Diabetes Solved Naturally Case Adams, 2024-01-24 This book disproves much of the conventional wisdom about type 1 and type 2 diabetes. Recent scientific research has proven there are a number of natural strategies shown to control blood sugar and sometimes even reverse diabetes, both type 1 and type 2. Yes, that's right. Scientific research done by doctors and universities has proven there are natural strategies that can control blood glucose, boost insulin production, and boost insulin sensitivity. That is what this book is all about. Explaining what really causes diabetes and what can be done about it according to the latest scientific research. Diabetes is surging at an unprecedented pace, resulting in millions of deaths and disabilities. What really causes diabetes? Can we make changes in our diets and lifestyle to better control our glucose? Are there herbs and superfoods that help our bodies control blood sugar? Are there lifestyle changes that can help reduce dependence on insulin? This book gives the clear answers based on hundreds of clinical studies from renowned researchers and doctors from around the world. This book also shows the evidence proving that a number of strategies can significantly reduce type 1 and type 2 diabetes symptoms and even turn around insulin production and sensitivity issues. On top of this, this book also lays out commonsense natural strategies that have been shown to significantly help glucose metabolism. This book is for diabetes beginners and veterans, for the public and for doctors. Here you will find specific information on the best diabetes diet and even information for making a diabetes logbook, and even can be used as a companion to a cookbook. The bottom line is our need for information based on science, not anecdotal information, this person's opinion, or that person's opinion, but hard scientific proof based on clinical studies. This book offers that kind of hard scientific evidence to a condition that has been the subject of anecdotal heresy. Get the facts and talk to your doctor about this evidence. You will be surprised what you find out.
