disciplinary boundaries Territories Environments Politics casts a fresh perspective onto a number of key contemporary socio spatial phenomena Refraining from the attempt to ossify territorialology into some disciplinary straightjacket the collection aims to illustrate the scope of current territorialological research its domain its promises its theoretical advancements and its methodological reflection in the making Scholars interested in social research will find in this collection a rich and imaginative theoretical methodological toolkit Students in human geography anthropology and sociology socio legal studies architecture and urban planning will find Territories Environments Politics of interest

Empathic Space Christian Derix, Åsmund Izaki, 2014-10-27 In recent years questions of space have gained renewed momentum in architecture and urban design as adaptation densification and sustainable regeneration have become an increasing priority While most computing based design tends to emphasise the formal aspects of architecture overlooking space and its users the original computational design approaches first spearheaded in the UK in the 1960s and 1970s tended to be focused on behavioural and occupational patterns Over the last decade a new generation of design research has emerged that has started to implement and validate previous investigations into spatial computation aiming to understand how to design spatial configurations based on user experiences This revives an interest in the experiential that was first explored in the early 20th century by German and Nordic organic architects who invented design methods that correlated cognitive responses of buildings occupants to spatial structure The current revival of human centric design however represents the first design approach that synthesises spatial design and

algorithmic techniques with organic design thinking which could also be regarded as a return to the first principles of architectural design Contributors include Paul Coates Christian Derix Olafur Eliasson Lucy Helme Bill Hillier smund Izaki Prarthana Jagannath Dan Montello Juhani Pallasmaa Philip Steadman and Guy Theraulaz Featured Architects Designers Jussi ngeslev Art Com Stan Allen Aedas R D Markus Braach Kaisersrot Hermann Hertzberger Kazuhiro Kojima Cat Pablo Miranda and Rafi Segal

Security, Law and Borders Tugba Basaran, 2010-09-21 This book focuses on security practices civil liberties and the politics of borders in liberal democracies In the aftermath of 9 11 security practices and the denial of human rights and civil liberties are often portrayed as an exception to liberal rule and seen as institutionally legally and spatially distinct from the liberal state Drawing upon detailed empirical studies from migration controls such as the French waiting zone Australian off shore processing and US maritime interceptions this study demonstrates that the limitation of liberties is not an anomaly of liberal rule but embedded within the legal order of liberal democracies The most ordinary yet powerful way of limiting liberties is the creation of legal identities legal borders and legal spaces It is the possibility of limiting liberties through liberal and democratic procedures that poses the key challenge to the protection of liberties The book develops three inter related arguments First it questions the discourse of exception that portrays liberal and illiberal rule as distinct ways of governing and scrutinizes liberal techniques for limiting liberties Second it highlights the space of government and argues for a change in perspective from territorial to legal borders especially legal borders of policing and legal borders of rights Third it emphasizes the role of ordinary law for illiberal practices and argues that the legal order itself privileges policing powers and prevents access to liberties This book will be of interest to students of critical security studies social and political

theory political geography and legal studies and IR in general *Architecture of Resistance* Yara Sharif,2017-05-08

Architecture of Resistance investigates the relationship between architecture politics and power and how these factors interplay in light of the Palestinian Israeli conflict It takes Palestine as the key ground of spatial exploration looking at the spaces between people boundary lines documents and maps in a search for the meaning of architecture of resistance Stemming from the need for an alternative discourse that can nourish the Palestinian spaces of imagination the author reinterprets the land from a new perspective by stripping it of the dominant power of lines to expose the hidden dynamic topography born out of everyday Palestine It applies a hybrid approach of research through design and visual documentary through text illustrations mapping techniques and collages to capture the absent local narrative as an essential component of spatial investigation

Weaponized Architecture Léopold Lambert,2012 Research informs the development of a project which rather than defusing these characteristics attempts to integrate them within the scene of a political struggle The proposed project dramatizes through its architecture a Palestinian disobedience to the colonial legislation imposed on its legal territory In fact the State of Israel masters the elaboration of territorial and architectural colonial apparatuses that act directly on Palestinian daily lives In this regard it is crucial to observe that 63% of the West Bank is under total control of the Israeli Defense Forces in regards to security movement planning and construction Weaponized Architecture is thus manifested as a Palestinian shelter with an associated agricultural platform which expresses its illegality through its architectural vocabulary
