The Great Depression And World War II Organizing America 1933 1945:

The Great Depression and World War II., 2009 **Books and Libraries in American Society during World War II** Patti Clayton Becker, 2013-09-13 World War II presented America's public libraries with the daunting challenge of meeting new demands for war-related library services and materials with Depression-weakened collections, inadequate budgets, and demoralized staff in addition to continuing to serve the library's traditional clientele of women and children seeking recreational reading. This work examines how libraries could respond to their communities' need through the use of numerous primary and secondary sources. War & Wartime Changes, the Transformation of America 1940-1945 (c) C. Calvin Smith, 1986 This is a lively history of specific social, political, and economic changes that all-out war brought to the home front in mid-America. Drawing from letters to the editor in local and state papers, from editorials, from personal interviews, and from the manuscript collections left by state political leaders, Calvin Smith brings into focus the impact of wartime not only upon agricultural and business economics but also upon particular social groups and the lives of individuals. The war generated the beginnings of a rights revolution in black communities throughout the nation. The author takes a careful look at the resulting strain on relations between the state's black and white citizens. No less important is the consideration of Japanese Americans from the West Coast who were relocated to camps in Arkansas and of the Jehovah's Witnesses who would not take part in the war effort either on the battlefield or at home. *War and Wartime Changes* illuminates a fascinating and sometimes embarrassing segment of history which until now has not been presented in a single cohesive work. The author details the unique experiences Arkansas had at this time as well as the patriotism its citizens felt for their country. Here is the story for the historian, for every student of society and its ways, and for anyone who wants to understand or remember the patriotic fervor of Americans during World War II. Calvin Smith has created, with persistent and imaginative research, a rare admixture of nostalgia and solid scholarship. **The Great Depression** David F. Burg, 2009 Presents a history of the Great Depression including the events that led up to it and the New Deal that followed, with chronologies, personal narratives, and documents. **A Companion to World War II** Thomas W. Zeiler, Daniel M. DuBois, 2012-12-21 *A Companion to World War II* brings together a series of fresh academic perspectives on World War II, exploring the many cultural, social, and political contexts of the war. Essay topics range from American anti-Semitism to the experiences of French African soldiers, providing nearly 60 new contributions to the genre, arranged across two comprehensive volumes. A collection of original historiographic essays that include cutting-edge research. Analyzes the roles of neutral nations during the war. Examines the war from the bottom up through the experiences of different social classes. Covers the causes, key battles, and consequences of the war. Technological Utopianism in American Culture Howard P. Segal, 2005-11-07 Featuring twenty-five writers in all, this book includes Howard P. Segal's acclaimed work on utopian visionaries. **Review of Austrian Economics, Volume 1** Murray N. Rothbard, 1995 **John Randolph Haynes** Tom Sitton, 1992 For four decades John Randolph Haynes (1853-1937) was in the

forefront of social reform crusades and political action in Los Angeles and California with his most important legacies in the fields of direct legislation and public ownership of utilities He was the individual most responsible for the adoption of the initiative referendum and recall in Los Angeles in 1902 and in California in 1911 His vigilant protection of these measures thereafter and his promotion of direct legislation throughout the nation earned him the title father of direct legislation in California From 1910 until his death Haynes s chief priority was to shape the Los Angeles Department of Water and Power into a glowing example of public ownership of utilities Today LADWP operates the world s largest municipal water and electrical power generation and distribution system continuing to serve the needs of an ever growing region whose extent even Haynes could not have envisaged In many ways Haynes is an enigma He was not a typical progressive having amassed a fortune in his medical practice and in real estate mining and other capitalistic ventures However he spent a large portion of his wealth to promote a form of gradual democratic socialism in the United States Haynes advocated the transformation of the nation s economy and government yet he campaigned for morality laws that limited personal freedom Haynes s motivation was not social status or money both of which he had before his conversion to social reform Nor was it political power he never ran for office except as a temporary freeholder or created a personal political machine His primary motive was a perhaps arrogant yet honest desire to aid in the creation of a more just society by improving the living and working conditions of the less fortunate In one way or another Haynes participated in all the major social and political events that shaped California and Los Angeles in a most dynamic era of their development In a broader sense Haynes s life serves as a yardstick with which to measure other progressives of his time and as a key for understanding the motivation of those idealists who helped shape our present political institutions

Taking Flight M. Houston Johnson, 2019-02-21 *Taking Flight* explores the emergence of commercial aviation between the world wars and in the midst of the Great Depression to show that the industry s dramatic growth resulted from a unique combination of federal policy technological innovations and public interest in air travel Historian M Houston Johnson V traces the evolution of commercial flying from the US Army s trial airmail service in the spring of 1918 to the passage of the pivotal Air Commerce Act of 1938 Johnson emphasizes the role of federal policy particularly as guided by both Herbert Hoover and Franklin Roosevelt to reveal the close working relationship between federal officials and industry leaders as well as an increasing dependence on federal assistance by airline airframe and engine manufacturers *Taking Flight* highlights the federal government s successful efforts to foster a nascent industry in the midst of an economic crisis without resorting to nationalization a path taken by virtually all European countries during the same era It also underscores an important point of continuity between Hoover s policies and Roosevelt s New Deal a sharp departure from many interpretations of Depression era business history and shows how both governmental and corporate actors were able to harness America s ongoing fascination with flying to further a larger economic agenda and facilitate the creation of the world s largest and most efficient commercial aviation industry This glimpse into the golden age

of flight contributes not only to the history of aviation but also to the larger history of the United States during the Great Depression and the period between the world wars *Taylored Citizenship* Char Miller,2001-12-30 Miller shows how government institutions changed the meaning of American citizenship during the World War II era He considers the state s role in creating concepts of citizenship and subjectivity by analyzing the application within military and educational institutions of systems of discipline associated with Frederick W Taylor and scientific management Miller also explores a neglected aspect of Michel Foucault s concerns about citizenship and subjectivity when examining the power of institutions and bureaucracies in creating and precluding political identities Of particular interest to scholars and students involved with American political history and theory and the sociology of work education war and conflict **Urban Farming in the West** Robert M. Carriker,2010-04-15 From 1933 to 1935 the federal government s Division of Subsistence Homesteads created thirty four New Deal communities that sought to provide a healthier and more economically secure life for disadvantaged Americans These settlements were designed to combine the benefits of rural and urban living by offering part time farming uplifting social functions and inexpensive homes Four were located in the West in Phoenix Arizona El Monte and San Fernando California and Longview Washington Robert Carriker examines for the first time the intricate histories of these subsistence homestead projects which have long been buried in bureaucratic records and clouded by misunderstanding showing that in many ways they were among the agency s most successful efforts He provides case studies of the projects rescuing their obscure histories using archival documents and rare photographs He also reveals the machinations of civic groups and private citizens across the West who jockeyed for access to the funds being allotted for New Deal community building By describing what took place on these western homesteads Carriker shows that the DSH s agenda was not as far fetched as some have reported The tendency to condemn the Division and its projects he argues has failed to appreciate the good that came from some of the individual homestead communities particularly those in the Far West Although overshadowed by the larger undertakings of the New Deal some of these western communities remain thriving neighborhoods living legacies to FDR s efforts that show how the country once chose to deal with economic hardship Too often the DSH is noted for its failures Carriker s study shows that its western homesteads were instead qualified accomplishments Industrialization in the Modern World John Hinshaw,Peter N. Stearns,2013-11-12 This unique two volume work analyzes the Industrial Revolution from a global perspective and traces its influences up to the present day encouraging students to rethink the significance of events past and present By taking a fresh approach to its topic *Industrialization in the Modern World* From the Industrial Revolution to the Internet enables students to see this ongoing phenomenon not as a standalone event but as a catalyst for the formation of today s globalized industrializing world Spanning the period from 1750 to the present the work offers some 450 entries that cover developments in Africa and Asia as well as in Europe and the United States Numerous essays are organized around specific questions or problems others

examine significant events countries or industries The work deals with all the major aspects of traditional industrialization textiles coal steel as well as modern variations China computers the Internet With a targeted approach the authors will help students see how industrialization in one society influenced another how industrialization spread throughout the world and the causes and effects of each country s individual revolution *The Palgrave Handbook of Social Movements, Revolution, and Social Transformation* Berch Berberoglu,2018-09-26 This handbook on social movements revolution and social transformation analyzes people s struggles to bring about social change in the age of globalization It examines the origins nature dynamics and challenges of such movements as they aim to change dominant social economic and political institutions and structures across the globe Departing from a theoretical introduction that explores major classical and contemporary theories of social movements and transformation the contributions collected here use a class based approach to examine key cases of social movements rebellions and revolutions worldwide from the turn of the twentieth to the early twenty first centuries Against this wide ranging background the handbook concludes by charting the varied and competing future developments and trajectories of social movements revolutions and social transformations *The Great Plains During World War II* R. Douglas Hurt,2008-06-01 An in depth examination of the effects of World War II on the Great Plains states brings to life the voices and experiences of the residents of the region in recounting the stories of the daily concerns of ordinary people *The Set-Up Men* Sarah L. Trembanis,2014-07-15 This book is an examination of cultural resistance to segregation in the world of black baseball through an analysis of editorial art folktales nicknames manhood and the art of clowning African Americans worked to dismantle Jim Crow through the creation of a cultural counter narrative that centered on baseball and the Negro Leagues that celebrated black achievement and that highlighted the contradictions and fallacies of white supremacy in the first half of the twentieth century Classic Hollywood, Classic Whiteness Daniel Bernardi,2001 Quest for the Golden Circle Arthur R. Gómez,2000 Until World War II the Four Corners Region where New Mexico Colorado Utah and Arizona meet was a collection of isolated rural towns In the postwar baby boom era however small communities like Farmington New Mexico became bustling municipalities with rapidly expanding economies In *Quest for the Golden Circle* Arthur Gomez traces the development of the Four Corners two industries mining and tourism to discover how each contributed to the economic and urban transformation of this region during the 1950s and 1960s Focusing on four cities Durango Colorado Moab Utah Flagstaff Arizona and Farmington New Mexico Gomez chronicles how these towns played key roles in the West s dramatic postwar expansion Cities such as Denver Albuquerque Phoenix Tucson El Paso and Salt Lake City all grew through use of the abundant petroleum uranium natural gas timber and other natural resources extracted from the Four Corners region But the energy boom in these towns was not to last With the arrival of foreign oil bringing economic growth to a halt in the early 1970s town leaders turned again to the land to stimulate their economy This time the resource was a seemingly inexhaustible one tourism Gomez examines how business minded citizens marketed the area s scenic

wonders and established the entire region as a tourist destination Their efforts were further assisted by the selection of stunning federal lands Mesa Verde Grand Canyon and Arches National Parks as treasures protected and promoted by the National Park Service Both mining and tourism however were beset by complex new problems and issues Extensive highways for instance were planned to bisect a Navajo reservation As Gomez illustrates the growing cities in the Four Corners region felt tremendous competing pressures between outside business powers and local needs as their extractive economy boomed and busted and as they then struggled to attract tourism dollars In addition he highlights the prominent roles played by federal agencies like the Atomic Energy Commission and the National Park Service in shaping regional destiny An outstanding analysis of the complexities of postwar development *Quest for the Golden Circle* successfully illuminates the history of one region within the larger story of the modern American West *The American West and Its Interpreters* Richard W.
