The Gospel Of The White Lotus:

The Gospel of the White Lotus Charles F. Horne, 2005-12 This scarce antiquarian book is a facsimile reprint of the original. Due to its age, it may contain imperfections such as marks, notations, marginalia, and flawed pages. Because we believe this work is culturally important, we have made it available as part of our commitment for protecting, preserving, and promoting the world's literature in affordable, high-quality modern editions that are true to the original work. The Idyll of the White Lotus Mabel Collins, 1907 The Sacred Books and Early Literature of the East Charles Francis Horne, 1917

The Gospel of the Prophet Mani Duncan Greenlees, 2007-07 For centuries Manicheism was a powerful religion rivaled only by Christianity but now virtually unheard of. Today there is a resurgence of interest in Gnostic teachings. This work has been painstakingly pieced together and is an important work for scholars, religious researchers, and those interested in alternative spiritual paths. **The esoteric character of the Gospels** Helena Petrovna Blavatsky, 1895 **The Complete Nyingma Tradition from Sutra to Tantra, Book 13** Choying Tobden Dorje, 2017-11-14 Choying Tobden Dorje's magnum opus presented in English for the first time in an authoritative translation prepared under the auspices of well-known and highly respected Tibetan teachers and translators. In 1838 Choying Tobden Dorje, a yogin and scholar of northeastern Tibet, completed a multivolume masterwork that traces the entire path of the Nyingma tradition of Tibetan Buddhism from beginning to end. Written by a mantra practitioner for the benefit of mantra practitioners living among the lay community, it was intended to be informative, inspirational, and above all, practical. Its twenty-five books or topical divisions offer a comprehensive and detailed view of the Buddhist path according to the early translation school of Tibetan Buddhism, spanning the vast range of Buddhist teachings from the initial steps to the highest esoteric teachings of great perfection. Choying Tobden Dorje's magnum opus appears in English here for the first time. Book 13 presents the philosophical systems of India and Tibet according to the writings of Longchen Rabjam and the revelations of Orgyan Lingpa. First, it discusses the views attributed to classical Hinduism, Jainism, materialism, and nihilism. Second, it describes the standpoints of the Vaibhashika and Sautrantika exponents of the lesser vehicle, exemplified by pious attendants and hermit buddhas, and the Cittamatra, mind-only, and Madhyamaka middle-way commentators of the great vehicle, exemplified by great bodhisattva beings. Third, it analyzes the inner and outer vehicles of the Buddhist tantras with an emphasis on the three classes of the great perfection. Fourth, it documents the lines of philosophical transmission within Tibet, including Bon, Nyingma, Kagyu, Sakya, Kadampa, and Geluk. It concludes with an extract from a well-known treatise of the Fifth Dalai Lama applying the techniques of consequential reasoning to the first chapter of Vasubandhu's *Treasury of Phenomenology*. **The Book of Seeds** Paul Smith, 2018-04-06 Deftly showcases 600 unique species from across the globe and reveals the wonders of nature. Recommended Library Journal: Seeds are nature's consummate survivors. The next time you admire a field of waving green grassland or a stunning grove of acacia, stop to consider how it got that way, often against incredible odds. Seeds can survive

freezing temperatures and drought They can pass through our digestive systems without damage and weather a trip across the ocean hitching a ride on marine debris The Book of Seeds takes readers through six hundred of the world's seed species revealing their extraordinary beauty and rich diversity Each page pairs a beautifully composed photo of a seed life size and in some cases enlarged to display fine detail with a short description a map showing distribution and information on conservation status The whole spectrum of seeds is covered here There are prolific species like corn and less widely distributed species like the brilliant blue seeds of the traveler's palm or the bird of paradise flower There are tiny seeds and seeds weighing up to forty pounds And while seeds in all their shapes sizes and colors grant us sustenance there are even some we would be wise to treat with caution such as the rosary pea whose seeds are considered toxic The essential guide to these complex plant creations The Book of Seeds offers readers a rare up close look that will inspire scientists and nature lovers alike Handsome and handy New York Times A well written primer on seed anatomy evolution and use including conservation Huntia
