Situating The History Of Science Dialogues With Joseph Needham:

Situating the History of Science Joseph Needham,1999 Contributed articles presented at a seminar at New Delhi in Sept 1996

Situating the History of Science Dhruv Raina,2001-06 The essays in this volume engage with the history of sciences outside the West and pay tribute to the work of Joseph Needham Informed by Needham s theory of the history of science the contributors of this volume critically examine both the originality of Needham s endeavour and the limitations in his theory of history In so doing their essays throw up a number of questions that relate to contemporary concerns within the history of sciences as well as multiculturalism

The Dialogue of Civilizations in the Birth of Modern Science A. Bala,2006-11-13 Arun Bala challenges Eurocentric conceptions of history by showing how Chinese Indian Arabic and ancient Egyptian ideas in philosophy mathematics cosmology and physics played an indispensable role in making possible the birth of modern science

A Practicum in TESOL Graham Crookes,2003-07-14 A Practicum in TESOL is a valuable source book for both teacher educators and classroom teachers It ranges widely across key areas of practice from the nitty gritty of lesson planning and classroom management through conceptual areas such as motivation and observation to crucial if more abstract aspects such as teachers beliefs and values It also delves into the moral and political dimensions of teaching Discussion of these areas though well grounded in relevant academic literatures is also supported by extensive quotes from real teachers working on their practice The treatment is sufficiently challenging to interest the experienced teacher while covering matters of basic practice that would be of concern to the beginner Anyone doing a TESOL practicum will want to use this book whether as an in service teacher or as a teacher longing to further their professional development A Practicum

in TESOL can be used individually or in groups

The Strides of Vishnu Ariel Glucklich, 2008-05-09 Books about Hinduism often begin by noting the immense size and complexity of the subject Hinduism is vast and diverse they say Or it doesn't exist at all Hinduism is merely a convenient and foreign term that masks a plurality of traditions In either case readers are discouraged by the thought that they are getting only a tiny sample or a shallow overview of something huge and uniquely difficult This book is designed to be accessible and sophisticated holding the reader's interest in the dynamic sequence of ideas through time and place Each of the 12 chapters combines historical material with key religious scientific and philosophical ideas supported by substantial quotations from scriptures and other texts Historic places and persons are fleshed out as actors in a narrative about the relation of the sacred to ordinary existence as it is mediated through arts sciences rituals and philosophical ideas Although many books introduce the Hindu tradition this is the first with a broad historical and cultural focus that emphasizes archaeological as well as textual evidence

India Romila Thapar, 2001 In this collection of essays edited and with an introduction by Romila Thapar fourteen of India's foremost scholars and specialists in various fields explore the challenges that lie before twenty-first century India in its quest for a democratic and just society Globalization and the IT revolution provide a new context to the problems faced by contemporary India But will globalization ensure rapid economic growth and development in the face of low literacy rising population and the gradual withdrawal of the State from social commitments Will imitation westernization and the consumerism that comes with it further a just society What are the strains that democracy will be subjected to in the empowerment struggle by marginalized groups and the growing social and economic disparities that are often accompanied by violence and terrorism How will India's multiculturalism be affected by the upsurge of various identities and of exclusionist nationalism Will the family as an institution be transformed to enhance gender justice Will new technology ensure the autonomy of the media Can the mauling of the Indian landscape be halted before India in the early decades of this millennium

Science for the Twenty-first Century Ana María Cetto, Unesco, 2000 This volume contains an edited selection of the materials lectures and debates presented at the World Conference on Science which took place in Budapest in 1999 Topics ranging from the value of fundamental research to the public perception of science and ethical issues are presented

Science Studies Meets Colonialism Amit Prasad, 2022-10-06 The field of science and technology studies has long critiqued the idea that there is such a thing as a universal and singular Science that exists independently of human society interpretation and action However the multiple significant ways in which colonial legacies impact and shape this project have often remained out of sight at the edges of the discipline In this important book Amit Prasad seeks to rectify this erasure demonstrating that problematic idealized imaginaries of science scientists and the scientific realm can be traced back to the birth of modern science during European colonialism Such visions of science and technology have undergirded the imagination of the West and thus of its others constructing hierarchies of technological innovation and scientific value but also unexpectedly leaving

society vulnerable to contemporary threats of misinformation and conspiracy theories as has been strikingly evident during the COVID 19 pandemic Far from being an indictment of STS this rigorous book seeks to highlight such concerns to make STS engage more carefully with issues of colonialism and thus to enable readers to understand the rapidly changing global topography of science and technology today and into the future **Popular Literature** Rupayan Mukherjee, Jaydip

Sarkar, 2022 This volume offers a selection of critical essays on texts that can be broadly categorized as popular literature In addition to critical readings of popular texts such as *The Jungle Book* and *The Hound of the Baskervilles* the book considers populist tendencies in literary classics like *Jane Eyre* and *Frankenstein* *Bomb, Book and Compass* Simon

Winchester, 2008-09-25 Before fate intervened Joseph Needham was a distinguished biochemist at Cambridge University married to a fellow scientist In 1937 he was asked to supervise a young Chinese student named Lu Gwei Djen and in that moment began the two greatest love affairs of his life Miss Lu and China Miss Lu inspired Needham to travel to China where he initially spent three dangerous years as a wartime diplomat He established himself as the pre eminent China scholar of all time firm in his belief that China would one day achieve world prominence By the end of his life Needham had become a truly global figure travelling endlessly and honoured by all though banned from America because of his politics And in 1989 after a fifty two year affair he finally married the woman who had first inspired his passion *The Magnificent Barbarian* is Simon Winchester at his best at once a magnificent portrait of one man's remarkable life and a riveting exploration of the country that so engaged him **East Asian Science, Technology, and Medicine**, 1999 *The New Cambridge History of Islam: Volume 4, Islamic Cultures and Societies to the End of the Eighteenth Century* Robert Irwin, 2010-11-04 Robert Irwin's

authoritative introduction to the fourth volume of *The New Cambridge History of Islam* offers a panoramic vision of Islamic culture from its origins to around 1800 The introductory chapter which highlights key developments and introduces some of Islam's most famous protagonists paves the way for an extraordinarily varied collection of essays The themes treated include religion and law conversion Islam's relationship with the natural world governance and politics caliphs and kings philosophy science medicine language art architecture literature music and even cookery What emerges from this rich collection written by an international team of experts is the diversity and dynamism of the societies which created this flourishing civilization

Volume four of *The New Cambridge History of Islam* serves as a thematic companion to the three preceding politically oriented volumes and in coverage extends across the pre modern Islamic world *Science and Praxis* Pietro Daniel Omodeo, Senthil Babu D., Claus Zittel, 2025-07-23 This volume addresses questions in the history of science and allied disciplines about the inseparable relation between science and politics Cases presented in the book shed light on the political conditions orientation and the consequences of science Together they articulate frames of inquiry in historical political epistemology Situated in the early modern historical context the volume draws attention to different political factors which shaped scientific practices and their ideologies Given the contested historiographies of the scientific revolution the critical

approach of this volume offers an invitation for further historical inquiries on the practices and politics of science

Brazilian Studies in Philosophy and History of Science Décio Krause, Antonio Videira, 2011-01-27 This volume The Brazilian Studies in the Philosophy and History of Science is the first attempt to present to a general audience works from Brazil on this subject The included papers are original covering a remarkable number of relevant topics of philosophy of science logic and on the history of science The Brazilian community has increased in the last years in quantity and in quality of the works most of them being published in respectable international journals on the subject The chapters of this volume are forwarded by a general introduction which aims to sketch not only the contents of the chapters but it is conceived as a historical and conceptual guide to the development of the field in Brazil The introduction intends to be useful to the reader and not only to the specialist helping them to evaluate the increase in production of this country within the international context

Imperial Technoscience Amit Prasad, 2014-03-14 A study of science and technology practices that shows how even emergent aspects of research and development remain entangled with established hierarchies In the last four decades during which magnetic resonance imaging MRI has emerged as a cutting edge medical technology and a cultural icon technoscientific imaginaries and practices have undergone a profound change across the globe Shifting transnational geography of technoscientific innovations is making commonly deployed Euro West centric divides such as west versus non west or innovating north versus non innovating south increasingly untenable the world is indeed becoming flatter Nevertheless such dualist divides which are intimately tied to other dualist categories that have been used to describe scientific knowledge and practice continue to undergird analyses and imaginaries of transnational technoscience Imperial Technoscience puts into broad relief the ambivalent and contradictory folding of Euro west centrism with emergent features of technoscience It argues Euro West centric historicism and resulting over determinations not only hide the vibrant albeit hierarchical transnational histories of technoscience but also tell us little about shifting geography of technoscientific innovations The book utilizes a deconstructive empirical approach to explore entangled histories of MRI across disciplines physics chemistry medicine etc institutions university hospitals industry etc and nations United States Britain and India Entangled histories of MRI it shows better explain emergence and consolidation of particular technoscientific trajectories and shifts in transnational geography of science and technology e g centers and peripheries

Pursuing the Unity of Science Harmke Kamminga, Geert Somsen, 2016-05-20 From 1918 to the late 1940s a host of influential scientists and intellectuals in Europe and North America were engaged in a number of far reaching unity of science projects In this period of deep social and political divisions scientists collaborated to unify sciences across disciplinary boundaries and to set up the international scientific community as a model for global political co operation They strove to align scientific and social objectives through rational planning and to promote unified science as the driving force of human civilization and progress This volume explores the unity of science movement providing a synthetic view of its pursuits and placing it in its historical

context as a scientific and political force Through a coherent set of original case studies looking at the significance of various projects and strategies of unification the book highlights the great variety of manifestations of this endeavour These range from unifying nuclear physics to the evolutionary synthesis and from the democratization of scientific planning to the utopianism of H G Wells s world state At the same time the collection brings out the substantive links between these different pursuits especially in the form of interconnected networks of unification and the alignment of objectives among them Notably it shows that opposition to fascism using the instrument of unified science became the most urgent common goal in the 1930s and 1940s In addressing these issues the book makes visible important historical developments showing how scientists participated in and actively helped to create an interwar ideology of unification and bringing to light the cultural and political significance of this enterprise

The Human Right to Science Cesare P. R. Romano, Andrea Boggio, Professor of Legal Studies Andrea Boggio, 2024 The Human Right to Science offers a thorough and systematic analysis of the right to science in all of its critical aspects Authored by experts in international law and science policy the book meticulously explores the right s origins development and normative content In doing so it uncovers previously unarticulated entitlements and obligations offering new insights on human rights interconnections *Astronomy in India, 1784-1876* Joydeep Sen, 2016-09-12 Indian scientific achievements in the early twentieth century are well known with a number of heralded individuals making globally recognized strides in the field of astrophysics Covering the period from the foundation of the Asiatick Society in 1784 to the establishment of the Indian Association for the Cultivation of Science in 1876 Sen explores the relationship between Indian astronomers and the colonial British He shows that from the mid nineteenth century Indians were not passive receivers of European knowledge but active participants in modern scientific observational astronomy
