Species Of Mind:

Species of Mind Colin Allen, Marc Bekoff, 1999-07-26 The heart of this book is the reciprocal relationship between philosophical theories of mind and empirical studies of animal cognition Colin Allen a philosopher and Marc Bekoff a cognitive ethologist approach their work from a perspective that considers arguments about evolutionary continuity to be as applicable to the study of animal minds and brains as they are to comparative studies of kidneys stomachs and hearts Cognitive ethologists study the comparative evolutionary and ecological aspects of the mental phenomena of animals Philosophy can provide cognitive ethology with an analytical basis for attributing cognition to nonhuman animals and for studying it and cognitive ethology can help philosophy to explain mentality in naturalistic terms by providing data on the evolution of cognition This interdisciplinary approach reveals flaws in common objections to the view that animals have minds The heart of the book is this reciprocal relationship between philosophical theories of mind and empirical studies of animal cognition All theoretical discussion is carefully tied to case studies particularly in the areas of antipredatory vigilance and social play where there are many points of contact with philosophical discussions of intentionality and representation Allen and Bekoff make specific suggestions about how to use philosophical theories of intentionality as starting points for empirical investigation of animal minds and they stress the importance of studying animals other than nonhuman primates The Animal Mind Kristin Andrews, 2014-10-30 The study of animal cognition raises profound questions about the minds of animals and philosophy of mind itself Aristotle argued that humans are the only animal to laugh but in recent experiments rats have also been shown to laugh In other experiments dogs have been shown to respond appropriately to over two hundred words in human language In this introduction to the philosophy of animal minds Kristin Andrews introduces and assesses the essential topics problems and debates as they cut across animal cognition and philosophy of mind She addresses the following key topics what is cognition and what is it to have a mind What questions should we ask to determine whether behaviour has a cognitive basis the science of animal minds explained ethology behaviourist psychology and cognitive ethology rationality in animals animal consciousness what does research into pain and the emotions reveal What can empirical evidence about animal behaviour tell us about philosophical theories of consciousness does animal cognition involve belief and concepts do animals have a Language of Thought animal communication other minds do animals attribute mindedness to other creatures moral reasoning and ethical behaviour in animals animal cognition and memory Extensive use of empirical examples and case studies is made throughout the book These include Cheney and Seyfarth's vervet monkey research Thorndike's cat puzzle boxes Jensen's research into humans and chimpanzees and the ultimatum game Panksepp and Burgdorf's research on rat laughter and Clayton and Emery's research on memory in scrub jays Additional features such as chapter summaries annotated further reading and a glossary make this an indispensable introduction to those teaching philosophy of mind animal cognition It will also be an excellent resource for those in fields such as ethology biology and psychology Research

John Wyclif Stephen Edmund Lahey,2008-12-08 John Wyclif d 1384 has too frequently been described as Morning Star of the Reformation and only recently begun to be studied as a fourteenth century English philosopher and theologian This work draws on recent scholarship situating Wyclif in his fourteenth century milieu to present a survey of his thought and writings as a coherent theological position arising from Oxford s Golden Age of theology Lahey argues that many of Wyclif s best known critiques of the fourteenth century Church arise from his philosophical commitment to an Augustinian realism evocative of the thought of Robert Grosseteste and Anselm of Canterbury This realism is comprehensible in terms of Wyclif s sustained focus on semantics and the properties of terms and propositions a linguistic turn characterizing post Ockham philosophical theology Arising from this propositional realism is a strong emphasis on the place of Scripture in both formal and applied theology which was the starting point for many of Wyclif s quarrels with the ecclesiastical status quo in late fourteenth century England This survey takes into account both Wyclif s earlier philosophical works and his later works including sermons and Scripture commentary Wyclif s belief that Scripture is the eternal and perfect divine word the paradigm of human discourse and the definitive embodiment of truth in creation is central to an understanding of the ties he believes relate theoretical and practical philosophy to theology This connection links Wyclif s interest in the propositional structure of reality to his realism his hermeneutic program and to his agenda for reform of the Church Lahey s survey also highlights Wyclif s rejection of Bradwardine s determinism in favor of a model of human freedom in light of God s perfect foreknowledge and also explores the relation of Wyclif s spatiotemporal atomism to his rejection of transubstantiation This is the first book length comprehensive survey of Wyclif s thought and will be of interest to students of later medieval theology philosophy history and literature
