Youngil Lim, 1999 Explores the process by which the poverty stricken agrarian economy of South Korea was transformed during the 1970s to the 1990s into a semi industrial urban economy The text discusses neoclassical views of South Korean experience and speculates on South Korea s technological future **The Relations between Defence and Civil**

Technologies Philip Gummert, Judith Reppy, 2013-03-09 This book arises from a meeting held at Wiston House Sussex UK in September 1987 The meeting brought together academic governmental and industrial experts from eight countries to discuss the increasingly important sUbject of the relations between civil and defence technologies It was primarily funded under the Advanced Research Workshops Programme of NATO s Scientific Affairs Division and was the first science policy workshop funded by the Programme Additional financial support came from the Leverhulme Trust The choice of topic of speakers and finally of papers to be published was entirely ours The conclusions reached were our own and those of the participants They were not in any way guided by NATO nor do they represent NATO policy We speak for all the participants in offering our thanks to the NATO SCientific Affairs Division especially Secretary General Durand and Dr Craig Sinclair for rnei r generosity and encouragement Without them this book would not exist We thank the Leverhulme Trust for enabling assistance to be provided to the Workshop Directors in the form of Iain Bate who himself played a major part in the success of the meeting The staff of Wiston House must also be thanked for prOviding an admirable environment for the meeting For secretarial support prior to the meeting we thank Gill Miller and Lesley Price Finally we offer special thanks to Mrs Yvonne Aspinall for converting all the papers in whatever state they were presented into camera ready copy with such professionalism and gOOd humour Acquiring, Adapting and Developing Technologies Kwan S. Kim, Fumio Maki, Ryoshin

Minami, Joung-hae Seo, 1995-02-12 Economic progress requires technological development which in turn depends on a country s social capacity to acquire assimilate and develop new technologies Focusing on the evolution of Japan s economy from the Meiji Restoration to the present day this volume provides an authoritative account firmly grounded in theoretical and empirical analysis of the country s attempts to generate the necessary social capacity for technological innovation and absorption Successive chapters address the specific experiences of a number of key Japanese industries during this process Each industrial case study is written by an acknowledged expert in the field and presents material of significant interest to specialists in economic development in a form that is also accessible to the nonspecialist The book concludes with a summary of useful lessons variously applicable to countries at all the different stages of industrialization **Controlling Technology**

, **Productivity Gain Sharing Plus** Paul Carey, 2023-06-14 This book is for consultants internal and external plus senior executives interested in designing and implementing gain sharing plans that work Well designed gain sharing developed

through participative means is a glue that binds and integrates teams into a single cohesive whole This book lays out the challenges of using the framework of gain sharing and its mechanisms for unleashing the productive and creative power of a big team in an organisation the organisation can still be a small one where the big team is the sum of all parts of the organisation or even the organisation extended to its suppliers and customers It s often difficult to bring all the teams departments and units together to work as a cohesive whole How to go about tackling this challenge And how to enhance the original philosophy of gain sharing This methodology can make an accomplished addition to your kit of tools **How**

Practical Generative AI on AWS Munish Dabra,Jay Rao,KP Babu,2025-09-23 GenAI is one of the most transformative technologies of our time fundamentally changing how we build software and solve business problems Unlike traditional AI that analyzes data to make predictions or classifications and usually requires training separate models for each specific task GenAI provides powerful pre trained models that can generate entirely new content from text and code to images and audio while understanding context and responding to diverse prompts without additional training This book is your comprehensive guide to navigating AWS s complete GenAI ecosystem and building intelligent applications that deliver real business value It covers the spectrum of AWS GenAI services like Amazon Bedrock for managed foundation models Amazon SageMaker JumpStart for flexible ML development and Amazon Q for business and developer productivity You will learn essential techniques from prompt engineering and systematic model evaluation to advanced implementations like RAG with Knowledge Bases that enhance responses with proprietary data The book then advances to autonomous agents that can reason plan and execute complex workflows using both Amazon Bedrock s managed agents and open source agentic AI frameworks By the end of this book you will have the knowledge architectural patterns and strategies needed to build GenAI solutions on AWS whether you are just getting started with GenAI or building enterprise scale multi agent systems

WHAT YOU WILL LEARN Implement real world applications using Amazon Bedrock Amazon SageMaker JumpStart and Amazon Q Implement advanced techniques like RAG fine tuning and agentic AI Master prompt engineering techniques and

best practices Develop secure and compliant GenAI solutions Learn AWS best practices and responsible AI principles Create end to end solutions integrating popular agentic AI frameworks Build practical applications that solve real industry challenges WHO THIS BOOK IS FOR This book is designed for software developers AI ML engineers and solutions architects who want to build practical GenAI applications on AWS It is ideal for developers with basic Python programming experience a cloud engineer familiar with AWS services or a technical professional transitioning into AI ML roles TABLE OF CONTENTS 1 Introduction to Generative AI and Foundation Models 2 Getting Started with Amazon Bedrock 3 Experimenting Foundation Models in Amazon Bedrock 4 Building Generative AI Applications with Amazon Bedrock APIs 5 Using Amazon Bedrock Knowledge Bases 6 Using Bedrock s Managed Agents 7 Using Open source Frameworks with Amazon Bedrock 8 Building Custom Models with Amazon Bedrock 9 Monitoring and Observability 10 Security and Responsible AI 11 RAG and Model Evaluation 12 Building Generative AI Assistant using Amazon Q 13 Getting Started with Generative AI on Amazon SageMaker JumpStart 14 Best Practices for Developing Generative AI Applications 15 Real world GenAI

The Science Of Habits: Transform Your Life And Business With Small Changes Moises Riddle,2025-04-17 In a world where change often feels daunting The Science Of Habits Transform Your Life And Business With Small Changes offers a refreshing perspective on how minor adjustments can lead to significant transformations This book unravels the complexities of habit formation making it accessible to anyone eager to improve their personal and professional life By delving into the science behind habits readers gain valuable insights into why we do what we do and how we can harness this knowledge to create lasting positive change The book begins by exploring the fundamental principles of habits illustrating how they shape our daily routines and long term outcomes Through engaging stories and scientific research readers discover the power of small incremental changes and the ripple effects they can have Each chapter builds on the last providing practical tips and strategies for identifying and modifying habits The narrative is both inspiring and informative offering a blend of theory and practical application that keeps readers engaged and motivated Throughout the book key concepts such as the habit loop keystone habits and the role of environment in habit formation are thoroughly examined *Daily Report, Foreign Radio Broadcasts* United States. Central Intelligence Agency,1963 *Dream of a Red Factory* Deborah A. Kaple,1994-01-06 Drawing on previously unknown primary sources in both Chinese and Russian Deborah A Kaple has written a powerful and absorbing account of the model of factory management and organization that the Chinese communists formulated in the 1949 1953 period She reveals that their new management techniques were adapted from Soviet propaganda during the harsh period of Stalin s post war reconstruction The idealized Stalinist management system consisted mainly of strict Communist Party control of all aspects of workers lives which is the root of such strong Party control over Chinese society today Dream of a Red Factory is a rare and revealing look at the consolidation rule in China told through the prism of the development of new socialist factories and enterprises Kaple completely counters the old myth of the Soviet monolith in

China and carefully reconstructs how the Chinese communists came to rely on an idealized propagandistic version of the Soviet model instead American Farming Culture and the History of Technology Joshua T. Brinkman, 2024-05-06

Presenting a history of agriculture in the American Corn Belt this book argues that modernization occurred not only for economic reasons but also because of how farmers use technology as a part of their identity and culture Histories of agriculture often fail to give agency to farmers in bringing about change and ignore how people embed technology with social meaning This book however shows how farmers use technology to express their identities in unspoken ways and provides a framework for bridging the current rural urban divide by presenting a fresh perspective on rural cultural practices Focusing on German and Jeffersonian farmers in the 18th century and Corn Belt producers in the 1920s the Cold War and the recent period of globalization this book traces how farmers formed their own versions of rural modernity Rural people use technology to contest urban modernity and debunk yokel stereotypes and women specifically employed technology to resist urban gender conceptions This book shows how this performance of rural identity through technological use impacts a variety of current policy issues and business interests surrounding contemporary agriculture from the controversy over genetically modified organisms and hog confinement facilities to the growth of wind energy and precision technologies Inspired by the author's own experience on his family's farm this book provides a novel and important approach to understanding how farmers culture has changed over time and why machinery is such a potent part of their identity This book will be of great interest to students and scholars of agricultural history technology and policy rural studies the history of science and technology and the history of farming culture in the USA Intention Mike James Ross, Sekoul Theodor Krastev, Dan Pilat, 2024-02-21

A science backed recipe for creating engagement fulfillment and achievement We're stuck Stuck to the couch Stuck scrolling Stuck at work Stuck in worn out paths of habitual action Stuck in patterns and echo chambers of thought Stuck in carefully curated lives where we've traded our agency for endless comforts that wrap us in existential ennui As our eyes fixate on a constant parade of images meant to engage us we notice something in the periphery We see folks who are just like us except they are actually deeply happy and fulfilled They seem to go through life with ease and grace overcoming obstacles and making amazing things happen for themselves Peering closer we see that these aren't gods or superhumans They're just people who have chosen to not be stuck and decided to become the main characters in their own lives Their success as they define it is not a birthright bestowed upon a lucky few but the result of lives lived with intention And that's what this book is about a practical guide on infusing purpose into life in a deliberate and evidence based way Through a combination of inspiring stories about unlikely high performers and evidence from the bleeding edge of behavioral science we present you with a toolkit for learning intention not as a fluffy concept but as five very trainable skills Get your copy of *Intention* today and live your potential Polymer Science: A Comprehensive Reference, 2012-12-05 The progress in polymer science is revealed in the chapters of *Polymer Science A Comprehensive Reference Ten Volume Set* In

Volume 1 this is reflected in the improved understanding of the properties of polymers in solution in bulk and in confined situations such as in thin films Volume 2 addresses new characterization techniques such as high resolution optical microscopy scanning probe microscopy and other procedures for surface and interface characterization Volume 3 presents the great progress achieved in precise synthetic polymerization techniques for vinyl monomers to control macromolecular architecture the development of metallocene and post metallocene catalysis for olefin polymerization new ionic polymerization procedures and atom transfer radical polymerization nitroxide mediated polymerization and reversible addition fragmentation chain transfer systems as the most often used controlled living radical polymerization methods Volume 4 is devoted to kinetics mechanisms and applications of ring opening polymerization of heterocyclic monomers and cycloolefins ROMP as well as to various less common polymerization techniques Polycondensation and non chain polymerizations including dendrimer synthesis and various click procedures are covered in Volume 5 Volume 6 focuses on several aspects of controlled macromolecular architectures and soft nano objects including hybrids and bioconjugates Many of the achievements would have not been possible without new characterization techniques like AFM that allowed direct imaging of single molecules and nano objects with a precision available only recently An entirely new aspect in polymer science is based on the combination of bottom up methods such as polymer synthesis and molecularly programmed self assembly with top down structuring such as lithography and surface templating as presented in Volume 7 It encompasses polymer and nanoparticle assembly in bulk and under confined conditions or influenced by an external field including thin films inorganic organic hybrids or nanofibers Volume 8 expands these concepts focusing on applications in advanced technologies e g in electronic industry and centers on combination with top down approach and functional properties like conductivity Another type of functionality that is of rapidly increasing importance in polymer science is introduced in volume 9 It deals with various aspects of polymers in biology and medicine including the response of living cells and tissue to the contact with biofunctional particles and surfaces The last volume is devoted to the scope and potential provided by environmentally benign and green polymers as well as energy related polymers They discuss new technologies needed for a sustainable economy in our world of limited resources Provides broad and in depth coverage of all aspects of polymer science from synthesis polymerization properties and characterization methods and techniques to nanostructures sustainability and energy and biomedical uses of polymers Provides a definitive source for those entering or researching in this area by integrating the multidisciplinary aspects of the science into one unique up to date reference work Electronic version has complete cross referencing and multi media components Volume editors are world experts in their field including a Nobel Prize winner
