The Great Divergence China Europe And The Making Of The Modern World Economy:

The Great Divergence Kenneth Pomeranz, 2021-04-13 A landmark comparative history of Europe and China that examines why the Industrial Revolution emerged in the West The Great Divergence sheds light on one of the great questions of history Why did sustained industrial growth begin in Northwest Europe Historian Kenneth Pomeranz shows that as recently as 1750 life expectancy consumption and product and factor markets were comparable in Europe and East Asia Moreover key regions in China and Japan were no worse off ecologically than those in Western Europe with each region facing corresponding shortages of land intensive products Pomeranz's comparative lens reveals the two critical factors resulting in Europe's nineteenth century divergence the fortunate location of coal and access to trade with the New World As East Asia's economy stagnated Europe narrowly escaped the same fate largely due to favorable resource stocks from underground and overseas This Princeton Classics edition includes a preface from the author and makes a powerful historical work available to new readers

The Great Divergence Kenneth Pomeranz, 2009 [The Great Divergence](#) Kenneth Pomeranz, 2000 Why did sustained industrial growth begin in Northwest Europe despite surprising similarities between advanced areas of Europe and East Asia Pomeranz argues that Europe's nineteenth century divergence from the Old World owes much to the fortunate location of coal which substituted for timber This made Europe's failure to use its land intensively much less of a problem while allowing growth in energy intensive industries Another crucial difference that he notes has to do with trade Fortuitous global conjunctures made the Americas a greater source of needed primary products for Europe than any Asian periphery This allowed Northwest Europe to grow dramatically in population specialize further in manufactures and remove labor from the land using increased imports rather than maximizing yields Together coal and the New World allowed Europe to grow along resource intensive labor saving paths Book Jacket

The Cosmopolitan Ideal Sybille De La Rosa, Darren O'Byrne, 2015-05-28 Cosmopolitanism has resurfaced as a prominent perspective within philosophy and the social sciences Its critics though suggest that contemporary cosmopolitanism is abstract and ultimately meaningless or that it is the globalized expression of a very European and modern ideal This book aims to develop a new cosmopolitanism one that is critical inclusive and relevant for the twenty first century The first section considers why we should behave as cosmopolitans at all why do we owe some concept of justice to those who are suffering some form of injustice around the world The book then moves beyond normative debates using empirical studies on practical concerns to explore the ways in which we can break with traditional structures practices and power inequalities that have been based on disregard and subordination Extending the scope of cosmopolitanism to incorporate issues such as gender asylum and identity to draw on non Western as well as Western influences the book re conceptualizes terms like democracy refuge and representation in order to develop more inclusive and cosmopolitan understandings of them

The Capital Market of Manila and the Pacific Trade, 1668-1838 Juan José Rivas Moreno, 2024-10-19 Economic history has always emphasized the importance of long distance trade in the emergence of modern financial markets yet almost nothing is known about the Manila trade This book offers the first reconstruction of the capital market of Manila using new archival sources that have never been used in the economic history of Pacific trade The book explains how trade between Asia and Spanish America across the Pacific which lasted for 250 years 1571-1815 was financed from the city of Manila The book analyses the political economy and institutional structures of the Manila capital market in the context of the global silver trade as well as addressing key similarities and differences with European trade routes and differing approaches to colonialism and commerce in Asian waters It traces how the Manila capital market emerged in a bottom up process with a redistributive aspect that tied the interests of citizens with the fortunes of trade using institutions familiar to the public like legacy funds brotherhoods and lay

religious orders to pool liquidity originate working capital and internalise the risk of loss at sea It challenges the notion that there is a normative model for the development of capital markets and introduces an industrial organisation analysis to the broader structure of Early Modern trade in the Spanish Empire Sitting at the intersection of economic and financial history global history imperial history and political economy this book will be a cutting edge and valuable resource for a broad range of scholars Environment, Modernization and Development in East Asia Ts'ui-jung Liu, James Beattie, 2016-04-08

Viñuales, 2018-07-03 In The Organisation of the Anthropocene J E Viñuales explores the legal dimensions of the currently advocated new geological epoch called the Anthropocene in which humans are the defining force He examines in this context two basic propositions First law as a technology of social organisation has been neglected in the otherwise highly technology focused accounts by natural and social scientists of the drivers of the Anthropocene Secondly in those rare instances where law has been discussed there is a tendency to assume that the role of law is to tackle the negative externalities of transactions e g their environmental or social implications rather than the core of the underlying transactions i e the organisation of production and consumption processes Such focus on externalities fails to unveil the role of law in prompting sustaining and potentially managing the processes that have led to the Anthropocene **A Short History of the British Industrial Revolution** Emma Griffin, 2018-08-17 The

Burdens of Freedom Lawrence M. Mead,2019-04-23 Burdens of Freedom presents a new and radical interpretation of America and its challenges The United States is an individualist society where most people seek to realize personal goals and values out in the world This unusual inner driven culture was the chief reason why first Europe then Britain and finally America came to lead the world But today our deepest problems derive from groups and nations that reflect the more passive deferential temperament of the non West The long term poor and many immigrants have difficulties assimilating in America mainly because they are less inner driven than the norm Abroad the United States faces challenges from Asia which is collective minded and also from many poorly governed countries in the developing world The chief threat to American leadership is no longer foreign rivals like China but the decay of individualism within our own society The great divide is between the individualist West for which life is a project and the rest of the world in which most people seek to survive rather than achieve This difference although clear in research on world cultures has been ignored in virtually all previous scholarship on American power and public policy both at home and abroad Burdens of Freedom is the first book to recognize that difference It casts new light on America s greatest struggles It re evaluates the entire Western tradition which took individualism for granted How to respond to cultural difference is the greatest test of our times
