edition published in 1996 In 700 entries the second edition provides thorough coverage to historical archaeology the development of archaeology as a field of study and the way the discipline works to explain the past In addition to these theoretical entries other entries describe the major excavations discoveries and innovations from the discovery of the cave paintings at Lascaux to the deciphering of Egyptian hieroglyphics and the use of luminescence dating Recent developments in methods and analytical techniques which have revolutionized the ways excavations are performed are also covered as well as new areas within archeology such as cultural tourism and major new sites which have expanded our understanding of prehistory and human developments through time In addition to significant expansion first edition entries have been thoroughly revised and updated to reflect the progress that has been made in the last decade and a half Cahokia Mounds William Iseminger, 2010-03-03 About one thousand years ago a phenomenon occurred in a fertile tract of Mississippi River flood plain known today as the American Bottom This phenomenon came to be called Cahokia Mounds America's first city Interpreting the rich heritage of a site like Cahokia Mounds is a balancing act the interpreter must speak as a scholar to the general public on behalf of an entirely different civilization Since even those three groups are splintered into myriad dialects of perspective sometimes it is hard to know what language to use But William Iseminger's work at the site has given him nearly four decades of practice in Cahokia Conversation 101 and he tells the story of the place and its ancient culture as well as its place in contemporary culture with the clarity and confidence of a native speaker An Archaeology of the Cosmos Timothy R. Pauketat, 2013 An Archaeology of the Cosmos seeks answers to two fundamental questions of humanity and human history The first question concerns that which some use as a defining element of humanity religious beliefs Why do so many people believe in supreme beings and holy spirits The second question concerns changes in those beliefs What causes beliefs to change Using archaeological evidence gathered from ancient America especially case material from the Great Plains and the pre-Columbian American Indian city of Cahokia Timothy Pauketat explores the logical consequences of these two fundamental questions Religious beliefs are not more resilient than other aspects of culture and society and people are not the only causes of historical change An Archaeology of the Cosmos examines the intimate association of agency and religion by studying how relationships between people places and things were bundled together and positioned in ways that constituted the fields of human experience This rethinking theories of agency and religion provides readers with challenging and thought provoking conclusions that will lead them to reassess the way they approach the past Cahokia Sally A. Kitt Chappell, 2002-02-15 At the turn of the last millennium a powerful Native American civilization emerged and flourished in the American Midwest By A.D. 1050 the population of its capital city Cahokia was larger than that of London Without the use of the wheel beasts of burden or metallurgy its technology was of the Stone Age yet its culture fostered widespread commerce refined artistic expression and monumental architecture The model for this urbane world was nothing less than the cosmos itself The climax of their ritual center was a four-tiered pyramid covering fourteen acres rising a hundred feet into the sky the

tallest structure in the United States until 1867 This beautifully illustrated book traces the history of this six square mile area in the central Mississippi Valley from the Big Bang to the present Chappell seeks to answer fundamental questions about this unique yet still relatively unknown space which was designated a UNESCO World Heritage Site in 1982 How did this swampy land become so amenable to human life Who were the remarkable people who lived here before the Europeans came Why did the whole civilization disappear so rapidly What became of the land in the centuries after the Mississippians abandoned it And finally what can we learn about ourselves as we look into the changing meaning of Cahokia through the ages To explore these questions Chappell probes a wide range of sources including the work of astronomers geographers geologists anthropologists and archaeologists Archival photographs and newspaper accounts as well as interviews with those who work at the site and Native Americans on their annual pilgrimage to the site bring the story up to the present Tying together these many threads Chappell weaves a rich tale of how different people conferred their values on the same piece of land and how the transformed landscape in turn inspired different values in them cultural spiritual agricultural economic and humanistic
