Splash And Flow:

Aerodynamic Stability and Control/wind Tunnel Data Correlation G. R. Casteel,1971 The general objective was to collect and analyze aerodynamic stability and control data for the XV 4B XV 5A and P 1127 VTOL configurations Correlation and analysis of existing model data were made to investigate hover and transition characteristics Particular emphasis was placed on the aerodynamic power effects sometimes referred to as interference effects Other areas of investigation were sometimes referred to as interference effects Other areas of investigation were nondimensional coefficients used to present VTOL data and wind tunnel test techniques Wind tunnel tests were conducted using an inlet only model and a jet only model to investigate special test and analysis problems for these components The agreement between different sets of XV 4B model data was in general found to be poor However the nondimensional coefficients used by Lockheed to reduce to XV 4B model data appear to be valid parameters for this category of VTOL airplane The jet entrainment flow was shown by experiment to be the primary cause of the XV 4B power effects and the XV 4B jet path was experimentally and theoretically determined

Thermal Engineering of Nuclear Power Stations Charles F. Bowman,Seth N. Bowman,2020-06-07 Thermal Engineering of Nuclear Power Stations Balance of Plant Systems serves as a ready reference to better analyze common engineering challenges in the areas of turbine cycle analysis thermodynamics and heat transfer The scope of the book is broad and comprehensive encompassing the mechanical aspects of the entire nuclear station balance of plant from the source of the motive steam to the discharge and or utilization of waste heat and beyond Written for engineers in the fields of nuclear plant and thermal engineering the book examines the daily practical problems encountered by mechanical design system and maintenance engineers It provides clear examples and solutions drawn from numerous case studies in actual operating nuclear stations *Progress Report* Jet Propulsion Laboratory (U.S.),1959 *Surface Characteristics of Roadways* W.
