and framework as well as the standardization effort on formal methods in conformance testing While there are still open issues and divergencies between theory and practice in these fields the scope of the series started expanding to related fields of growing practical relevance for example to testing with regard to the B ISDN protocol reference model in particular ATM the ODP reference model and the Internet protocol suite as well as to interoperability testing and performance testing To reflect the extended scope the program committee agreed on a new name for this series of working conferences to be applied the first time to the 1996 conference However in order to emphasize the tradition of IWPTS the numbering of this series was continued such that IWTCS 96 is counted as the 9th International Workshop on Testing of Communicating Systems As in the years before the workshop aims at bringing together researchers and practitioners furthering the exchange of views and correlating the work of both sides
