Sciences, 1914 **Ready to Trample on All Human Law** Paul A. Jarvie, 2014-02-04 This book explores the relationship between Dickens's novels and the financial system. Elements of Dickens's work form a critique of financial capitalism. This critique is rooted in the difference between use value and exchange value and in the difference between productive circulations and mere accumulation. In a money-based society, exchange value and accumulation dominate to the point where they infect even the most important and sacred relationships between parts of society and individuals. This study explores Dickens's critique from two very different points of view. The first is philosophical, from Aristotle's distinction between chrematistic accumulation and economic use on money through Marx's focus on the teleology of capitalism as death. The second view is that of nineteenth-century financial journalism of City writers like David Morier Evans and M. L. Meason, who while functioning as cheerleaders for financial capitalism also reflected some of the very real dis-ease associated with capital formation and accumulation. The core concepts of this critique are constant in the novels but the critique broadens and becomes more pessimistic over time. The ill effects of living in a money-based society are presented more as the consequences of individual evil in earlier novels while in the later books they are depicted as systemic and pervasive. Texts discussed include *Nicholas Nickleby*, *A Christmas Carol*, *Little Dorrit*, and *Our Mutual Friend*. **The Bankers' Magazine, and Journal of the Money Market**, 1848 **Economic Crises** Edward David Jones, 1900 *The Social Sciences* Chicago Public Library, 1914 **After Universal Design** Elizabeth Guffey, 2023-06-15 How might we develop products made with and by disabled users rather than for them? Could we change living and working spaces to make them accessible rather than designing products that fix disabilities? How can we grow our capabilities to make designs more bespoke to each individual? *After Universal Design* brings together scholars, practitioners, and disabled users and makers to consider these questions and to argue for the necessity of a new user-centered design. As many YouTube videos demonstrate, disabled designers are not only fulfilling the grand promises of DIY design but are also questioning what constitutes meaningful design itself. By forcing a rethink of the top-down professionalized practice of Universal Design, which has dominated thinking and practice around design for disability for decades, this book models what inclusive design and social justice can look like as activism, academic research, and everyday life practices today. With chapters, case studies, and interviews exploring questions of design and personal agency, hardware and spaces, the experiences of prosthetics users, conventional hearing aid devices designed to suit personal style, and ways of facilitating pain, self-reporting, these essays expand our understanding of what counts as design by offering alternative narratives about creativity and making. Using critical perspectives on disability, race, and gender, this book allows us to understand how design often works in the real world and challenges us to rethink ideas of inclusion in design.
