

Statistical Process Control

TOOLS

A statistical process control app can automate much of your quality improvement efforts, but truly understanding how charts and other quality tools work will trend your product quality to new heights.

SIX SPC TOOLS

CONTROL CHARTS

This SPC staple is used to detect "special-cause variation" hidden from the view of operators.

CAUSE-EFFECT DIAGRAMS

Use "fishbone" diagrams to brainstorm about process relationships with shop floor staff and other team members.

FLOW CHARTS

A detailed visualization of the mfg. process itself, this chart alone can reveal the root of a problem.

HISTOGRAMS

Histograms illustrate process capability, enabling you to accurately set customer expectations.

PARETO CHARTS

A pareto chart ranks product defects, enabling you to prioritize the most important problems first.

SCATTER DIAGRAMS

Is a bottle product's diameter correlated to a machine's blow pressure? Scatter diagrams can answer questions like these.

A Practical Guide to Statistical Quality Improvement Michael R. Beauregard, Raymond J. Mikulak, Barbara A. Olson, 1992-01-09. A Practical Guide to Statistical Quality Improvement. Opening Up the Statistical Toolbox is designed as a reference guide for the engineer, supervisor, and manager. The intent of the text is to present conventional statistical quality improvement tools in a user-friendly form. We have worked to take some of the mystique out of the statistics and help others put these powerful tools to effective use in a Total Quality Management (TQM) environment. This isn't a text on TQM. TQM has three elements as shown in Figure 1.1: 1. Creating the environment, 2. The continuous improvement toolbox, 3. Employee empowerment. This text focuses almost exclusively on the middle element, the continuous improvement (CI) toolbox. Further, Opening Up the Statistical Toolbox does not present a complete set of tools intended to fill the CI toolbox; only the statistical tools and some of the basic team process tools are covered. The CI toolbox in reality will never get filled. A comprehensive toolbox will include extensive team process skills and technology-specific tools complementary to the statistical tools included here.
