W. Abel, Stone, 1990 Organometallic chemistry is an interdisciplinary science which continues to grow at a rapid pace Although there is continued interest in synthetic and structural studies the last decade has seen a growing interest in the potential of organometallic chemistry to provide answers to problems in catalysis synthetic organic chemistry and also in the development of new materials This Specialist Periodical Report aims to reflect these current interests reviewing progress in theoretical organometallic chemistry main group chemistry the lanthanides and all aspects of transition metal chemistry Specialist Periodical Reports provide systematic and detailed review coverage of progress in the major areas of chemical research Written by experts in their specialist fields the series creates a unique service for the active research chemist supplying regular critical in depth accounts of progress in particular areas of chemistry For over 80 years the Royal Society of Chemistry and its predecessor the Chemical Society have been publishing reports charting developments in chemistry which originally took the form of Annual Reports However by 1967 the whole spectrum of chemistry could no longer be contained within one volume and the series Specialist Periodical Reports was born The Annual Reports themselves still existed but were divided into two and subsequently three volumes covering Inorganic

Organic and Physical Chemistry For more general coverage of the highlights in chemistry they remain a must Since that time the SPR series has altered according to the fluctuating degree of activity in various fields of chemistry Some titles have remained unchanged while others have altered their emphasis along with their titles some have been combined under a new name whereas others have had to be discontinued The current list of Specialist Periodical Reports can be seen on the inside flap of this volume Nuclear Science Abstracts ,1974 **Spectroscopic Properties of Inorganic and Organometallic Compounds; Volume 28** Davidson G.,1995 **Organometallic Chemistry Volume 6** Edward W. Abel,1972 Annual Reports on NMR Spectroscopy ,1999-06-10 Over recent years no other technique has grown to such importance as that of NMR spectroscopy It is used in all branches of science where precise structural determination is required and where the nature of interactions and reactions in solution is being studied Annual Reports on NMR Spectroscopy has established itself as a means for the specialist and non specialist alike to become familiar with new applications of the technique in all branches of chemistry including biochemistry and pharmaceuticals Once again the Annual Reports on NMR Spectroscopy represents the best work in the field both in applied and theoretical NMR spectroscopy The high calibre reports in Volume 38 show the wide biological and physical applications that benefit from this analytical technique Nuclear Magnetic Resonance G A Webb,2007-10-31 As a spectroscopic method Nuclear Magnetic Resonance NMR has seen spectacular growth over the past two decades both as a technique and in its applications Today the applications of NMR span a wide range of scientific disciplines from physics to biology to medicine Each volume of Nuclear Magnetic Resonance comprises a combination of annual and biennial reports which together provide comprehensive of the literature on this topic This Specialist Periodical Report reflects the growing volume of published work involving NMR techniques and applications in particular NMR of natural macromolecules which is covered in two reports NMR of Proteins and Acids and NMR of Carbohydrates Lipids and Membranes For those wanting to become rapidly acquainted with specific areas of NMR this title provides unrivalled scope of coverage Seasoned practitioners of NMR will find this an invaluable source of current methods and applications Specialist Periodical Reports provide systematic and detailed review coverage in major areas of chemical research Compiled by teams of leading authorities in the relevant subject areas the series creates a unique service for the active research chemist with regular in depth accounts of progress in particular fields of chemistry Subject coverage within different volumes of a given title is similar and publication is on an annual or biennial basis **Chemistry of Carbon Nanostructures** Klaus Muellen,Xinliang Feng,2017-06-12 Chemistry of Carbon Nanostructures aims to present the current state of the art synthesis and application of carbon materials like nano diamonds ribbons and graphene like structures in science and engineering Edited by Professor Klaus M llen who received the Adolf von Bayer Medal for his contribution to Carbon Chemistry and Xinliang Feng this book combines outstanding contributions by a renowned international team of experts The authors discuss chemical aspects of carbon nanostructures their synthesis functionalization and design
