Special Libraries and Information Centers Ellis Mount, 1995 Special Libraries and Information Centers Ellis Mount, 1983 **Special Libraries as Knowledge Management Centres** Eva Semertzaki, 2011-06-24 This book focuses on the role of special libraries as knowledge management centres in their organisations. It describes the work of a special library and the special library draws on the characteristics that make the nucleus of collecting and organising knowledge which is used for the benefit of the institution. By acquiring and sharing knowledge staff will enhance the intellectual capital of the institution. Traditionally libraries are the information centres that organise and classify information. Further on they are the proper places to create human networks and to organise the knowledge hidden in the minds of the staff. This book also examines methods to prove the value of a special library for the parent organisation when it becomes the centre to gather knowledge. Draws on the characteristics that make a special library necessary for an organisation. Shows the importance of knowledge management in an organisational environment. Provides ways to persuade the management of an organisation that the special library is the proper centre for knowledge management. *World Guide to Library, Archive, and Information Science Associations* Marko Schweizer, 2011-12-22 This handbook provides thorough up to date information on associations concerned with the fields of librarianship, documentation, information science and archives. Hoffman, 2019-08-05 Libraries organize their collections to help library users find what they need. Learning about the organization of library collections can be challenging. Libraries have a long history of organizing their collections; there are many principles, models, standards and tools used to organize collections and theory and practice are changing constantly. Written for beginning library science students, *Organizing Library Collections: Theory and Practice* introduces the theory and practice of organizing library collections in a clear, straightforward and understandable way. It explains why and how libraries organize their collections and how theory and practice work together to help library users. It introduces basic cataloging and metadata.
