human crania of low type and possibly of great geological antiquity prompt action was taken Doctor Hrdlicka an accomplished student of human osseous remains was sent to Lincoln to examine the peculiar remains and to make such investigations regarding the conditions under which they were discovered as he might find possible at that season of the year When this discovery was announced the Bureau was about to send to press a paper by Doctor Hrdlicka embodying descriptions of all the known American human remains for which geological antiquity had been claimed This paper was withheld from publication however until the Nebraska specimens could be examined so that the present bulletin includes descriptions of these as well as of all kindred remains brought to light in North America up to the present time About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at www.forgottenbooks.com This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works SKELETAL REMAINS SUGGESTING OR Ales 1869-1943 Hrdlicka, 2016-08-29 This work has been selected by scholars as being culturally important and is part of the knowledge base of civilization as we know it This work was reproduced from the original artifact and remains as true to the original work as possible Therefore you will see the original copyright references library stamps as most of these works have been housed in our most important libraries around the world and other notations in the work This work is in the public domain in the United States of America and possibly other nations Within the United States you may freely copy and distribute this work as no entity individual or corporate has a copyright on the body of the work As a reproduction of a historical artifact this work may contain missing or blurred pages poor pictures errant marks etc Scholars believe and we concur that this work is important enough to be preserved reproduced and made generally available to the public We appreciate your support of the preservation process and thank you for being an important part of keeping this knowledge alive and relevant **Science** John Michels (Journalist), 1907 Vols for 1911 13 contain the Proceedings of the Helminthological Society of Washington ISSN 0018 0120 1st 15th meeting
