Speech Communication Matters Second Edition Chapter 16:

Fundamentals of AAC Nerissa Hall, Jenifer Juengling-Sudkamp, Michelle L. Gutmann, Ellen R. Cohn, 2025-10-15 The second edition of *Fundamentals of AAC: A Case Based Approach to Enhancing Communication* continues to be a course friendly textbook designed to walk readers through the theoretical and clinical underpinnings of assessment, intervention, and consultation for individuals with complex communication needs across the lifespan. Augmentative and alternative communication (AAC) encompasses a variety of communication methods and is used by those with a wide range of speech and language impairments. With a consistent framework and descriptive case studies as well as input from various stakeholders, readers can gain a comprehensive understanding of the needs of persons who use AAC and how to provide them with ethically and culturally considerate support. Unlike other texts on this topic, this book empowers readers to visualize AAC in action. Each chapter begins with fundamental concepts and principles followed by a relevant case study that presents the concepts and principles in action that guide the reader through the use of clinical decision making in AAC. Every case study is designed to underscore the cultural, linguistic, and social variability inherent to the fields of AAC and communication sciences and how each individual influences the manifestation of the AAC system. Treatment and implementation plans intended to easily translate into a 6, 8, or 13 week semester course. This textbook is divided into eight distinct sections. Section I provides an overview of AAC: no tech, mid tech, and high tech AAC systems as well as mobile technology and advancing technology. Section II discusses language fundamentals. Section III reviews AAC assessment, intervention, and implementation for toddlers, preschoolers, and school-aged individuals along with goal writing and data collection. Section IV covers assessment, intervention, and implementation for young adults and adults needing AAC. Section V offers the reader detailed information and rich examples of the application of AAC for persons with developmental disabilities. Section VI provides the theoretical foundation and exemplar case studies of AAC for persons with acquired disabilities. Section VII details consultation and training for various stakeholders as well as tele AAC services. Section VIII presents a collection of essays from various stakeholders. New to the Second Edition: A chapter dedicated to AAC and literacy; updated information about neuro-affirming practice; technology advancements like artificial intelligence and automation; and implementation of AAC outside of intervention. New photos and videos; updated intervention resources; report writing tools; enhanced instructor resources; key features; overviews with key terms; set the stage for each section; 36 case studies with questions and visuals to clearly depict each case; boxes with practical tips and expert advice. **Teachers Edition** Randall McCutcheon, 2001-02 Describes how to research, organize, write, and deliver different kinds of speeches and discusses related forms of communication such as debates and oral interpretation. *Encyclopedia of Policy Studies, Second Edition* Stuart Nagel, 2020-08-18 This entirely updated and enlarged Second Edition of a landmark reference text continues to provide comprehensive coverage of every important aspect of policy studies, discussing concepts, methods, utilization, formation, and implementation both internationally.
