Assistive

Technology and Universal Design for Learning Kim K. Floyd, Tara Jeffs, Kathleen S. Puckett, Assistive Technology and Universal Design for Learning Toolkits for Inclusive Instruction is an innovative textbook on instructional and assistive technology. Designed for both undergraduate and graduate teaching programs, student readers can expect to gain a thorough understanding of how assistive technology and UDL can be integrated into educational settings. This text delves into data analytics platforms for analyzing student behavior, learning management systems for facilitating communication, and software emphasizing UDL. Students will learn how to create accessible environments and systems while also focusing on multiple means of representation, engagement, and expression to accommodate all learners. With a developmental focus that supports learners across intellectual, sensory, and motor challenges, this text will serve as a valuable guide on how these technologies can be utilized to effectively transform the classroom and revolutionize education.

Key Features: Infuses assistive technology and UDL. Includes a unique chapter on distance education, behavior, and emerging technologies. Has a developmental focus that supports learners across intellectual, sensory, and motor challenges. Toolkits that include resources, strategies, and instructional methods to equip readers to foster an inclusive classroom environment across content areas. Learning Outcomes at the beginning of each chapter to provide clear direction for navigating the content. Chapter summaries that support understanding of key concepts. Chapter activities that support integrating technology within the curriculum. Glossary with definitions of key terminology.

Information Technology for Education, Science, and Technics Emil Faure, Yurii Tryus, Tero Vartiainen, Olena Danchenko, Maksym Bondarenko, Constantine Bazilo, Grygoriy Zaspas, 2024-10-07. This book explores issues related to information and communication technology in management and higher education, intelligent computing, and information security. In this book, the authors investigate various aspects of information and communication technology and systems, their development, and applications in education, science, and management. The authors develop new models, methods, and approaches for digital transformation in management processes, including digital project management, intelligent systems, particularly those that deploy artificial intelligence, data protection, and reliability. A part of this book is devoted to the application of information and communication technology in higher education to ensure the process of digital transformation in higher education institutions. The book is of interest to experts in the field of information and communication technology and systems, project managers, scientists, and Ph.D. students.
