The Great Web:

The Great Web 3.0 Glossary Nikolas Beutin, Daniel Boran, 2023-02-14 Metaverse Non Fungible Tokens NFTs Cryptocurrencies Blockchain Artificial Intelligence AI Service Robots etc are a rapidly expanding field with an ever increasing number of terms and community specific jargon A new term is not always accompanied by something truly novel In addition to verbal pseudo innuendos and crypto slang introduced with the intent of attracting attention quickly there are several significant new developments The issue with this development is that the risk of Babylonian language confusion is growing exponentially Our observations indicate that this risk is particularly prevalent in the dialogue between science and practice This book hopes to contribute to the clarification with quick access to all key terms Obviously many online marketplaces platforms encyclopedias and glossaries already exist However our pre book analysis has revealed that neither is even close to completion sometimes with imprecise language and often with contradictory definitions and explanations This glossary provides quick access for managers students and professors alike who are faced with the topics in their daily work Students may keep track of the web 3 0 s numerous terms as they study it Instructors teachers and professors may use it as a guide for a consistent use of Metaverse NFT Cryptocurrency and Blockchain terminology Although the more than 1 300 explanations of the individual terms are scientifically based the focus is on easy understanding of the terms The authors have made an effort to provide clear and concise definitions an application focused perspective and simple language

The Consciousness Revolutions Shimon Edelman, 2023-04-06 This book is about all things consciousness great and small It starts by pointing to the key characteristic of consciousness without realizing which it cannot be understood like everything else about the mind it is fundamentally a kind of computation Among many other matters this explains how it is that we share some aspects of consciousness with bacteria how it can arise in artificial machines and not just living ones how the empty cocoon of the self that it spins ends up pretending to be the butterfly and how consciousness dooms this virtual butterfly to the splendor and the suffering of being awake and aware Unlike most other books on consciousness this one includes a

discussion of some possible ways whereby we pinned like butterflies by our species history and socioeconomic circumstances can awake to our collective predicament and join forces to do something about it It should be of interest to all readers who care about the nature of our lived experience and about our survival which depends on developing critical consciousness of our dire situation and the social dynamics that shape it
