This comprehensive introduction to geology is an essential resource for students and practitioners in this field. Divided into three parts, it covers the fundamental principles of geology, the study of rocks, and the structure and properties of the earth. The text is accompanied by numerous illustrations and diagrams, providing a clear understanding of complex concepts. This book is an excellent reference for those seeking a broad knowledge of geology. This work has been selected by scholars as being culturally important and is part of the knowledge base of civilization as we know it. This work is in the public domain in the United States of America and possibly other nations. Within the United States, you may freely copy and distribute this work as no entity, individual or corporate, has a copyright on the body of the work. Scholars believe, and we concur, that this work is important enough to be preserved, reproduced, and made generally available to the public. We appreciate your support of the preservation process and thank you for being an important part of keeping this knowledge alive and relevant.

A Textbook of Geology Philip Lake, 2015-06-02

Excerpt from *A Textbook of Geology*: A text book such as the present falls naturally into two sections which for brevity may be called Physical Geology and Stratigraphical Geology respectively. The first section, Chapters I to XV inclusive, has been written by Mr Rastall; the second section, from Chapter XVI to the end, has been written by Mr Lake. Each author is responsible for his own section only, but care has been taken to prevent omissions and to avoid any repetitions beyond what would be necessary in a work by a single author. In the preparation of the book, the authors have received assistance from many friends to whom they desire to express their acknowledgements. In the Physical section, Mr C. Barrington Brown, jun., helped in the final revision of the manuscript for the press and drew most of the diagrams which appear in this part of the book. In Mr Rastall's absence abroad, Mr J. Romanes kindly corrected the proofs of this section of the book. Dr Hatch also read the proofs and offered many valuable suggestions. In the Stratigraphical section, the thanks of the authors are due especially to Mr Henry Woods, who read the whole of this part in manuscript with the exception of the last chapter. The book has profited greatly from his advice. Mr F. W. Harmer very kindly read the account of the Pliocene series and added many useful notes. Many of the illustrations are original.
