Brown, H. Douglas (2004). *Language assessment: Principles and classroom practices*. White Plains, NY: Pearson Education. 324 pp. \$48.00 paper. ISBN 0–13–098834–0.

Brown, James Dean (2005). *Testing in language programs: A comprehensive guide to English language assessment*. New York: McGraw-Hill. 307 pp. \$32.85 paper. ISBN 0–07–294836–1.

Two new textbooks for introductory courses on language testing differentially clarify basic principles of language assessment for relatively similar audiences. Both H. Douglas Brown's *Language Assessment: Principles and Classroom Practices* and James Dean Brown's *Testing in Language Programs: A Comprehensive Guide to English Language Assessment* give excellent and concise summaries of the processes involved in test development, but they differ in that H. D. Brown's book views testing from the standpoint of the teacher in the language classroom, providing, in his own words, 'a clear and reader-friendly' (p. ix) overview of the foundations of second language (L2) testing and specifically avoiding instruction on statistics related to testing – which could be viewed as allowing the course instructor more freedom to teach test statistics in the manner and with supplements he or she chooses. In contrast, J. D. Brown's book engages testing primarily from the viewpoint of the program administrator, giving a step-by-step overview of statistical applications and procedures for testing that, in his own words, 'provide[s] a balance between the technical and practical aspects of language testing that is neither too complex nor too simplistic' (p. x).

The contrast between the two books highlights the fact that many introductory, graduate-level language testing classes often include two different types of students, those from MA or undergraduate TESOL programs who plan to teach and/or be program administrators and

ground where researchers seek to measure second language performance to better understand how people learn their second languages The Handbook also reviews how to best measure and evaluate the second language L2 learners personal characteristics backgrounds and learning contexts to better understand their L2 learning trajectories Taking a transdisciplinary approach to research the book builds upon recent theorizing and measurement principles from the fields of applied linguistics cognitive science psychology psycholinguistics psychometrics educational measurement and social psychology The Handbook is divided into six key sections 1 Assessment concepts for SLA researchers 2 Building instruments for SLA research 3 Measuring individual differences 4 Measuring language development 5 Testing specific populations and 6 Measurement principles for SLA researchers

The Cambridge Guide to Second Language Assessment Christine Coombe, 2012-01-30 The Cambridge Guide to Second Language Assessment aims to present in one volume an up to date guide to the central areas of assessing the second language performance of English by speakers of other languages This volume provides snapshots of significant issues and trends that have shaped language assessment in the past and highlights the current state of our understanding of these issues

Tests that Second Language Teachers Make and Use Greta Gorsuch, 2019-10-24 Classroom tests are an everyday feature of second and foreign language classrooms worldwide Teachers spend a lot of time and energy making and using tests and learners spend a lot of time and energy taking them Nonetheless such assessments are under studied as they are considered routine This volume illuminates this little researched area Featuring fifteen classroom language tests made and used by Chinese English French German Italian Japanese Russian and Spanish teachers the book includes parallel teacher commentary and testing content chapters that transparently probe the teachers processes of making and using their tests Rather than view teachers tests as poor shadows of what professional test writers do this work identifies the reasoning behind teachers tests In addition focused testing content chapters take examples directly from the actual tests and the accompanying teacher commentary This book is an accessible applied resource for second and foreign language teachers language program administrators working with teachers students in teacher preparation and enrichment programs and scholars in language teaching learning and testing

Language Assessment H. Douglas Brown, 2004 Survey of principles and tools for second language assessment

[Assessment in the Second Language Writing Classroom](#) Deborah Crusan, 2010-07 Assessment in the Second Language Writing Classroom is a teacher and prospective teacher friendly book uncomplicated by the language of statistics The book is for those who teach and assess second language writing in several different contexts the IEP the developmental writing classroom and the sheltered composition classroom In addition teachers who experience a mixed population or teach cross cultural composition will find the book a valuable resource Other books have thoroughly covered the theoretical aspects of writing assessment but none have focused as heavily as this book does on pragmatic classroom aspects of writing assessment Further no book to date has included an in depth examination of the machine scoring of writing and its effects on second language writers

Crusan not only makes a compelling case for becoming knowledgeable about L2 writing assessment but offers the means to do so. Her highly accessible thought provoking presentation of the conceptual and practical dimensions of writing assessment both for the classroom and on a larger scale promises to engage readers who have previously found the technical detail of other works on assessment off putting as well as those who have had no previous exposure to the study of assessment at all.

Assessment Myths Lia Plakans, Atta Gebril, 2015-03-16 This volume was conceived as a best practices resource for assessment in the way that *Vocabulary Myths* by Keith S Folse is one for reading and vocabulary teachers. Like others in the *Myths* series this book combines research with good pedagogical practices. The book opens with an introduction that reviews many key assessment terms and concepts. The myths examined in this book are: Assessment is just writing tests and using statistics. A comprehensive final exam is the best way to evaluate students. Scores on performance assessments are preferable because of their accuracy and authenticity. Multiple choice tests are inaccurate measures of language but are easy to write. We should test only one skill at a time. A test's validity can be determined by looking at it. Issues of fairness are not a concern with standardized testing. Teachers should never be involved in preparing students for tests. Implications for teaching and an agenda for research are discussed in a conclusion.
