Terror And Consensus:

Terror and Consensus Jean-Joseph Goux, Philip R. Wood, 1998 This volume of twelve essays focuses on two interrelated issues First it addresses the historical and cultural determinants that have given rise to what frequently has been described as the French exception the unusually conflictual French political process inherited from the revolutionary past in the eighteenth and nineteenth centuries and its accompanying avant gardism in artistic literary and philosophical practice both of which distinguish France from other European countries Second the contributors assess the exhaustion of this tradition in recent years noted prominently on the occasion of the celebration of the bicentennial of the Revolution in 1989 in a progressive normalization of French society that has been the final outcome of the liquidation of the colonial empire the collapse of Marxism as a social force and the integration of France into the European Union The contributors are Jean Marie Apostolidis Marc Augé Barbara Cassin Françoise Gaillard Maurice Godelier Jean-Joseph Goux Françoise Lionnet Jean-François Lyotard Mark Poster Pierre Saint Amand Susan Suleiman and Philip R Wood *The Sublime, Terror and Human Difference* Christine Battersby, 2013-01-11 Christine Battersby is a leading thinker in the field of philosophy gender studies and visual and literary aesthetics In this important new work she undertakes an exploration of the nature of the sublime one of the most important topics in contemporary debates about modernity politics and art Through a compelling examination of terror transcendence and the other in key European philosophers and writers Battersby articulates a radical female sublime A central feature of *The Sublime Terror and Human Difference* is its engagement with recent debates around 9 11 race and Islam Battersby shows how since the eighteenth century the pleasures of the sublime have been described in terms of the transcendence of terror Linked to the feminine the sublime was closed off to flesh and blood women to Orientals and to other supposedly inferior human types Engaging with Kant Burke the German Romantics Nietzsche Derrida Lyotard Irigaray and Arendt as well as with women writers and artists Battersby traces the history of these exclusions while finding resources within the history of western culture for thinking human differences afresh *The Sublime Terror and Human Difference* is essential reading for students of continental philosophy gender studies aesthetics literary theory visual culture and race and social theory *The Routledge Handbook of Terrorism Research* Alex Schmid, 2011-02-25 This major new Handbook synthesises more than two decades of scholarly research and provides a comprehensive overview of the field of terrorism studies The content of the Handbook is based on the responses to a questionnaire by nearly 100 experts from more than 20 countries as well as the specific expertise and experience of the volume editor and the various contributors Together they guide the reader through the voluminous literature on terrorism and propose a new consensus definition of terrorism based on an extensive review of existing conceptualisations The work also features a large collection of typologies and surveys a wide range of theories of terrorism Additional chapters survey terrorist databases and provide a guide to available resources on terrorism in libraries and on the Internet It also includes the most comprehensive World Directory of Extremist Terrorist

and other Organizations associated with Guerrilla Warfare Political Violence Protest and Organized and Cyber Crime The Routledge Handbook of Terrorism Research will be an essential work of reference for students and researchers of terrorism and political violence security studies criminology political science and international relations and of great interest to policymakers and professionals in the field of counter terrorism *Tripping Points on the Roads to Outwit Terror* Yair Sharan, Ted J. Gordon, Elizabeth Florescu, 2021-04-26 This book assesses potential developments of terrorism and ways to prevent it the growing threats as new technologies become available and how the same new technologies may help trap those with potential mal intent The drumbeat of terror resonates from everywhere how can we stop it What are the tripping points along the road and how can we avoid them Increasingly more people have access to increasingly more information and increasingly more destructive technologies In the meantime increasingly advanced technologies help us create an increasingly safer and more harmonious world Advantages and disadvantages are accelerating each other While hybrid threats are intensifying so are the opportunities to address them But what are the compromises and how can we mitigate them This book also looks at the unexpected and often random success and failure of policies to counter the evolving terror threat The various aspects of the terrorism phenomena are presented in a unique way using scenario vignettes which give the reader a realistic perception of the threat The combination of positive and negative implications of emerging technologies is describing what might well be one of the most important dimensions of our common future The Routledge Handbook of Terrorism Research Alex Peter Schmid, 2011 This volume is a monumental collection of definitions conceptual frameworks paradigmatic formulations and bibliographic sources which is now being revised and updated as a resource for the expanding community of researchers on the subject of terrorism *Rethinking Terrorism* Colin Wight, 2017-09-16 A major new text on terrorism in the contemporary world Terrorism Colin Wight argues is not only a form of political violence but also a form of political communication and can only be understood and countered effectively in the context of its relationship to the state Representing Scientific Knowledge Chaomei Chen, Min Song, 2017-11-25 This book is written for anyone who is interested in how a field of research evolves and the fundamental role of understanding uncertainties involved in different levels of analysis ranging from macroscopic views to meso and microscopic ones We introduce a series of computational and visual analytic techniques from research areas such as text mining deep learning information visualization and science mapping such that readers can apply these tools to the study of a subject matter of their choice In addition we set the diverse set of methods in an integrative context that draws upon insights from philosophical sociological and evolutionary theories of what drives the advances of science such that the readers of the book can guide their own research with their enriched theoretical foundations Scientific knowledge is complex A subject matter is typically built on its own set of concepts theories methodologies and findings discovered by generations of researchers and practitioners Scientific knowledge as known to the scientific community as a whole experiences constant changes Some changes are long lasting whereas others may be short

lived How can we keep abreast of the state of the art as science advances How can we effectively and precisely convey the status of the current science to the general public as well as scientists across different disciplines The study of scientific knowledge in general has been overwhelmingly focused on scientific knowledge per se In contrast the status of scientific knowledge at various levels of granularity has been largely overlooked This book aims to highlight the role of uncertainties in developing a better understanding of the status of scientific knowledge at a particular time and how its status evolves over the course of the development of research Furthermore we demonstrate how the knowledge of the types of uncertainties associated with scientific claims serves as an integral and critical part of our domain expertise **Sartre and the Moral**

Limits of War and Terrorism Jennifer Ang Mei Sze, 2010-01-31 Based on the latest debate on Jean Paul Sartre's works on ethics and politics this book examines the relevancy and importance Sartre holds for contemporary concerns the reactionary nature of terrorism the extremity of counter violence and limitations of democratization efforts in our post 9 11 era all claiming the name of freedom and liberation It presents a different version of the violent Sartre which was presented recently as militant and supportive of terrorism by critics who were concerned with the terrorist nature of his writings Sartre in this project is reconstructed as a philosopher who although gave importance to the notion of violence in his politics was actually more concerned with containing violent means within morally excusable limits He is presented as both a realist who understood the inevitability of dirty hands in political struggles and also an absolutist against terrorism he considered wars that derailed from their purported ends of freedom as morally condemnable Arguing for the need for moral limitations to all violent struggles and the need for seeing others as ends for themselves this project outlines an existential response needed to help us reaffirm our moral compass through the invention of existential humanist ethics *The Politics of Terror* Erica

Chenoweth, Pauline L. Moore, 2018 Bringing together both classic and contemporary research *The Politics of Terror* provides a systematic introduction to the theory politics and practice of terrorism The text is framed around a set of empirical theoretical and methodological puzzles that arise in the study of terrorism challenging students to think critically about key issues in the field [Introduction to Homeland Security](#) David A. Peremptory Norms of General International Law (Jus Cogens) and the Prohibition of Terrorism Aniel Caro de Beer, 2019-02-19 Winner of the 2020 ASIL Lieber prize In Peremptory Norms of
 International Law and Terrorism Jus Cogens and the Prohibition of Terrorism Aniel de Beer analyses the role of these norms
 jus cogens norms in the fight against terrorism Jus cogens norms protect fundamental values of the international community
 are hierarchically superior and non derogable The author argues based on an analysis of the sources of international law that
 the prohibition of terrorism has become the jus cogens norm of our time She further considers the impact of the status of the
 prohibition of terrorism as a jus cogens norm on other norms of international law relevant in the fight against terrorism
 namely the prohibition of torture the right to a fair trial and the prohibition of the inter state use of force

International Law Reports E. Lauterpacht, 1988 The only publication wholly devoted to the regular and systematic reporting in English of
 decisions of international courts and arbitrators

Preventing the Maritime Facilitation of Terrorism Robin Bowley, 2022-12-30 In the aftermath of the 9 11 attacks concerns that terrorists might utilise vessels to transport weaponry
 terrorist operatives and or to finance their activities prompted several international legal developments This book evaluates
 the extent to which the international maritime security measures developed following the 9 11 attacks would be likely to
 prevent the utilisation of vessels to facilitate terrorist activities It considers the likely effectiveness of the International Ship
 and Port Facility Security Code for improving vessel and port security and the 2005 Protocol to the Convention for the
 Suppression of Unlawful Acts Against Maritime Navigation in facilitating the interdiction of suspected terrorist vessels It also
 explains how the US led Proliferation Security Initiative a cooperative effort through which participant governments agree to
 prevent the illicit transfers of Weapons of Mass Destruction and related materials has provoked debate about the legality of
 vessel interdictions under the United Nations Convention on the Law of the Sea the LOSC After exploring alternative
 interpretations of the LOSC and states self defence rights under Article 51 of the Charter of the United Nations it formulates
 suggested guidelines for the unilateral interdiction of suspected terrorist support vessels in exceptional circumstances The
 book also discusses the relevant recommendations by the OECD s Financial Action Taskforce for preventing the financing of
 terrorism and the national maritime security legislation for preventing the maritime facilitation of terrorist activities in the

United Kingdom and in Australia The book concludes by emphasising the importance of the continual active implementation of ship port facility and supply chain security measures and of further enhancing international cooperation to facilitate vessel interdictions It will be of interest to those working in the areas of Law and Terrorism Law of the Sea Maritime Law and Insurance and International Law Using Human Rights to Counter Terrorism Manfred Nowak,2018-03-30 While providing a substantive legal analysis of the links between human rights and counter terrorism this book provides the tools to successfully argue that a human rights approach does not undermine the fight against terrorism Through practical examples it shows that a State s lack of respect for human rights hinders its fight against terrorism and can be counter productive The contributing experts represent a wide breadth of experience at the national and international levels and bring their unique approach to each cross cutting topic **Terrorism and Political Violence in West Africa: a Global Perspective** Adebayo E. Adeyemi,Mahmoud N. Musa,2015-07-30 While it could be arguably stated that West Africa has achieved remarkable and sustainable progress in the areas of democratic governance and economic growth the sub region over the past few years has been challenged by terrorism and other transnational security threats Innocent civilians are continuously killed security operatives and providers of humanitarian assistance targeted properties and infrastructure wantonly destroyed thus culminating in significant displacement of people and acute poverty If these developments are not carefully and timeously addressed they are capable of eroding progress so far recorded It is against this background that this Thesis undertakes a study of the different manifestations of terrorism and related transnational security challenges in West Africa to explore the internal and external sources and drivers of instability establish the linkages between terrorism and transnational threats examine the various steps taken in recent time to strengthen the sub regions capacity to prevent and address the menace of terrorism and other security challenges and make necessary policy recommendations based on comprehensive best practices Political Theory and Film Ian Fraser,2018-01-15 The actions images and stories within films can impact upon the political consciousness of viewers enabling their audience to imagine ways of resisting the status quo politically economically and culturally But what does political theory have to say about film Should we explore film theory through a political lens Why might individuals respond to the political within films This book connects the work of eight radical political theorists to eight world renowned films and shows how the political impact of film on the aesthetic self can lead to the possibility of political resistance Each chapter considers the work of a core thinker on film shows its relevance in terms of a specific case study film then highlights how these films probe political issues in a way that invites viewers to think critically about them both within the internal logic of the film and in how that might impact externally on the way they live their lives Examining this dialogue enables Ian Fraser to demonstrate the possibility of a political impact of films on our own consciousness and identity and that of others *International Legitimacy and the Politics of Security* Alan Craig,2013-06-20 Delegitimation has become the new battleground for Israel and the critics of Israeli military operations But the Israeli

experience reveals a more general engagement where all states act strategically to build legitimacy for their policies and all resist attempts at delegitimation To understand these processes it is necessary to see how politicized moral and legal judgments shape both the use of force by states and our judgments about the means and the outcomes This is a book about legitimacy military lawyers and security More particularly it is about how the legitimacy of Israel s asymmetric military operations cannot be detached from the politics of law and ethics Sometimes it is enough that states respect the laws of armed conflict but at other times they may be held to a higher standard This does not happen in a vacuum Rather it is the product of political engagement in the murky politics of international legitimacy where standards are negotiable and some states get a harder time than others There is a strong theoretical analysis underpinning a discussion that constantly returns to the practical problems of modern armed conflict where combatants hide among civilians and states complain about the unrealistic expectations of human rights NGOs Here the law is unclear and there are choices to be made The book presents new research into the involvement of Israeli military lawyers in operational targeting decision making that has life and death consequences The case studies concern targeted killing during the Second Intifada Israel s 2006 Lebanon War the 2009 Operation Cast Lead in Gaza and finally the 2010 Israeli maritime interception of the Turkish Flotilla to Gaza The investigation identifies a struggle between the proponents of human rights in war and those who promote the rights of states to deploy military force for the security of their citizens But not all parties to a military conflict are held to the same standards In fact the analysis maps a complex political deployment of law and ethics in the strategic calculation of legitimacy costs and the diplomatic processes whereby they are contested with policy implications for those in charge of the design and execution of military operations

Communicating Terror Joseph S. Tuman, 2003-05-07 **Communicating Terror** The Rhetorical Dimensions of Terrorism argues that the meaning of terrorism is socially constructed and suggests a new definition of terrorism chiefly as a process of communication between terrorists and multiple target audiences Concise yet comprehensive this text examines how acts of terrorism create rhetorical acts What messages persuasive meanings symbols do acts of terrorism generate and communicate to the world at large These rhetorical components include definitions and labels symbolism in terrorism public oratory about terrorism and the relationship between terror and media This unique communication perspective shows how the rhetoric of terrorism is truly a war of words symbols and meanings argues that the meaning of terrorism is socially constructed and suggests a new definition of terrorism chiefly as a process of communication between terrorists and multiple target audiences Concise yet comprehensive this text examines how acts of terrorism create rhetorical acts What messages persuasive meanings symbols do acts of terrorism generate and communicate to the world at large These rhetorical components include definitions and labels symbolism in terrorism public oratory about terrorism and the relationship between terror and media This unique perspective shows how the rhetoric of terrorism is truly a war of words symbols and meanings
