Textbook For Childbirth Educators:

Textbook for Childbirth Educators Patricia Hassid,1978 *Textbook for Childbirth Educators* Patricia Hassid,1984

Childbirth Education Francine H. Nichols,Sharron Smith Humenick,1988 The Cornerstone Method of Childbirth Education Nichole Tilsner,Juli Tilsner,2016-07 The Cornerstone Method is an inclusive childbirth preparation method that prepares you to have an empowered birth experience in any location Learn to work with all of your birth senses in preparation for labor birth and the postpartum period This workbook is to be used while attending a Cornerstone Method Childbirth Preparation course *Education for Childbirth and Parenthood* Elizabeth R. Perkins,2017-12-15 Originally published in 1980 the setting of this book is in the practicalities of teaching on labour wards in antenatal clinics and in child health clinics In such settings health education about childbirth and parenthood is often an explicit and always implicit task for the health professional The book results from several years research on health service teaching methods and contains detailed studies of teaching in practice in clinics in classes and on wards by midwives health visitors physiotherapists doctors National Childbirth Trust teachers and the writers of educational pamphlets A number of transcripts of teaching sessions are presented to illustrate ways in which practitioners can develop more relevant and sensitive teaching strategies The author shows that realistic goals are essential if the needs of learners who are also problematically patients and clients are to be met The book offers insights into professional problems which voluntary organisations concerned with the health service and with educational work with parents can use to help both themselves and their clients to make a more intelligent use of the facilities available A more practical but critical philosophy of antenatal teaching is advocated enabling all professionals involved to take a fresh look at their courses and clients **The Big Book of Birth** Erica Lyon,2007-02-27 At last everything expecting moms need to know about giving birth Childbirth is one of the most significant events of any woman s life and for many also a source of enormous anxiety and fear In The Big Book of Birth renowned childbirth educator and Realbirth Center founder Erica Lyon offers an antidote to that fear with a comprehensive and up to date guide to childbirth Drawing from more than a decade of teaching expecting parents what really to expect Lyon fills the void that currently exists in childbirth literature offering clear current objective advice on everything from choosing your doctor or midwife to the realities of assisted and cesarean births to the many different pain coping options you can use during delivery and proven techniques that can help you relax and often speed along your labor The Big Book of Birth guides women through the four stages of labor dispelling misconceptions and providing a wealth of objective information in a warm welcoming and well organized format A long overdue resource The Big Book of Birth gives expectant mothers the knowledge they need to approach childbirth with confidence and joy **Midwifery & Childbirth** J. Pence, Childbirth is both a profound experience and a contested subject The experience of women has complex medical historical cultural and public policy dimensions In this book Judith Rooks achieves the rare feat of bringing these dimensions together in a way that can be appreciated by

health care planners midwives physicians and women considering pregnancy The author vividly describes the history of struggle among health care providers over the meaning and handling of the birth process The medical model and the midwifery model continue to collide today the former focusing on pathology and monitoring the patient for it the latter focusing on birth as a normal healthy process The education and professional training of those who care for women during pregnancy childbirth and the important postpartum period reflects these divisions Obstetrics family physicians midwives nurses and others play roles in providing the necessary care In focusing on midwives Rooks deals fairly and sensitively between certified nurse midwives and direct entry midwives most of whom lack formal educational preparation in midwifery This book describes clearly and with documented scientific evidence the specific benefits of the midwifery approach to the care of pregnant women and their families In clear language accessible to the lay reader Rooks summarizes the research on the unintended effects of obstetrical interventions such as episiotomies epidurals C sections and continuous electronic fetal heart monitoring and the effectiveness and important benefits of an approach that focuses on the positive potential of childbearing as contrasted with a narrow focus of potential for pathology While she acknowledges the importance of access to medical care extensive research shows the advantages of the midwifery approach Much that passes for routine obstetric care in the United States has been found to be unnecessary ineffective or even harmful when applied to women with normal pregnancies The arguments over the control of childbirth are set in the context of recent changes in health care including the current transition to managed care the impact of the women s movement and movements for natural childbirth home birth and breastfeeding and women s fear of and concern about the pain associated with labor Rooks also explains the influence of the reports and recommendations of prestigious scientific and health policy commissions and of federal initiatives and programs on the care provided to pregnant women in this country She contrasts U S practices with those of comparable industrialized countries like the European states Canada Australia New Zealand and Japan

A textbook for a pregnant woman. Everything you need to know when carrying a child. O. Nashchubskiy, There is nothing more magical in this world than the moment when life begins its new story This is the moment when a small miracle awakens in the arms of mother and father and the whole world reveals its miracles in new colors Like the pages of a magic book the life of a pregnant woman is filled with mysteries and surprises Every moment is a chapter every movement is an art and the beating of a small heart is a magic that cannot be described in words This book is

the key to this magical book of life She invites you on a journey full of mystery and wonder into a world where the smallest touches become the most important This is a journey into the world of motherhood and fatherhood where every day is a new chapter every minute is an encounter with magic Here you will find stories about how dreams and hopes are born about how love and happiness are born This book is a colorful picture of life where every color every note is part of this magical symphony Let s open the first page of this magical book together and go on an incredible journey where every moment is filled with the magic of a New Life In this world where every step leads to a new beginning and every beginning carries with it the eternal circle of life conceiving a child is one of the most magical and mysterious moments It is like a quiet whisper of nature a promise of new life gently emerging in the secret depths of existence This act of creating new life is the moment when love transcends the visible and becomes a force that can change the world Conceiving a child is not just a biological process it is an act of love and hope This is the moment when two hearts work together to create a miracle giving the world a new soul This is the beginning of a journey full of excitement joy sometimes fear and uncertainty but always full of love And then comes the moment of birth a solemn and magical event when new life meets the light for the first time This is the moment when time stops and the entire universe seems concentrated in this small creature that lies so helplessly in the arms of its mother The birth of a child is the fulfillment of the meaning of life the embodiment of love and hope that were inherent at the moment of conception With this event comes a new responsibility responsibility for a new life for this little miracle which now depends on its parents This is a responsibility not only for the physical well being of the child but also for his emotional and spiritual development Parents become the first teachers the first mentors and the first support in this world for their child And of course with the birth of a child comes incredible love love that knows no boundaries knows no fatigue and knows no fear This is love that is stronger than anything in the world love that is capable of the greatest sacrifices and deeds This is love that stays with parents for life grows and develops with the child Conceiving and giving birth to a child are not just natural stages of life they are sacred acts full of deep meaning and grandeur They remind us of the miracle of life the power of love and how important it is to cherish every moment spent with our children This is a journey that changes us makes us better wiser and happier In a world where every breath and every step carries the invisible magic of the beginning the psychological education of a child starting from the moment of conception and especially in the first year of life is one of the most significant and subtle threads with which we adults weave the fabric of the future From the moment of conception when new life barely begins to pulsate in the womb it already absorbs the essence of the surrounding world through the senses of the mother The emotional state thoughts sensations of the mother become the first colors with which she perhaps unknown paints the first images in the mind of her child Love calm and harmony surrounding the mother become the basis for the development of a sense of security in the child When a baby is born his psychological development takes on a new round Every touch every look every word of the parents is imprinted in the child s tender memory forming his ideas about the

world about himself and about those who surround him In the first year of life when the baby cannot yet speak he actively learns to understand the world through emotions and tactile sensations This is the time when the foundation of trust in the world is laid through the warmth of hands the tenderness of hugs and the confidence that parents are always there Mom s smile dad s gentle voice their calmness and confidence are transmitted to the baby giving him a feeling of security and anticipation of good things The importance of psychological education during this period cannot be overestimated This is the time when the foundations of self esteem adaptability and first social skills are laid Parents are the first teachers and mentors through whom the child learns to understand himself and others learns to feel and express his emotions The love and attention respect and understanding that a child receives in the first year of his life become the cornerstone of his psychological health and well being for the rest of his life This is the foundation on which all his future relationships his self confidence and his ability to face difficulties will be built Thus psychological education begins long before the first word the first step it begins with the first heartbeat in the womb and continues with every moment of the first year of life It is a mysterious and majestic task to fill this world with love raising a new soul that will one day make it a better place
