Speaking with George Oppen Richard Swigg, 2014-01-10 Seventeen interviews with George and Mary Oppen conducted between 1968 and 1987 are here brought together for the first time Two are fresh discoveries while re audited recordings of other interviews have given a new authoritative accuracy to the text These conversations provide a unique account of a major American poet s evolution through the Depression war exile and a return to poetry after two decades of silence They span Oppen s early years as an Objectivist his assessments of such as Ezra Pound and William Carlos Williams and his views on the merits of his later contemporaries Allen Ginsberg Jerome Rothenburg and others Above all it is Oppen s detailed commentary on his own writing and his explanations of how individual poems unfold which gives special importance to these new collected interviews **Or Words to That Effect** Daniel F. Chamberlain, J. Edward Chamberlin, 2016-01-27 This volume raises questions about why oral celebrations of language receive so little attention in published literary histories when they are simultaneously recognized as fundamental to our understanding of literature It aims to prompt debate regarding the transformations needed for literary historians to provide a more balanced and fuller appreciation of what we call literature one that acknowledges the interdependence of oral storytelling and written expression whether in print pictorial or digital form Rather than offering a summary of current theories or prescribing solutions this volume brings together distinguished scholars conventional literary historians and oral performer practitioners from regions as diverse as South Africa the Canadian Arctic the Roma communities of Eastern Europe and the music industry of the American West in a conversation that engages the reader directly with the problems that they have encountered and the questions that they have explored in their work with orality and with literary history *Speaking Philosophically* Thomas Sutherland, 2023-03-23 Western philosophy has often claimed for itself not just a distinct sphere of knowledge but a distinct form of communication set against ordinary speech In *Speaking Philosophically* Thomas Sutherland proposes that for some philosophers authentic

The Voice in the Machine Roberto Pieraccini, 2012 An examination of more than sixty years of successes and failures in developing technologies that allow computers to understand human spoken language Stanley Kubrick s 1968 film 2001 A Space Odyssey famously featured HAL a computer with the ability to hold lengthy conversations with his fellow space travelers More than

forty years later we have advanced computer technology that Kubrick never imagined but we do not have computers that talk and understand speech as HAL did Is it a failure of our technology that we have not gotten much further than an automated voice that tells us to say or press 1 Or is there something fundamental in human language and speech that we do not yet understand deeply enough to be able to replicate in a computer In *The Voice in the Machine* Roberto Pieraccini examines six decades of work in science and technology to develop computers that can interact with humans using speech and the industry that has arisen around the quest for these technologies He shows that although the computers today that understand speech may not have HAL's capacity for conversation they have capabilities that make them usable in many applications today and are on a fast track of improvement and innovation Pieraccini describes the evolution of speech recognition and speech understanding processes from waveform methods to artificial intelligence approaches to statistical learning and modeling of human speech based on a rigorous mathematical model specifically Hidden Markov Models HMM He details the development of dialog systems the ability to produce speech and the process of bringing talking machines to the market Finally he asks a question that only the future can answer will we end up with HAL like computers or something completely unexpected

Telling the Story of Translation Judith Woodsworth, 2017-08-10 Scholars have long highlighted the links between translating and re writing increasingly blurring the line between translations and so called original works Less emphasis has been placed on the work of writers who translate and the ways in which they conceptualize or even fictionalize the task of translation This book fills that gap and thus will be of interest to scholars in linguistics translation studies and literary studies Scrutinizing translation through a new lens Judith Woodsworth reveals the sometimes problematic relations between author and translator along with the evolution of the translator's voice and visibility The book investigates the uses and abuses of translation at the hands of George Bernard Shaw Gertrude Stein and Paul Auster prominent writers who bring into play assorted fictions as they tell their stories of translations Each case is interesting in itself because of the new material analysed and the conclusions

reached Translation is seen not only as an exercise and fruitful starting point it is also a way of paying tribute repaying a debt and cementing a friendship Taken together the case studies point the way to a teleology of translation and raise the question what is translation for Shaw Stein and Auster adopt an authorial posture that distinguishes them from other translators They stretch the boundaries of the translation proper their words spilling over into the liminal space of the text in some cases they hijack the act of translation to serve their own ends Through their tales of loss counterfeit and hard labour they cast an occasionally bleak glance at what it means to be a translator Yet they also pay homage to translation and provide fresh insights that continue to manifest themselves in current works of literature By engaging with translation as a literary act in its own right these eminent writers confer greater prestige on what has traditionally been viewed as a subservient art
