## **The Good Language Learner:**

**The Good Language Learner** Neil Naiman, 1996 This book is one of the most influential research studies on Second Language Learning ever undertaken The Good Language Learner addresses key problems for teachers about the strategies that successful learners use the attitudes they show to the language they are learning the nature of their most successful experiences and similar issues It is based on the direct experience of a wide range of learners It enables us to recognise the combined roles of fluency activity and natural communication on the one hand and accuracy activity with formal understanding of the language system and the mistakes that one is liable to make as a learner on the other hand Few works of empirical analysis in language teaching have had so much influence and this edition should be an essential component of any teacher's library in local authority centres schools teacher education institutions and the home library of language teachers

**Language Acquisition** Susan M. Gass, Larry Selinker, 2001 This book is a thorough revision of the highly successful text first published in 1994 The authors retain the multidisciplinary approach that presents research from linguistics sociology psychology and education in a format designed for use in an introductory course for undergraduate or graduate students The

research is updated throughout and there are new sections and chapters in this second edition as well. New chapters cover child language acquisition first and second Universal Grammar and instructed language learning. New sections address issues such as what data analysis doesn't show, replication of research findings, interlanguage transfer, multilingual acquisition and transfer, the aspect hypothesis, general nativism, connectionist approaches and implicit/explicit knowledge. Major updates include nonlanguage influences and the lexicon. The workbook *Second Language Learning Data Analysis Second Edition* makes an ideal accompaniment to the text *Learners' Experiences of Immersion Education* Michèle De Courcy, 2002. This text follows the progress of two groups of learners in late immersion programmes. It adds to the literature on such programmes by its emphasis on the processes of learning in such programmes. Another aim of the book is to extend knowledge of learning processes in character-based languages. *2014 International Conference on Advanced Education and Management (ICAEM2014)*, 2014-02-13. The ICAEM2014 aims to bring together researchers, educators and students from around the world in both industry and academia for sharing the state of art research results and applications for exploring new areas of research and development and for discussing emerging issues on education and management fields. We received a total of 312 submissions from various parts of the world. The Technical Program Committee worked very hard to have all papers reviewed before the review deadline. The final technical program consists of 92 papers. There are one keynote speech and 2 invited sessions. The proceedings were published by DEStech Publications Inc and will be submitted to Ei Compendex databases for indexing. We would like to mention that due to the limitation of the conference venue capacity we are not able to include many fine papers in the technical program. Our apology goes to those authors.

**Individual Differences in Second Language Learning** Peter Skehan, 2014-04-04. Understanding the way in which learners differ from one another is of fundamental concern to those involved in second language acquisition, either as researchers or teachers. This account is the first to review at book length the important research into differences, considering matters such as aptitude, motivation, learner strategies, personality and interaction between learner characteristics and types of instruction.

*Language Learning Strategies in Independent Settings* Stella Hurd, Tim Lewis, 2008-10-03. Language learning strategies have been a topic of research for roughly three decades. Broadly speaking, that research has focused on classroom tuition, predominantly at secondary level. Increasingly, however, language learning occurs in independent settings, whether at distance or in Institution Wide Language Programmes (IWLPs) or in virtual environments. Success in independent language learning is achieved by autonomous individuals with a capacity for self-regulation. Yet we still know relatively little about the specific means they use to learn effectively, whether in terms of the affective strategies they employ to sustain motivation, the metacognitive strategies required for planning, monitoring and evaluating their learning, or the specific cognitive strategies applied to difficult learning tasks. These are all discussed and evaluated in *Language Learning Strategies in Independent Settings*.

**Second Language Learning and Language Teaching** Vivian Cook, 2016-05-05. *Second Language Learning*

and Language Teaching provides an introduction to the application of second language acquisition research to language teaching Assuming no previous background in second language acquisition or language teaching methods this text starts by introducing readers to the basic issues of second language acquisition research It then examines how people learn particular aspects of the second language such as grammar vocabulary pronunciation and the writing system and at the strategies they adopt in their learning and the differences between individuals Final chapters look at second language learning in a broader context the goals of language teaching and how teaching methods relate to SLA research This newly updated fifth edition builds on the comprehensive scope of earlier editions while also addressing more recent developments in the field particularly multilingual approaches to language teaching

**Learning** M. Carmen Fonseca-Mora, Mark Gant, 2016-09-23 *Melodies Rhythm and Cognition in Foreign Language Learning* is a collection of essays reflecting on the relationship between language and music two unique innate human capacities This book provides a clear explanation of the centrality of melodies and rhythm to foreign language learning acquisition The interplay between language music brings to applied linguists inquiries into the nature and function of speech melodies the role of prosody and the descriptions of rhythmical patterns in verbal behaviour Musical students seem to be better equipped for language learning although melodies and rhythm can benefit all types of students at any age In fact in this book melodies and rhythm are considered to be a springboard for the enhancement of the learning of foreign languages

*Modern Languages and Learning Strategies* Michael Grenfell, Vee Harris, 2002-01-04 Every secondary school pupil studies modern foreign languages as part of the curriculum and some do so with considerably more success than others This book looks firstly at the ways in which languages can be taught and secondly at case studies that highlight the practical methods that will help teachers get the best results The case studies included show that the best learners are those who have developed learning strategies that help them succeed These learning strategies are examined through practical examples carried out in classrooms and advice is given about ways in which teachers can ensure that all their pupils have the opportunity to develop these skills Lots of suggestions are made about the various activities teachers can carry out in order to make learning enjoyable and positive In some cases the results are shown to be very encouraging and any language teacher should be left with a feeling not only of renewed enthusiasm for their subject area but also a deeper understanding of how to enable learners to reach their full potential
