The Financialisation of Power Sarah Bracking, 2016-05-05 The financial crash of 2008 led people all over the world to ask how far financiers are in control of our lives To what extent does what they do with our money affect our everyday lives This book asks whether the crisis and subsequent use of public subsidies to help the international economy recover was a unique event or a symptom of a wider malaise where financiers have effectively usurped the power of governments and are running the political economy themselves The Financialisation of Power in Africa argues that growth is not always a good thing The development of more derivatives and faster financial exchanges are draining businesses of investment capital rather than serving to supply it applying financial logic does not save nature or protect biodiversity and other species This book outlines the concept of financialisation and how it has been used in various ways to explain the post 2008 crisis and global political economy. There is a particular focus on these issues in reference to Africa which has a particular dependence on international money It takes the perspective of the modern state exploring how the political economy of development actually works in relation to African governance This book is of interest to students of international development and political economy and is a key source for policy makers interested in African studies and economic development Disease in Early Modern England M. Healy, 2001-11-07 How did early modern people imagine their bodies What impact did the new disease syphilis and recurrent outbreaks of plague have on these mental landscapes Why was the glutted belly such a potent symbol of pathology Ranging from the Reformation through the English Civil War Fictions of Disease in Early Modern England is a unique study of a fascinating cultural imaginary of disease and its political consequences Healy s original approach illuminates the period s disease impregnated literature including works by Shakespeare Milton Dekker Heywood and others England's Time of Crisis: From Shakespeare to Milton David Morse, 1989-06-18 Many events of the divided society from Elizabeth I to Charles I were taken as an unmistakable sign that the world was entering its last days This text shows how pervasive was this pessimistic mood and how powerfully it affected English writing from Shakespeare to **The Making of London** S. Groes, 2015-12-04 London has become the focus of a ferocious imaginative energy Milton since the rise of Thatcher The Making of London analyses the body of work by writers who have committed their writing to the many lives of a city undergoing complex transformations tracing a major shift in the representation of the capital city

1990s the ground floor display area was rearranged in 1995 so as to accommodate right at the front of the store several hundred new titles on topics like Serial Murderers and Sexual Crimes of the Twentieth Century I Several of these new books are companion volumes to movies on release in the city s cinemas or in some instances are simply the original text on which the movies are based The movies in question Shallow Grave Silence of the Lambs Reservoir Dogs Natural Born Killers and others focus heavily on interpersonal violence and murder and also place great emphasis in the manner of many earlier cinematic genres on the idea of the criminal mind not least as a way of dramatizing the detection of the originating criminal act but also to a significant extent these are movies which emphasize the idea and contemporary social presence of evil Similar moral and psychologistic preoccupations are now also widely apparent on primetime television most notably in Britain in the extraordinarily powerful Cracker series produced by Granada Television in 1994 and 1995 watched by over 15 million people and featuring inter alia the forensic investigation of serial and sexual murders some of them extremely graphically displayed Crace 1994 2 The prominence of Gothic themes in movies about violent death is not new in itself there is a long history of interest in the cinema in horror and indeed in transgression and evil What may be definitive about the present genre of movies as well as the range of fictional and non fictional titles in the bookstores about crime is the overwhelming focus on murder and killing represented in very contemporary and mundane ordinary and indeed respectable settings and the powerful suggestion that these movies are a representation of the risks and dangers involved in everyday life at the end of the twentieth century The bookstore display in Waterstones is straightforwardly called the Real Crimes section
