The Great Chain of Life Joseph Wood Krutch, 2005-08 Originally published in 1956 The Great Chain of Life brings a humanist's keen eye and ear to one of the great questions of the ages What am I Originally a scholar of literature and theater toward the end of his career Joseph Wood Krutch turned to the study of the natural world Bringing his keen intellect to bear on the places around him Krutch crafted some of the most memorable and important works of nature writing extant Whether anticipating the arguments of biologists who now ascribe high levels of cognition to the so called lower animals recognizing the importance of nature for a well lived life or seeing nature as an elaborately interconnected interdependent network Krutch's seminal work contains lessons just as resonant today as they were when the book was first written Lavishly illustrated with thirteen beautiful woodcuts by Paul Landacre an all but lost yet important Los Angeles artist whom Rockwell Kent called the best American wood engraver working *The Great Chain of Life* will be cherished by new generations of readers

The Great Chain of Being Arthur Lovejoy, 2017-07-12 This is arguably the seminal work in historical and philosophical analysis of the twentieth century Originally delivered for the William James lecture series at Harvard University in 1932-33 it remains the cornerstone of the history of ideas Lovejoy sees philosophy's history as one of confusion of ideas a prime example of which is the idea of a great chain of being a universe linked in theology science and values by pre-determined stages in all phases of life Lovejoy's view is one of dualities in nature and society with both error and truth as part of the natural order of things The past reminds us that the ruling modes of thought of our own age which we may view as clear coherent and firmly grounded are unlikely to be seen with such certainty by posterity *The Great Chain of Being* is an excursion into the past with a clear mission to discourage the assumption that all is known or that what is known is not subject to modification at a later time Lovejoy reaffirms the intrinsic worth of diversity as a caution against certitude By this he does not mean toleration of indifference or relativity for its own sake but an appreciation of mental and physical process of human beings As Peter Stanlis notes in his introduction Faith in the great chain of being was finally largely extinguished by the combined influences of Romantic idealism Darwin's theory of evolution and Einstein's theory of relativity Few books remain as alive to prospects for the future by reconsidering follies of the past as does Lovejoy's stunning work

The Great Chain of Being Arthur O. LOVEJOY, 2009-06-30 From later antiquity down to the close of the eighteenth century most philosophers and men of science and indeed most educated men accepted without question a traditional view of the plan and structure of the world In this volume which embodies the William James lectures for 1933 Arthur O Lovejoy points out the three principles plenitude

Aristotle on God's Life-Generating Power and on Pneuma as Its Vehicle Abraham P. Bos,2018-02-01 In this deep rethinking of Aristotle's work Abraham P Bos argues that scholarship on Aristotle's philosophy has erred since antiquity in denying the connection between his theology and his doctrine of reproduction and life in the earthly sphere Beginning with an analysis of God's role in the Aristotelian system Bos explores how this relates to other elements of his philosophy especially to his theory of reproduction The argument he develops is that in talking about the cosmos Aristotle rejected Plato's metaphor of artisanal production by a divine Demiurge in favor of a biotic metaphor based on the transmission of life in reproduction in which pneuma not breath as it is often interpreted but the life bearing spirit in animals and plants plays a key and sustaining role as the vital principle in all that lives In making this case he defends the authenticity of the treatises *De Mundo* and *De Spiritu* as Aristotle's and demonstrates Aristotle's works as a unified system that sharply and comprehensively refutes Plato's and in particular replaces Plato's doctrine of the soul with a theory in which the soul is clearly distinguished from the intellect

The Great Chain of Unbeing Andrew Crumey, 2021-06-01 Andrew Crumey's novels are renowned for their unique blend of science history philosophy and humour Now he brings the same insight and originality to this story cycle whose title offers an ironic twist on the ancient doctrine of connectedness the great chain of being Here we find a blind man contemplating the light of an atom bomb a musician disturbed by a conspiracy of radio waves a visitor to Moscow caught up in a comic case of mistaken identity a woman on a Greek island trying to become a different person We range across time from the Renaissance to a globally warmed future across light years in search of hallucinogenic space plankton and into magical worlds of talking insects and bottled fire Fans of Crumey's acclaimed novels will occasionally spot hints of themes and figures that have recurred throughout his fiction readers new to his work will delight in finding subtle links within the pieces Are they all part of some larger untold story We have nothing to lose but the chains of our imagination what lies beyond is a great change of being The Great Chain of Unbeing is unborning unusual and quite brilliant Adam Roberts in The Literary Review It is a delightful introduction to his singularly riddling work and in Crumeyesque style it is an intermezzo that doubles as an overture Stuart Kelly in The Scotsman The Great Chain of Unbeing a book bursting with fertile fusions of ideas by this Scottish Borges The Sunday Herald

The Social Life of Trees Laura Rival, 2021-03-10 The passionate response of the British public to the Newbury Bypass is a revealing measure of how strongly people feel about trees and the environment Similarly in the United States the giant sequoia of California is an enduring national symbol that inspires intense feelings As rainforests are sacrificed to the interests of multi national corporations and traditional ways of life disappear the status of forests the cultural significance of trees and the impact of conservation policies are subjects that have inspired intense engagement Why do people feel so strongly about trees With this explosion of interest in environmental issues a serious study of what trees mean to people has long been overdue This interdisciplinary book responds to this need by providing the first cross cultural analysis of tree symbolism Drawing on rich case studies contributors explore the processes through which trees are used as metaphors of identity and continuity Political struggles over forest resources feature prominently and the perceptions of

trees in various cultures provide telling insights into the ways in which human societies conceptualize nature As well as being a major contribution to the field of symbolic anthropology this comprehensive study will be essential reading for students in a wide range of courses and for anyone with a keen interest in the politics of ecology the occult and neo paganism and the history and sociology of environmentalism in its widest sense **The Tree of Life** Guillaume Lecoq, Hervé Le Guyader, 2006 Did you know that you are more closely related to a mushroom than to a daisy That dinosaurs are still among us That the terms fish and invertebrates do not indicate scientific groupings All this is the result of major changes in classification This book diagrams the tree of life according to the most recent methods of this system *The True Life* , 1890

The Future of Post-Human History Peter Baofu, 2012-03-15 Is history really so universalistic even when similar events happen in different contexts that as George Santayana 1905 once famously wrote those who cannot remember the past are condemned to repeat it This more universalistic view of history can be contrasted with an opposing view which is more relativistic in orientation as shown by the equally known remark by Winston Churchill that history is written by the victor to the extent that what is regarded as true in history today may not be so in another era when a new victor comes into power THEX 2011 So which of the two views is correct here Contrary to these opposing views and other ideas as will be discussed in the book history in relation to both universality and relativity is neither possible or impossible nor desirable or undesirable to the extent that the respective ideologues on different sides would like us to believe Of course this challenge to the opposing views about history does not suggest that the study of history is controversial at best or that those fields related to the study of history like political science economics military studies anthropology sociology psychology philosophy theology literature ethics and so on should be rejected too Needless to say neither of these extreme views is reasonable Rather this book offers an alternative better way to understand the future of history especially in the dialectic context of universality and relativity while learning from different approaches in the literature but without favoring any one of them or integrating them since they are not necessarily compatible with each other Instead this book offers a new theory that is the multifold theory of history to go beyond the existing approaches in a novel way If successful this seminal project is to fundamentally change the way that we think about history from the combined perspectives of the mind nature society and culture with enormous implications for the human future and what the author originally called its post human fate *The Supraconscience of Humanity* Edward H. Strauch, 2010-05-25 Humankind evolved through three psychological stages subconsciousness conscience and supraconscience Ritual and myth cosmology and theism marked phases of psychic integration initiating our supraconscience evolution Four archetypes temperance the great chain of being Biblical interpretation and Divinity became the Cosmic consciousness of secular man Study of Scripture developed a communal supraconscience Mystics dedication showed us the deeper meaning of a life purpose Yet heretics taught man faith in the superior power of the free mind Heresy helped evolve humanity's secular supraconscience Indeed the exponential growth of psyche's powers and the continuous

revelation of new secular knowledge seems the fulfillment of Revelation Finally the enlightened understood that when God created the earth he included evolution so that our kind would evolve a superior nature Hence religious and scientific secular and humanistic developments reveal themselves to be the primary powers accelerating human evolution Together they have nurtured humankind s ever evolving supraconscience **"Life, the Universe, and Everything"** Ric Machuga, 2012-03-29

No philosophical idea no matter how small can live alone Ideas always gain their force power and life from their surroundings their ecosystem The ecosystem of ideas defended in this book comes from the ancient Greek philosopher Aristotle and his medieval interpreter Thomas Aquinas The ongoing relevance of their philosophical thought to twenty first century issues is opened up in fascinating ways in this book Life the Universe and Everything is the product of thirty years of teaching introductory courses in philosophy Assuming no prior background it only requires of readers an enquiring mind and a willingness to think carefully An ideal guide to the big questions we face
