Spirit Of One Earth Reflections On Teilhard De Chardin And Global Spirituality:

Spirit of One Earth Ursula King, 1989 **The Phenomenon of Teilhard** David H. Lane, 1996 New Age writer of the popular Aquarian Conspiracy Marilyn Ferguson observed that many of the leading lights of the New Age movement claim Teilhard as one of the most influential persons in their lives Other influences acknowledged include C G Jung Aldous Huxley Swami Muktananda Thomas Merton Werner Erhard and Maharishi Yogi Indeed of the 185 New Age leaders surveyed Teilhard was the most frequently mentioned of any person who had most influenced their thinking If this is the case then if we are to understand the New Age movement properly it behooves us to take a careful and critical look at Teilhard de Chardin David Lane has done precisely this in a clear well documented and penetrating way In this crucial book David Lane lays bare the philosophical theological and scientific failures of Teilhard s New Age enterprise In a highly documented and insightful scrutiny of Teilhard s cosmic evolution Lane unveils the apostate Christian roots of one of the most important forerunners of the New Age movement This is one of the most significant and serious treatments of the modern roots of the New Age in print **Teilhard de Chardin and Eastern Religions** Ursula King, 2011 Teilhard de Chardin and Eastern Religions is in part an update of the 1980 classic *Toward a New Mysticism* Author Ursula King has extensively revised this work adding new material as she traces Teilhard s encounter with Eastern thought It includes an extensive bibliography and annotated study guide Book jacket

Pierre Teilhard De Chardin on People and Planet Celia Deane-Drummond, 2017-07-05 Humanity s relationship to nature is central to the work of Pierre Teilhard de Chardin an influential priest and scientist of the twentieth century Teilhard believed that spiritual development must be viewed alongside material development and that evolutionary theory lies at the heart of humanity s understanding of its place in the world Pierre Teilhard de Chardin on People and Planet argues that Teilhard s cosmic mysticism and intense interest in both cosmological and evolutionary sciences are highly relevant to current debates about how best to construct a meaningful spirituality The book offers a critical revision of Teilhard s thought in the light of current debates in evolutionary science ecology and environmental ethics The essays present fresh interpretations of Teilhard s work and point to the significance of his thought in the contemporary study of science and religion **Teilhard de Chardin** David Grumett, 2005 Pierre Teilhard de Chardin 1881 1955 has been regarded for too long as an esoteric thinker who evacuates theology by subjecting it to scientific theory There is an urgent need to reclaim him as a French catholic theologian with intellectual roots in the early twentieth century Teilhard s imaginative and inspiring work is grounded in the constructive use of biblical and patristic motifs and in his own life experiences of war exile and scientific endeavour From these he develops a distinctive philosophical theology which combines elements frequently assigned to the separate domains of philosophy of religion systematic theology and mysticism Teilhard provides a detailed theology of human embodiment and natural substances whilst his theories of human action passion vision and virtue offer suggestive resources to pastoral theology His evolutionary

cosmology and social democratic politics are discussed in their historical context and the significance of his work for the ongoing dialogue between science and religion is assessed *Spirit of Fire King*, Ursula ,2015-06-30 In the years since his death in 1955 the influence of Pierre Teilhard de Chardin renowned French Jesuit theologian mystic and scientist has continued to grow A true prophets of our age Teilhard helped bring Christian theology into creative dialogue with science articulated a new mysticism and explored profound dimensions of the human condition This biography is enhanced with scores of photographs that document his dramatic life from the trenches of World War I to his groundbreaking paleontological research in China and travels in the Gobi Desert It explores his difficulties with church authorities the posthumous publication of his writings and his ongoing legacy It is the ideal introduction to the life and thought of a man whose vision and spirituality speak ever more vitally to the concerns of our time Publisher's description *Teilhard De Chardin and Eastern Religions* U. M. King,1977 **Teilhard and the Future of Humanity** Thierry Meynard,2006 Fifty years after his death the thought of the French scientist and Jesuit Pierre Teilhard de Chardin 1881 1955 continues to inspire new ways of understanding humanity's future Trained as a paleontologist and philosopher Teilhard was an innovative synthesizer of science and religion developing an idea of evolution as an unfolding of material and mental worlds into an integrated holistic universe at what he called the Omega Point His books such as the bestselling *The Phenomenon of Man* have influenced generations of ecologists environmentalists planners and others concerned with the fate of the earth This book brings together original essays by leading experts who reflect on Teilhard's legacy for today's globalized world They explore such topics as the idea of God and the person quantum reality and Teilhard's vision spiritual resources for the future politics and economics and a charter for co evolution *From Teilhard to Omega* Ilia Delio,2014-01-09 Thirteen scholars including John F Haught Ursula King and John C Haughey SJ take off from where Teilhard de Chardin left off opening new windows to the divine mystery to the evolving person and to the new energies of love needed for the forward movement of life **Contemporary Spiritualities** Clive Erricker,Jane Erricker,2001-08-01 Spirituality can be understood within both a religious and secular context Fuelled by the controversy that surrounds different understandings of human identity and notions of progress knowledge and truth in modernist and postmodernist contexts the concept of spirituality is a hotly contested topic of debate as to its relevance within contemporary culture and its meaning within religious traditions This book aims to inform readers on this debate and contextualize it within these different frames of reference It approaches the topic of spirituality with an identification of the major influences on contemporary thinking and presents a coherent framework of understanding that links divergent thinking into a common goal Writings range across different thinkers and practitioners within established religious tradition contemporary movements and those who operate within psychological and secular understandings Focusing on the question what does it mean to be human this engaging study attempts to overcome the divide between secular and religious understandings of spirituality *The Intellectual Journey of Thomas Berry* Heather

Eaton,2014-04-02 Thomas Berry had a gentle yet mesmerizing and luminescent presence that was evident to anyone who spent time with him His intellectual scope and erudite manner were compelling and the breadth depth clarity and elegance of his vision was breathtaking Berry was an intellectual giant and cultural visionary of extraordinary stature Thomas Berry s vast knowledge of history religions and cultural histories is a unique blend revealing a genuine original thinker The ecological crisis in all its manifestations came to dominate Berry s concerns He perceived that the greatest need was to offer the possibility of a viable future for an Earth community Many know of his proposal for a functional cosmology the need for a new story and a vital Earth sensitive spirituality Few know of his rich and varied intellectual journey The Intellectual Journey of Thomas Berry Imagining the Earth Community is about the roots and insights hidden within his ecological spiritual proposal These essays written by experts on Thomas Berry s work probe into and reveal distinct themes that permeate his work in gratitude for his contribution to the Earth *Models, Measurement, and Metrology Extending the SI* William P.

Fisher, Jr.,Leslie Pendrill,2024-09-23 The book focuses on the extension of quality assured measurement and metrology into psychological and social domains This is not only feasible and achievable but also a pressing concern Significant progress in developing a common conceptual system for measurement across the sciences has been made in recent collaborations between metrologists and psychometricians as reported in the chapters of this book Modeling estimation and interpretation of objectively reproducible unit quantities that support both general comparability and adaptation to unique local circumstances are demonstrated in fields as diverse as artificial intelligence justice and beauty perception

The Gift of Being Zachary Hayes,2017-06-15 In view of the critical environmental problems confronting the modern world reflection on the nature and meaning of the world and on humanity s place in it becomes increasingly important While Christian theology has done this for centuries the present situation calls for a serious rethinking of many issues in the light of contemporary physics biology and cultural history The Gift of Being presents insights of the sciences in a way that is helpful for Christians today Creation theology helps believers come to a stronger sense of their own identity as they come to an awareness of the world This enables them to gain a deeper insight into how they ought to relate to that world if they wish to find meaning in their lives This state of being requires a willingness to distinguish between the medium and the message in approaching the Scriptures It also requires a willingness to take the sciences seriously In The Gift of Being Hayes focuses on traditional questions of creation but also comments on where science is with creation anthropology and destiny He begins by discussing the relation between faith and reason and hence between theology and science from a historical perspective moving to the most current statements of modern Popes He follows with a summary statement of the possible retrieval of the biblical religious insights that can be distinguished from the physical worldview that stands behind much of the biblical material This allows for a discussion of the traditional concept of creation from nothing in the form of a conversation with contemporary physics He then discusses the Christian idea of God as the primal mystery of creative love from whom all of creation flows

With these foundational ideas in place Hayes looks at such questions as the origin of humanity and the failure of humanity throughout history He then focuses on the tradition of cosmic Christology Finally the theological issues of the final outcome of God's creation and its history is discussed against the background of the current scientific projections of a future for the cosmos Chapters are Science the Bible and Christianity The Vision of the Hebrew Scriptures Creation and the Christian Scriptures Creation from Nothing The Triune God the Creator Humanity in the Cosmic Context Sin and Evil Christ and the Cosmos and Creation and the Future Zachary Hayes OFM PhD 1932 2014 was a professor of systematic theology at Catholic Theological Union He taught and wrote extensively on matters related to the theological understanding of creation and the relation between theology and science He was on the staff of the Chicago Center for Religion and Science He was the author of *Visions of a Future A Study of Christian Eschatology* from the New Theology Studies series published by The Liturgical Press

Teilhard's Struggle Duffy, SSJ, Kathleen, 2019-04-24 In 1919 the Jesuit scientist Pierre Teilhard de Chardin wrote a major essay *The Spiritual Power of Matter* which shaped his understanding of the role of struggle and conflict in evolution whether in the material or on the spiritual plane For Teilhard who labored to integrate the insights of evolution with his Catholic faith and who experienced ongoing conflicts with authorities in the church these insights continued to play out in the rest of his life Focusing on the meaning of his seminal essay for Teilhard's life Kathleen Duffy explores the major struggles that he experienced in his roles as scientist priest mystic friend and member of the church

Revives My Soul Again Lewis V. Baldwin, Victor Anderson, 2018-11-01 *MLK and the Practice of Spirituality* The scholarship on Martin Luther King Jr is seriously lacking in terms of richly nuanced and revelatory treatments of his spirituality and spiritual life This book addresses this neglect by focusing on King's life as a paradigm of a deep vital engaging balanced and contagious spirituality It shows that the essence of the person King was lies in the quality of his own spiritual journey and how that translated into not only a personal devotional life of prayer meditation and fasting but also a public ministry that involved the uplift and empowerment of humanity Much attention is devoted to King's spiritual leadership to his sense of the civil rights movement as a spiritual movement and to his efforts to rescue humanity from what he termed a perpetual death of the spirit Readers encounter a figure who took seriously the personal interpersonal and sociopolitical aspects of the Christian faith thereby figuring prominently in recasting the very definition of spirituality in his time King's holistic spirituality is presented here with a clarity and power fresh for our own generation

Christ in All Things King, Ursula, 2016-11-17

Offering both a concise introduction to the spiritual vision of the mystic and scientist Pierre Teilhard de Chardin and a fascinating survey of contemporary themes in spirituality through a Teilhardian lens this revised edition shows how Teilhard's perception of Christ in all things was the key to his holistic vision Teilhard Lexicon Sion Cowell,2004-06-01 Written to enable researchers and students to better understand the specialised language of Teilhard's transdisciplinary approach which he found himself compelled to develop as a means of expressing that extraordinary vision of a universe in process of convergence towards a cosmic centre of unity he identifies with the Cosmic Christ Teilhard's Proposition for Peace Jean Maalouf,2018-11-15 Teilhard de Chardin called the greatest prophet of this age intended to write a book called The Book of Peace though he failed to do so Instead he went on sowing the seeds of peace throughout his writings This book distills and presents the essence of the case Teilhard made for the cause of peace There is no doubt that Teilhard's readers have noticed how difficult his thought can be and how puzzling it appears at times This volume navigates the complexity of those labyrinthine roads inviting the reader to confidently see the basic unity which underlies all that is When we recognize that we live in the Divine Milieu where we witness the transforming presence of the divine in human consciousness we will existentially realize the truth of the principle by which Teilhard wanted us to live **Women and Spirituality** Ursula King,1993-07-21 Taking a critical look at feminism and exploring its explicit and implicit spiritual dimensions this revised and updated new edition of Women and Spirituality engages in a reflective dialogue with contemporary women's voices It asks to what extent patriarchal oppression and androcentric thinking are inherent not only in Christianity but in all religious beliefs practices and institutions This is the only book which provides a comprehensive survey of current discussions in feminist theology and spirituality and offers a wide ranging account of women and world religions and raising thought provoking questions about the spiritual dimensions of human life
