Special Buildings New Architecture:

Modern Architecture Adam Sharr, 2018-11-15 Somewhere between 1910 and 1970 architecture changed. Now that modern architecture has become familiar, sometimes celebrated, sometimes vilified, it's hard to imagine how novel it once seemed. Expensive buildings were transformed from ornamental fancies which referred to the classical and medieval pasts into strikingly plain reflections of novel materials, functions, and technologies. Modern architecture promised the transformation of cities from overcrowded conurbations characterised by packed slums and dirty industries to spacious realms of generous housing and clean mechanised production set in parkland. At certain times and in certain cultures it stood for the liberation of the future from the past. This Very Short Introduction explores the technical innovations that opened up the cultural and intellectual opportunities for modern architecture to happen. Adam Sharr shows how the invention of steel and reinforced concrete radically altered possibilities for shaping buildings, transforming what architects were able to imagine, as did new systems for air conditioning and lighting. While architects weren't responsible for these innovations, they were among the first to appreciate how they could make the world look and feel different in connection with imagery from other spheres like modern art and industrial design. Focusing on a selection of modern buildings that also symbolize bigger cultural ideas, Sharr discusses what modern architecture was like, why it was like that, and how it was imagined. Considering the work of some of the historians and critics who helped to shape modern architecture, he demonstrates how the field owes as much to its storytellers as to its buildings.

Famous Buildings by Famous Architects Pasquale De Marco, 2025-04-09 Journey through the life and works of Eero Saarinen, architectural master whose designs continue to shape the world's landmarks. This book offers a comprehensive perspective on the Finnish American architect's legacy, shedding light on his unwavering dedication to modernism and his profound impact on the field. Saarinen's architectural prowess was rooted in his belief that form and function are intrinsically linked. He pursued this ideology with vigor, creating structures that transcended mere buildings and became symbols of innovation and aesthetic grace. His designs often drew inspiration from the natural world, resulting in organic forms that fostered a harmonious relationship between buildings and their surroundings. Beyond his architectural creations, Eero Saarinen was also a master of interior design. His furniture pieces, like the iconic Womb Chair and Tulip Chair, achieved legendary status for their sculptural forms and timeless elegance. These designs continue to adorn homes and offices worldwide, embodying a marriage of beauty and functionality. This book explores Sa

form and offers a comprehensive analysis of his most influential works including the iconic Trans World Center the Gateway Arch and the Dulles International Airport Through in depth research and expert insights this book provides a deeper understanding of Saarinen and his profound impact on the world of architecture Saarinen's legacy extends beyond his individual contributions His buildings have become cherished landmarks attracting visitors from across the globe His influence is evident in the works of countless architects who draw inspiration from his innovative spirit and unwavering commitment to modernism This book highlights the enduring relevance of Saarinen demonstrating how his principles and designs continue to inspire and shape modern architecture Delve into the life works and enduring legacy of Eero Saarinen of architectural genius who transformed the built world with his modernist vision This book is an essential guide for architects designers and enthusiasts of modernism providing a comprehensive study of one of the 20th century's most remarkable talents If you like this book write a review *Catalogue of the Loan Library* Royal Institute of British Architects.

Library, 1909 *France* Jean-Louis Cohen, 2014-08-15 Everyone knows Notre Dame the Eiffel Tower and the chateaux of the Loire Valley but French architects have also produced some of the most iconic buildings of the twentieth century playing a central role in the emergence and development of modernism In *France* Jean Louis Cohen presents a complete narrative of the unfolding architectural modernity in the country grappling not only with the buildings but also with the political and critical context surrounding them Cohen examines the developments in urban design and architecture within France depicting the continuities and breaks in French architecture since 1900 against a broader international background Describing the systems of architectural exchange with other countries including Italy Germany Russia and the United States he offers a new view on the ideas projects and buildings otherwise so often considered only from narrow nationalistic perspectives Cohen also maps the problematic search for a national identity against the background of European rivalries and France's colonial past Drawing on a wealth of recent research this authoritatively written book will challenge the way design professionals and historians view modern French architecture *Monumentalising Life in the Neolithic* Anne Birgitte Gebaer, Lasse Sørensen, Anne Teather, António Carlos Valera, 2020-09-30 One of the principal characteristics of the European Neolithic is the development of monumentality in association with innovations in material culture and changes in subsistence from hunting and gathering to farming and pastoralism The papers in this volume discuss the latest insights into why monumental architecture became an integral part of early farming societies in Europe and beyond One of the topics is how we define monuments and how our arguments and recent research on temporality impacts on our interpretation of the Neolithic period Different interpretations of Göbekli Tepe are examples of this discussion as well as our understanding of special landmarks such as flint mines The latest evidence on the economic and paleoenvironmental context carbon 14 dates as well as analytical methods are employed in illuminating the emergence of monumentalism in Neolithic Europe Studies are taking place on a macro and micro scale in areas as diverse as Great Britain Denmark Sweden Poland Germany the Dutch

wetlands Portugal and Malta involving a range of monuments from long barrows and megalithic tombs to roundels and enclosures Transformation from a natural to a built environment by monumentalizing part of the landscape is discussed as well as changes in megalithic architecture in relation to shifts in the social structure An ethnographic study of megaliths in Nagaland discuss monument building as an act of social construction Other studies look into the role of monuments as expressions of cosmology and active loci of ceremonial performances Also a couple of papers analyse the social processes in the transformation of society in the aftermath of the initial boom in monument construction and the related changes in subsistence and social structure in northern Europe The aim of the publication is to explore different theories about the relationship between monumentality and the Neolithic way of life through these studies encompassing a wide range of types of monuments over vast areas of Europe and beyond

Elements of Architecture Pierre von Meiss,2013-10-08 This internationally significant book analyzes architectural elements drawing general principles from the prevailing pluralism of architectural approaches Von Meiss expertly bridges the gap between history and contemporary work by pinpointing the constant factors that exist in all architecture A comprehensive analysis of the whole architectural phenomenon this valuable book will prove especially useful to modern practitioners who need to make constant reference to buildings of the past Staying away from the ineffectual arguments on styles that dominate today s architectural literature this is the first recent book to attempt such a synthesis of architectural history and contemporary work As such it is unique

The American Architect ,1918 *Materialized Space: The Architecture of Paul Rudolph* Abraham Thomas,2024-09-30 Architect

Paul Rudolph 1918 1997 was known for his iconic modern houses and exemplary Brutalist buildings in exposed concrete. Rudolph's popularity peaked during the 1950s and 1960s when he served as the chair of Yale University's Department of Architecture, but his work fell from favor with the advent of postmodernism in the 1970s. This compact volume provides an introduction to and long overdue reassessment of the architect's trailblazing career from his modernist Florida houses to his public and institutional buildings, unrealized megastructures, experimental interiors, and later mixed-use developments in Asia. Abraham Thomas examines how Rudolph explored concepts such as functionalism, urbanism, and modular construction across decades and continents. Richly illustrated with photographs of the structures and Rudolph's own drawings, as well as models, furniture, and period press clippings, this book sheds light on the architect's process and takes up themes as important in his time as in our own, such as civic design, housing development, and experimental materials and methods. **Towards a New Architect** Yasmin Shariff, Jane Tankard, 2010. For many architecture students, the ultimate goal in their career is to set up in practice for themselves. This book sets out the steps to get there successfully and to make the process enjoyable and fulfilling. The authors also explain how you can find out which is the right firm for you. **Architectural Record**, 1914. The American Architect and Building News, 1883. Studios Before the System Brian R. Jacobson, 2015-09-01. By 1915, Hollywood had become the epicenter of American filmmaking, with studio dream factories structuring its vast production. Filmmakers designed Hollywood studios with a distinct artistic and industrial mission in mind, which in turn influenced the form, content, and business of the films that were made, and the impressions of the people who viewed them. The first book to retell the history of film studio architecture, Studios Before the System expands the social and cultural footprint of cinema's virtual worlds and their contribution to wider developments in global technology and urban modernism. Focusing on six significant early film corporations in the United States and France: the Edison Manufacturing Company, American Mutoscope and Biograph, American Vitagraph, Georges Méliès, Star Films, Gaumont, and Path Frères, as well as smaller producers and film companies, Studios Before the System describes how filmmakers first envisioned the space they needed and then sourced modern materials to create novel film worlds. Artificially reproducing the natural environment, film studios helped usher in the world's Second Industrial Revolution, and what Lewis Mumford would later call the specific art of the machine. From housing workshops for set prop and costume design to dressing rooms and writing departments, studio architecture was always present, though rarely visible to the average spectator in the twentieth century, providing the scaffolding under which culture, film aesthetics, and our relation to lived space took shape. Chinese Modern Design Thinking Cao Xiao'ou, 2024-10-29. This book studies the development of modern and contemporary design art in China since 1978. Starting with the design enlightenment and closely following the evolution of the visual and material forms in three levels of individual, group, and country since the reform and opening up, the book comprehensively and meticulously describes and analyzes the social particularity of the changes of Chinese design art in this period and makes corresponding evaluations on its success and

failure The author believes that Chinese modern design thinking has arisen from the problems displayed in the phenomena and events of Chinese modern design Therefore with nine chapters organized in chronological order and unfolded layer by layer by focusing on the relevant topics of design thinking the book has sorted out the academic contentions important events phenomena details of Chinese design in this period by placing design in the background of great history and has searched discovered and summarized the key problems of Chinese design in each stage and analyzed the causes and consequences and has specially studied on the gains and losses of important phenomena and theoretical problems and correspondingly made theoretical comments Therefore it is a book comprehensively presenting the overall look of the development of Chinese modern design thinking history This book has a grand structure and detailed content The author and her research objects always coexist in the same context and the writing style is fresh the argument is reasonable and the pictures and texts complement each other so the book has both academic depth and readability
