Language, Corpora, and Technology in Applied Linguistics Muhammad Afzaal, Swaleha Bano Naqvi, Geng Qiang, 2023-11-27 As culture and society has become more digitalized especially when computer science and digital technologies have entered a new era in the twenty first century translation studies began to utilize a wide range of tools to enhance its reading of texts and contexts without which translation both as a practice and as a theorization could barely persist It has become more apparent that two extreme poles between macro and micro visions have formed the diversified terrains of translation studies On the one hand technologies like NLP topic modeling network analysis and data visualization make distant reading become possible thus allowing us to

have a paradigmatic view of how human s ideas beliefs values knowledge and even emotions have spread in some patterns across cultural geographical and language divides in world history On the other hand corpus methods such as the use of keywords collocates and concordance lines changed the way by which texts were closely read from linear to vertical With microscope like corpus tools we could go deeper into the texture for perception of nuanced meaning While considering a fact that translation is seldom mono modal in conveying meaning we have to reconceptualize context as a multimodal environment where audio visual and other resources interact to convey and make meaning With regard to the fast development of digital technology translation studies take an active role in gaining an enhanced capability in promoting transformation Complexity has been favored in terms of theoretical framework and methodology New questions are asked old ones revisited with novel tools but more areas wait to be cultivated and more questions to be approached by combining quantitative and qualitative methods We could ask if digital technologies would bring new innovation to study of translation history a heavily walled land for traditional humanists who tend to repeat so what to question the less significance of data driven studies The idea of high quality machine translation has become so realistic in today s market that translation educators have to face the shock wave it brought to translation learners and practitioners and rethink the relation between human translators and algorithms Machine translation assisted communication could help remove boundaries for better communication but at the same time it also creates conflicts and leads to confrontation Thus understood it is imperative to give a concerned attention to digital translation studies that is to study translation by resorting to and drawing on the digital technologies This Research Topic is intended to promote current directions and new developments in cross disciplinary critical discourse research We welcome papers which from a critical analytical perspective deal with contemporary social scientific political economic or professional discourses and genres Papers addressing the highlighted topics are especially welcome In giving weight to these topics we wish to call to attention some of the most pressing problems currently facing the world

Learning, Keeping, and Using Language M.A.K. Halliday,John Gibbons,Howard Nicholas,1990-01-01 This volume contains selected papers from the Eight World Congress of Applied Linguistics held in Sydney in 1987 Volume I starts off with an overview of the field by G Richard Tucker in which he identifies two areas innovative language education and language education policy The overall focus of the papers to follow focus on the individual language learner how that individual in given contexts or in interaction with specific others develops a command of a first language of two or more first languages or of a second language in home and in classroom settings At the same time cutting across these variables there is a gradual shifting of attention from investigations of the language learning process to proposals for language teaching curricula and syllabuses *The Cambridge Companion to Benjamin Britten* Mervyn Cooke,1999-06-28 The Cambridge

Companion to Benjamin Britten is a comprehensive guide to the composer's work aimed both at the non specialist and music student. It sheds light on both the composer's stylistic and personal development offering new interpretations of his operatic works and discussing his characteristic working methods. Topics treated here in detail for the first time include Britten's work in the cinema in the 1930s, his lifelong pacifism and his strong interest in the music of the Far East. Other chapters include reassessments of his relationship with W. H. Auden and his attitude towards childhood. Comprehensive analyses of major works and a concise history of the Aldeburgh Festival. A distinguished team of contributors include some who worked with the composer during his lifetime as well as leading representatives of the younger generation of Britten scholars on both sides of the Atlantic.

Computational Linguistics and Intelligent Text Processing Alexander Gelbukh, 2018-10-09. The two volume set LNCS 10761/10762 constitutes revised selected papers from the CICLing 2017 conference which took place in Budapest, Hungary, in April 2017. The total of 90 papers presented in the two volumes was carefully reviewed and selected from numerous submissions. In addition, the proceedings contain 4 invited papers. The papers are organized in the following topical sections: Part I: general morphology and text segmentation, syntax and parsing, word sense disambiguation, reference and coreference resolution, named entity recognition, semantics and text similarity, information extraction, speech recognition, applications to linguistics and the humanities; Part II: sentiment analysis, opinion mining, author profiling and authorship attribution, social network analysis, machine translation, text summarization, information retrieval and text classification, practical applications.

Stability and Variation in Hopi Song George List, 1993. The Hopi are the westernmost group of the Pueblo Indians of the southwestern U.S. They live on a high, dry plateau in northern Arizona and have been a sedentary agricultural people. This study establishes the stylistic parameters of song in a particular culture. Author List determines what is meant when a Hopi person states that two or more performances are those of the same song. To what extent can speech sounds, pitches and durational values or the forms of which they are the constituents differ and the performances still be considered to be those of the same song? List transcribed and compared 8 recordings of performances of a particular kachina dance song and 11 recordings of performance of a particular lullaby made from 1903 to 1984.

Assessing L2 Listening Gary J. Ockey, Elvis Wagner, 2018-08-08. This book is relevant for language testers, listening researchers and oral proficiency teachers in that it explores four broad themes related to the assessment of L2 listening ability: the use of authentic real world spoken texts; the effects of different speech varieties; of listening inputs; the use of audio-visual texts; and assessing listening as part of an interactive speaking-listening construct. Each theme is introduced with a review of the relevant literature and then is examined through either two or three empirical studies. The notion of authenticity underlies each of these four themes. By creating more authentic test tasks that are similar to real world language tasks, test developers can create listening assessments that not only more effectively assess test takers' communicative competence but can also
