Spiritual Forces In International Politics:

Spiritual Forces in International Politics Robert Case Mowat, 1998-09-01 Hans J. Morgenthau's Theory of International Relations M. Neacsu, 2009-11-18 This book provides an innovative interpretation of Hans J Morgenthau's contribution to international relations and argues that the concepts of meaning power as meaning imposition disenchantment and re enchantment are central to Morgenthau's theory Religion in International Politics and Development J. A. Rees, 2011 This unique and fascinating book illustrates that in moving the research agenda forward despite whatever methodological pitfalls that may await in the attempt the dynamics of religion must now be considered to be of central and abiding importance in the study of world politics An illuminating case study of the World Bank's engagements with religion faith communities institutions and social movements provides insights into the current discourse on religion in international relations John A Rees argues that religion is of equal importance to other structures of international relations IR and questions where religion is operating in world politics rather than what religion is in an essential sense He constructs a new model for differentiating three distinct discourses of religion in the theory and practice of world politics which he applies to the IR sphere of international development and encourages new thinking in the field by answering conceptual and methodological challenges in religion research This book will prove an enlightening point of reference for academics and researchers in the fields of religion world politics international relations and development studies as well as for international organisations development theorists and practitioners working in conjunction with faith based organisations

Introduction to a Theory of Political Power in International Relations Zlatko Isakovic, 2019-07-16 This title was first published in 2000 An in depth look at the definition of power The writing is well crafted and very readable and comprises a range of theoretical deliberations and analysis of the numerous aspects of political power and its use in international relations This includes an examination of idea and structure population territory economics military the political system ideology and morale and its forms appearing in international relations in the past present and future influence and force This coupled with the author's gift for teasing out the pertinent points in an argument and using relevant and interesting examples provides an excellent piece of comprehensive insight into a theory of political power *Religious NGOs in International Relations* Karsten Lehmann, 2016-01-29 Over the last 30 years non governmental organizations NGOs have become increasingly present in international discourses and active in international decision making Among the estimated several million NGOs in existence today an increasingly visible number of organizations are defining themselves in religious terms referring to themselves as religious spiritual or faith based NGOs This book documents the initial encounters between the particularly international segment of those organizations and the UN while at the same time covering the Protestant and Catholic spectrum that dominated the early years of their activities in the UN context This book focuses on the construction of the human rights discourse inside two religiously affiliated organizations The Commissions of the

Churches on International Affairs CCIA and Pax Romana IMCS ICMICA These organizations have been formally accredited as NGOs by the UN label themselves as religious and look back upon a long and intense cooperation with the UN Lehmann presents material from the archives of those two organizations that has so far rarely been used for academic analysis In doing so as well as documenting the encounters between those organizations and the UN and looking at the Protestant and Catholic spectrum the book provides new insights into the very construction of the notions of the religious and the secular inside those organizations This work will be of great interest to all students of religion and international relations and will also be of interest to those studying related subjects such as global institutions comparative politics and international politics

Legitimising the Use of Force in International Politics Corneliu Bjola, 2009-09-10 This book aims to examine the conditions under which the decision to use force can be reckoned as legitimate in international relations Drawing on communicative action theory it provides a provocative answer to the hotly contested question of how to understand the legitimacy of the use of force in international politics The use of force is one of the most critical and controversial aspects of international politics Scholars and policy makers have long tried to develop meaningful standards capable of restricting the use of force to a legally narrow yet morally defensible set of circumstances However these standards have recently been challenged by concerns over how the international community should react to gross human rights abuses or to terrorist threats This book argues that current legal and moral standards on the use of force are unable to effectively deal with these challenges The author argues that the concept of deliberative legitimacy understood as the non coerced commitment of an actor to abide by a decision reached through a process of communicative action offers the most appropriate framework for addressing this problem The theoretical originality and empirical value of the concept of deliberative legitimacy comes fully into force with the examination of two of the most severe international crises from the post Cold War period the 1999 NATO intervention in Kosovo and the 2003 US military action against Iraq This book will be of much interest to students of international security ethics international law discourse theory and IR Corneliu Bjola is SSHRC Postdoctoral Fellow with the Centre for Ethics at the University of Toronto and has a PhD in International Relations

A History of International Political Theory Hartmut Behr, 2009-12-18 Contemporary theory of international politics faces a twofold problem the critical engagement with legacies of national power politics in connection to 20th Century International Relations and the regeneration of notions of humanity This book contributes to this engagement by a genealogy of thoughts on war peace and ethics
