Moss, Karl-Heinz Heinig, David B. Poker, 2001-08-02

The presentations during this November 2000 symposium emphasize the broad scientific and technological interest in ion beam applications to synthesis and processing of advanced materials A significant portion of the symposium addressed ion beam processing and synthesis at the nano scale including work on nanocrystals quantum dots quantum wells nanotubes and self organized structures as well as heterostructures and other thin films c Book News Inc Microscopy of Semiconducting Materials A.G Cullis, R Beanland, 2000-01-01 With IC technology continuing to advance the analysis of very small structures remains critically important Microscopy of Semiconducting Materials provides an overview of advances in semiconductor studies using microscopy The book explores the use of

transmission and scanning electron microscopy ultrafine electron probes and EELS to investigate semiconducting structures. It also covers specimen preparation using focused ion beam milling and advances in microscopy techniques using different types of scanning probes such as AFM, STM and SCM. In addition, the book discusses a range of materials from finished devices to partly processed materials and structures including nanoscale wires and dots. This volume provides an authoritative reference for all academics and researchers in materials science, electrical and electronic engineering and instrumentation and condensed matter physics.
