Future Faith Graeme Smith,Andrew Todd,2024-12-30 Future Faith Public and Practical Theologies for the Contemporary World explores what is needed for theology to survive and thrive in the next generation As well as declining student numbers and pressures on university theology departments churches are increasingly questioning the value of theological study The volume addresses the need for innovative responses to this crisis which re evaluate the place of theological study in the ecclesial academic social and cultural landscape Focusing on the UK it brings together leading scholars in public and practical theology from the academy and the churches Contributors engage in particular with the insights and work of Professor Stephen Pattison It is argued that the future of contemporary theology lies in its ability to contribute to modern life in practical and public ways If theology is to have a future it must be relevant in the workplace in public institutions and in public life The chapters consider the methodological innovations required for theology to have such a future and investigate specific examples of the practical expressions of a future theology in some important contemporary settings Public theology professional life and chaplaincy are the three key areas in which the outward facing nature of theological reflection is explored and developed Future Faith will be of particular interest to scholars and students working in these spheres

Transforming Enterprise? Andrew Yancey,2020-03-25 How does Christian faith integrate with capitalism This question has been at the heart of Christian ethics for more than three hundred years but rarely as complex and important as now The polarizing influence of consumer capitalism has extended into virtually every domain of human life On the one hand capitalism has contributed to increases in standards of living and life expectancy especially among those in extreme poverty On the other it has exacerbated income inequality environmental damages and social displacement For contemporary American evangelical theology this is problematic It has long been on a quest to show that Christian faith harmonizes with capitalistic enterprise But can faith harness the transformational power of consumer capitalism without being affected by its excesses For many the election of Donald Trump as president has revealed a great divide within American evangelicalism about the links between Christianity economic power and moral character Working from the field of academic practical theology in interdisciplinary dialogue with business management ethics Transforming Enterprise shows why and how a reframing of the relationship between Christian faith and capitalistic enterprise is needed in the contemporary postsecular milieu
