Dictionary Of Modern American Philosophers John R. Shook, 2005-05-15 The Dictionary of Modern American Philosophers includes both academic and non academic philosophers and a large number of female and minority thinkers whose work has been neglected It includes those intellectuals involved in the development of psychology pedagogy sociology anthropology education theology political science and several other fields before these disciplines came to be considered distinct from philosophy in the late nineteenth century Each entry contains a short biography of the writer an exposition and analysis of his or her doctrines and ideas a bibliography of writings and suggestions for further reading While all the major post Civil War philosophers are present the most valuable feature of this dictionary is its coverage of a huge range of less well known writers including hundreds of presently obscure thinkers In many cases the Dictionary of Modern American Philosophers offers the first scholarly treatment of the life and work of certain writers This book will be an indispensable reference work for scholars working on almost any aspect of modern American thought

The Semantic Web: Research and Applications Asuncion Gómez-Pérez, Jerome Euzenat, 2005-05-18 This volume contains the papers presented at the 2nd European Semantic Web Conference ESWC 2005 held in Heraklion Crete Greece from 29th May to 1st June 2005 The vision of the Semantic Web is to enhance today s Web via the exploitation of machine processable metadata The explicit representation of the semantics of data accompanied with domain theories ontologies will enable a web that provides a qualitatively new level of service It will weave together an credibly large network of human knowledge and will complement it with machine processability Various automated services will help the user to achieve goals by accessing and providing information in a machine understandable form This process may ultimately create extremely knowledgeable systems with various specialized reasoning services systems Many technologies and methodologies are being developed within artificial intelligence human language technology machine

learning databases software engineering and information systems that can contribute to the realization of this vision The 2nd Annual European Semantic Web Conference presented the latest results in research and applications of Semantic Web technologies Following the success of the first edition ESWC showed a significant increase in participation With 148 submissions the number of papers doubled that of the previous edition Each submission was evaluated by at least three reviewers The selection process resulted in the acceptance of 48 papers for publication and presentation at the conference an acceptance rate of 32% Papers did not come only from Europe but also from other continents **The Message of Plato** Edward Johns Urwick, 1920

Semantic Web Gang Wu, 2010-01-01 Having lived with the World Wide Web for twenty years surfing the Web becomes a way of our life that cannot be separated From latest news photo sharing social activities to research collaborations and even commercial activities and government affairs almost all kinds of information are available and processible via the Web While people are appreciating the great invention the father of the Web Sir Tim Berners Lee has started the plan for the next generation of the Web the Semantic Web Unlike the Web that was originally designed for reading the Semantic Web aims at a more intelligent Web serving machines as well as people The idea behind it is simple machines can automatically process or understand the information if explicit meanings are given to it In this way it facilitates sharing and reuse of data across applications enterprises and communities According to the organisation of the book the intended readers may come from two groups i.e. those whose interests include Semantic Web and want to catch on the state of the art research progress in this field and those who urgently need or just intend to seek help from the Semantic Web In this sense readers are not limited to the computer science Everyone is welcome to find their possible intersection of the Semantic Web **The Contemplative**

On the Move to Meaningful Internet Systems 2004: CoopIS, DOA, and ODBASE Zahir Tari, 2004-10-11 A special mention for 2004 is in order for the new Doctoral Symposium Workshop where three young postdoc researchers organized an original setup and formula to bring PhD students together and allow them to submit their research proposals for selection A limited number of the submissions and their approaches were independently evaluated by a panel of senior experts at the conference and presented by the students in front of a wider audience These students also got free access to all other parts of the OTM program and only paid a heavily discounted fee for the Doctoral Symposium itself In fact their attendance was largely sponsored by the other participants If evaluated as successful it is the intention of the General Chairs to expand this model in future editions of the OTM conferences and so draw in an audience of young researchers to the OnTheMove forum All three main conferences and the associated workshops share the distributed aspects of modern computing systems and the resulting applications pulled created by the Internet and the so called Semantic Web For DOA 2004 the primary emphasis stayed on the distributed object infrastructure for ODBASE 2004 it was the knowledge bases and methods required for enabling the use of formal semantics and for CoopIS 2004 the main topic was the interaction of such technologies and methods with management issues such as occurs in networked organizations These subject areas naturally overlap and many submissions in fact also treat envisaged mutual impacts among them
