Drug and Alcohol Use Stanley Einstein,2013-06-29 This book is the outcome of the First International Congress on Drugs and Alcohol to be held in Israel Both the conference and this volume grew out of the need to overcome the specious man made barriers which continue to separate intervention plans and efforts in the broad field of substance use and misuse This need demands that all of us become aware not only of the differences which may separate our concerns but also of the similarities in our goals and endeavors We are obligated to draw together toward a common effort for the common good The conference was designed to facilitate the exploration of generic issues This volume is designed to document a variety of factors which are basic to the defining selection planning implementation and evaluation of substance use and misuse intervention This book is not a traditional proceedings volume Because the needs of a listening audience are quite different from those of the solitary reader and the roles of a workshop or plenary session participant are also dissimilar from those of the reader not all of the Congress presentations are included and the articles that are included have undergone major revisions Current intervention needs and options demand a broad spectrum of clearly defined roles for all who are or should be involved Hence these issues among others served as guidelines in the preparation of the revised articles

Spiritual Sensations Sarah K. Balstrup,2020-09-17 The secular pluralist culture of the West encourages a subjective approach to spiritual truth where stimulating emotional experiences such as those provided by film can contribute to personal conceptions of the sacred Examining Stanley Kubrick's 2001 A Space Odyssey 1968 as the principal case study and Gaspar Noé's Enter the Void 2009 and Lars von Trier's Melancholia 2011 as comparative examples Sarah Balstrup argues that these directors harness the affective properties of film to generate altered states of perception in a manner analogous to religious practice Powerful feelings of dissociation and indescribable significance typical of mystical testimony appear in viewer responses to these films demonstrating the continued sacralisation of such states of mind In their own way each film confronts the viewer with an

apocalyptic revelation of the impersonal forces of the universe moving away from personhood and the human narrative into pure sensation They present a non deterministic spiritual truth that can be intuited but not explained mirroring developments in the religious sphere Investigating the relationship between cinematic technique and religious experience *Spiritual Sensations* offers an alternative approach to the study of religion and film that has been principally focused on narrative symbolism and the dramatisation of values *Spiritual Sensations* makes a further contribution to the field by analysing films contextually considering viewers subjective responses in light of religious and cultural change
