Biobibliographical Studies adds significantly to the corpus of scholarship on geography's multiple histories and biographies with nine essays on figures from Britain France the USA and Spain Each was distinguished in his or her own scholarship and made distinctive contributions in specific fields as historical political or population geographers and in one case as a hydrologist geomorphologist The subjects also shared a commitment to the educational benefits of geography and of geographical research that was rooted in a vision of geography as socially illuminating and individually life changing Here is further rich testimony of the importance of geographers' lives to the lived experience of geography in practice Geography and Geographers Ron Johnston, James Sidaway, 2015-12-22 Explores the relationship between human and physical geography All chapters updated in the new edition to reflect new literature and changes in the discipline Chapter One systematically considers representations of geographical thought The closing chapter develops an explicit argument about what has made human geography distinctive Draws on a wide reading of the geographical literature produced during a fifty year period characterised by both growth in the number of academic geographers and substantial shifts in conceptions of the discipline's scientific rationale **Making Geography Matter** Noel Castree, Trevor Barnes, Jennifer Salmond, 2025-02-28 What is the purpose of Geography What do geographers study and why How do they seek to shape the world they interrogate This book addresses these questions by examining the lives and works of individual geographers both past and present Like all disciplines Geography is no more nor less than the collective endeavours of researchers and teachers operating in specific contexts The contexts both shape and are shaped by these individuals This book's biographical and autobiographical chapters transport readers to the times and places where geographers have sought to make Geography matter The result is a more vivid grounded understanding of the discipline than the many high level surveys of geographic thought paradigms currently written for university students This book's accessible essays each conclude with a study task Making Geography Matter is aimed at university students and their teachers who wish to understand the goals history and evolving practice of Geography It provides an alternative perspective both concrete and engaging to the many student focussed texts that map out numerous isms and ologies *The British Cyclopaedia of the Arts, Sciences, History, Geography, Literature, Natural History, and Biography ...*, 1838 Mentoring Geography Teachers in the Secondary School Grace Healy, Lauren Hammond, Steve Puttick, Nicola Walshe, 2022-02-27 Mentoring Geography Teachers in the Secondary School supports both new and experienced mentors in developing their knowledge and skills in mentoring in geography education Within the book chapter authors critically consider how mentoring has been conceptualised and represented in policy and academic debate as well as examining how mentoring in geography education has been experienced and perceived in practice Chapters in the book explore a range of perspectives experiences and aspects of mentoring geography teachers including Critical engagement with educational policy and practice Perspectives from beginning geography teachers Mentoring as a professional development opportunity The value of engaging with the geography education community in teacher education How

mentoring meetings and conversations can support beginning geography teachers in their growth and development This book is a vital source of support and inspiration for all those involved in developing the next generation of geography teachers The themes of justice agency and voice raised and engaged with implicitly and explicitly throughout this edited collection are of critical importance to mentors beginning teachers and geography education more broadly in developing and enacting a progressive vision of mentoring *Real Geography and Its Place in the Schools* Harold Wellman Fairbanks,1927

Geography of Loss Patti Digh,2013-12-23 This extraordinary book is borne of loss the loss of love of certainty and assuredness of knowing where we are or who we are of beauty and youth of health of life itself of privacy and of roles and of knowing When someone or something we love leaves us we suddenly walk alone into new territory without them We become strangers in new lands places where the landscape is unalterably changed where the center of gravity has somehow faltered and become weak making us feel as if we might fall off the surface of the earth Sometimes that moment of loss defines the rest of our lives becoming a center to our compass forever This unique book is a guidebook an atlas of those experiences of loss and grief a map for living through and into change and impermanence to moving on anew You are the navigator through the three main sections Embrace what is walk into your new landscape Honor what was be grateful for your old landscape Love what will be live into your future landscape Illustrated throughout with art submitted from around the world this book is an atlas of experience utilizing map imagery and the richly metaphoric evocative and functional language of geography to help you place yourself on your own journey to find your way through helpful exercises and an empathetic expert guide

is still at an early stage The relationship between the Gandh ran artists or workshops particular stone sources and specific sites is still unclear Addressing these and other questions this second volume of the Gandhara Connections project at Oxford University s Classical Art Research Centre presents the proceedings of a workshop held in March 2018 Its aim is to pick apart the regional geography of Gandh ran art presenting new discoveries at particular sites textual evidence and the challenges and opportunities of exploring Gandh ra s artistic geography
