It charts the work done by the Command during its existence and highlights the arguments between the RAF and Army on this contentious issue in Britain. Much is known about the RAF both in the years preceding and during the Second World War particularly the exploits of Fighter Bomber and Coastal Commands yet the existence of the RAF's Army Cooperation Command is little known. Stalin's Revenge Anthony Tucker-Jones, 2009-07-19 In the summer of 1944 the Red Army crushed Army Group Centre in one of the largest offensives in military history Operation Bagration launched almost exactly three years after the Nazi invasion of the Soviet Union was Stalin's retribution for Hitler's Operation Barbarossa Earlier battles at Stalingrad and Kursk paved the way for Soviet victory but as Anthony Tucker Jones demonstrates in this fascinating study Bagration ensured that the Germans would never regain the strategic initiative In one fell swoop the Wehrmacht lost a quarter of its strength on the Eastern Front And in a series of overwhelming assaults the Red Army recaptured practically all the territory the Soviet Union had lost in 1941 advanced into East Prussia and reached the outskirts of Warsaw As he reconstructs this massive and complex battle Anthony Tucker Jones assesses the opposing forces and their commanders and gives a vivid insight into the planning and

decision making at the highest level He recreates the experience of the soldiers on the battlefield by using graphic contemporary accounts and he sets the Bagration offensive in the wider context of the Soviet war effort He also asks why Stalin's road to retribution proved to be such a long and bloody one for the Germans despite their crippling losses managed to resist for another ten months

To Defeat the Few Douglas C. Dildy, Paul F. Crickmore, 2020-07-09

This history based on an exhaustive study of German records explores The Battle of Britain through the eyes of the Luftwaffe

Over the past 80 years histories of the Battle of Britain have consistently portrayed the feats of The Few as they were immortalized in Churchill's famous speech as being responsible for the RAF's victory in the epic battle. However, this is only part of the story. The results of an air campaign cannot be measured in terms of territory captured, cities occupied, or armies defeated, routed, or annihilated. Successful air campaigns are those that achieve their intended aims or stated objectives. Victory in the Battle of Britain was determined by whether the Luftwaffe achieved its objectives. The Luftwaffe, of course, did not, and this detailed and rigorous study explains why. Analysing the battle in its entirety in the context of what it was, history's first independent offensive counter air campaign against the world's first integrated air defence system. Douglas C Dildy and Paul F Crickmore set out to re-examine this remarkable conflict. Presenting the events of the Battle of Britain in the context of the Luftwaffe's campaign and RAF Fighter Command's battles against it, this title is a new and innovative history of the battle that kept alive the Allies' chances of defeating Nazi Germany.

Slaughter on the Eastern Front Anthony Tucker-Jones, 2017-05-01 In the summer of 1941 a collective madness overtook Adolf Hitler and his senior generals. They convinced themselves that they could take on and defeat a superpower in the making, the Soviet Union. Foolishly, they thought in a swift campaign they could smash the Red Army and force Stalin to sue for peace despite dire warnings that Stalin was amassing a reserve army of more than 1 million men on the Volga. The end result would be such carnage that it would tear the German forces apart. In his major reassessment of the war on the Eastern Front, Anthony Tucker Jones casts new light on the brutal fighting, including such astounding German defeats as at Stalingrad, Kursk, Minsk, and finally Berlin. He controversially contends that from the very start, intelligence officers on both sides failed to influence their leadership, resulting in untold slaughter. He also reveals the shocking blunders by Hitler, Stalin, and even Churchill that led to the appalling needless destruction of Hitler's armed forces as early as the winter of 1941-42. Step by step, Tucker Jones describes how the German war machine fought to its very last against a relentless enemy, fully aware that defeat was inevitable.

Fall Gelb 1940 (1) Douglas C. Dildy, 2014-04-20 Never in the history of warfare has the clash between such great and apparently equal forces been decided so swiftly and conclusively as the German conquest of France and the Low Countries in May and June of 1940. Not deigning to spend itself against the extensive fortifications of France's Maginot Line, Hitler's Wehrmacht planned to advance its 136 of 157 divisions through Belgium and northern France in order to destroy the Allied forces there and gain territory from which to prosecute continued combat operations against France and England. Beginning on 10 May 1940, this title follows the fortunes of Heeresgruppe A as its three Panzer Korps moved stealthily through the dark, hilly, and thickly forested Ardennes in southern Belgium, before forcing a passage across the river Meuse and racing through France to the Channel in one of the most daring campaigns in history.

Air Power in the Age of Total War John Buckley, 2006-05-09 Warfare in the first half of the 20th century was fundamentally and irrevocably altered by the birth and subsequent development of air power. This work assesses the role of air power in changing the face of battle on land and sea.

Utilizing late 1990s research the author demonstrates that the phenomenon of air power was both a cause and a crucial accelerating factor contributing to the theory and practice of total war For instance the expansion of warfare to the homefront was a direct result of bombing and indirectly due to the extent of national economic mobilization required to support first rate air power status In addition the move away from the principle of total war with the onset of the Cold War and the replacement of air power by ICBMs is thoroughly examined This work should provide students of international history war studies defence and strategic studies with an insight into 20th century warfare World War II in Literature for Youth Patricia Hachten Wee,Robert James Wee,2004-11-10 This comprehensive volume provides a wealth of information with annotated listings of more than 3 500 titles a broad sampling of books on the war years 1939 1945 Includes both fiction and nonfiction works about all aspects of the war Professional resources for educators aligned to the educational standards for social studies technical references periodicals and electronic resources a directory of WWII museums memorials and other institutions and topics for exploration complement this excellent library and classroom resource
