The Guilty Environmentalist:

The Guilty Environmentalist Arthur O'Donnell, 2003 The Guilty Environmentalist is a collection of essays musings and political fantasies from award winning humorist and energy journalist Arthur O'Donnell Join the Guilty Environmentalist as he trips lightly through this exploration of the history and foibles of the electric utility industry from the very beginnings of the Age of Electricity to the aftermath of California's most recent energy crisis Selected from the best of the Bottom Lines columns carried in the nationally acclaimed California Energy Markets newsletter over the past decade The Guilty Environmentalist provides a unique and frequently hilarious perspective on a crucial industry that most people take for granted until the lights go out

The Skeptical Environmentalist Bjørn Lomborg, 2001 The Skeptical Environmentalist challenges widely held beliefs that the environmental situation is getting worse and worse The author himself a former member of Greenpeace is critical of the way in which many environmental organisations make selective and misleading use of the scientific evidence Using the best available statistical information from internationally recognised research institutes Bjørn Lomborg systematically examines a range of major environmental problems that feature prominently in headline news across the world His arguments are presented in non technical accessible language and are carefully backed up by over 2500 footnotes allowing readers to check sources for themselves Concluding that there are more reasons for optimism than pessimism Bjørn Lomborg stresses the need for clear headed prioritisation of resources to tackle real not imagined problems The Skeptical Environmentalist offers readers a non partisan stocktaking exercise that serves as a useful corrective to the more alarmist accounts favoured by campaign groups and the media

The Environmentalist's Dilemma Arno Kopecky, 2021-10-19 For readers of Ronald Wright Rebecca Solnit and Yuval Noah Harari comes a compelling inquiry into our relationship with humanity's latest and greatest calamity In The Environmentalist's Dilemma award winning journalist Arno Kopecky zeroes in on the core predicament of our times the planet may be dying but humanity's doing better than ever To acknowledge both sides of this paradox is to enter a realm of difficult decisions Should we take down the government or try to change it from the inside Is it okay to compare climate change to Hitler Is hope naive or indispensable How do you tackle collective delusion Should we still have kids And can we take them to Disneyland Inquisitive and relatable Kopecky strikes a rare note of optimistic realism as he guides us through the moral minefields of our polarized world From start to finish The Environmentalist's Dilemma returns to the central question How should we engage with the story of our times

Corporate Bodies and Guilty Minds William S. Laufer,2008-10-31 We live in an era defined by corporate greed and malfeasance one in which unprecedented accounting frauds and failures of compliance run rampant In order to calm investor fears revive perceptions of legitimacy in markets and demonstrate the resolve of state and federal regulators a host of reforms high profile investigations and symbolic prosecutions have been conducted in response But are they enough In this timely work William S Laufer argues that even with recent legal reforms corporate criminal law continues to be ineffective As evidence Laufer considers the failure of courts and legislatures to fashion liability rules that fairly attribute blame for organizations He analyzes the games that corporations play to deflect criminal responsibility And he also demonstrates how the exchange of

cooperation for prosecutorial leniency and amnesty belies true law enforcement But none of these factors according to Laufer trumps the fact that there is no single constituency or interest group that strongly and consistently advocates the importance and priority of corporate criminal liability In the absence of a new standard of corporate liability the power of regulators to keep corporate abuses in check will remain insufficient A necessary corrective to our current climate of graft and greed Corporate Bodies and Guilty Minds will be essential to policymakers and legal minds alike This timely work offers a dispassionate analysis of problems relating to corporate crime Harvard Law Review **The Psychology of**

Environmental Problems Susan M. Koger, Deborah DuNann Winter, 2011-01-07 This textbook demonstrates how eight major approaches in psychology can be applied to create a more sustainable society facing environmental threats It can be used as text in Ecological Psychology Environmental Science Education and Sustainability Sciences It is also a valuable resource for policymakers legislators and those working on sustainable communities Ecologies of Guilt in Environmental Rhetorics Tim Jensen, 2019-10-28 Environmental rhetorics have expanded awareness of mass extinction climate change and pervasive pollution yet failed to generate collective action that adequately addresses such pressing matters This book contends that the anemic response to ecological upheaval is due in part to an inability to navigate novel forms of environmental guilt Combining affect theory with rhetorical analysis to examine a range of texts and media Ecologies of Guilt in Environmental Rhetorics positions guilt as a keystone emotion for contemporary environmental communication and explores how it is provoked perpetuated and framed through everyday discourse In revealing the need for emotional literacies that productively engage our complicity in global ecological harm the book looks to a future where guilt and its symbiotic relationships with anger shame and grief is shaped in tune with the ecologies that sustain us Environmentalism in Popular Culture Noël Sturgeon, 2022-04-12 In this thoughtful and highly readable book Noël Sturgeon illustrates the myriad and insidious ways in which American popular culture depicts social inequities as natural and how our images of nature interfere with creating solutions to environmental problems that are just and fair for all Why is it she wonders that environmentalist messages in popular culture so often naturalize themes of heroic male violence suburban nuclear family structures and U S dominance in the world And what do these patterns of thought mean for how we envision environmental solutions like green businesses recycling programs and the protection of threatened species Although there are other books that examine questions of culture and environment this is the first book to employ a global feminist environmental justice analysis to focus on how racial inequality gendered patterns of work and heteronormative ideas about the family relate to environmental questions Beginning in the late 1980s and moving to the present day Sturgeon unpacks a variety of cultural tropes including ideas about Mother Nature the purity of the natural and the allegedly close relationships of indigenous people with the natural world She investigates the persistence of the myth of the frontier and its extension to the frontier of space exploration She ponders the popularity and occasional controversy of penguins and penguin family values and

questions assumptions about human warfare as natural The book is intended to provoke debates among college students and graduate students among their professors among environmental activists and among all citizens who are concerned with issues of environmental quality and social equality **Embracing Philanthropic Environmentalism** Will

Philosophy, Technology, and the Environment David M. Kaplan, 2017-02-24 Contributions by prominent scholars examining the intersections of environmental philosophy and philosophy of technology Environmental philosophy and philosophy of technology have taken divergent paths despite their common interest in examining human modification of the natural world Yet philosophers from each field have a lot to contribute to the other Environmental issues inevitably involve technologies and technologies inevitably have environmental impacts In this book prominent scholars from both fields illuminate the intersections of environmental philosophy and philosophy of technology offering the beginnings of a rich new hybrid discourse All the contributors share the intuition that technology and the environment overlap in ways that are

relevant in both philosophical and practical terms They consider such issues as the limits of technological interventions in the natural world whether a concern for the environment can be designed into things how consumerism relates us to artifacts and environments and how food and animal agriculture raise questions about both culture and nature They discuss among other topics the pessimism and dystopianism shared by environmentalists environmental philosophers and philosophers of technology the ethics of geoengineering and climate change the biological analogy at the heart of industrial ecology green products and sustainable design and agriculture as a bridge between technology and the environment Contributors Braden Allenby Raymond Anthony Philip Brey J Baird Callicott Brett Clark Wyatt Galusky Ryan Gunderson Benjamin Hale Clare Heyward Don Idhe Mark Sagoff Julian Savulescu Paul B Thompson Ibo van de Poel Zhang Wei Kyle Powys Whyte Modern American Environmentalists George A. Cevalco, Richard P. Harmond, 2009-04-27 Modern American Environmentalists profiles the lives and contributions of nearly 140 major figures during the twentieth century environmental movement Included are iconic environmentalists such as Rachel Carson E O Wilson Gifford Pinchot and Al Gore and important but less expected names including John Steinbeck and Allen Ginsberg The entries recount how each individual became active in environmental conservation detail his or her significant contributions trace the influence of each on future efforts and discuss the person's legacy The individuals selected for the book displayed either an unparalleled commitment to the conservation preservation restoration and enhancement of the natural environment or made a major contribution to the growth of environmentalism during its first century With a foreword by environmental historian Everett I Mendelsohn a time line of key environmental events a bibliography of groundbreaking works and an index organized by specialization this biographical encyclopedia is a handy and complete guide to the major people involved in the modern American environmental movement Mark Harvey Unique Environmentalism Gunnar Grendstad, Per Selle, Kristin Stromsnes, Oystein Bortne, 2006-11-28 their collective action The more unique the case the more we need to study it not only to understand the case itself but also to understand the structure and limits of environmentalism in general We hope that we have been able to show the value of this research strategy The way we have organized our study is different from the Rootes study 2003 This study emphasizes the importance of different environmental cultures and of political conjunctures in a single country of which different environmental groups take advantage We are not arguing against the fact that branches of environmentalism have features in common across countries e g animal rights and antinuclear movements However we would not go as far as the Rootes study We argue that looking at political conjunctures even if important does not tell the whole story Researchers need to understand the broader context in which political conjunctures and environmental culture operate
