Speeding The Net:

Speeding the Net Joshua Quittner, Michelle Slatalla, 1998 Combining the hacker savvy of Tracey Kidder's *Soul of a New Machine* with the riveting drama of the first great corporate conflict waged on the turf of cyberspace *Speeding the Net* is the story of how a crew of talented computer jocks at the University of Illinois turned the computer world upside down by creating the essential tool for navigating the World Wide Web the web browser They created it for fun but after Silicon Valley visionary and entrepreneur Jim Clark showed up in the middle of a snowstorm and hired them on the spot they were soon part of one of the most dramatic initial public offerings IPOs in the history of Wall Street had built their company into a dollar 2.2 billion business and were forcing Bill Gates's Microsoft to reevaluate its entire business strategy *Speeding the Net* gives an inside account of the ensuing cat and mouse game between Netscape which held an early lead in the so called browser wars and Microsoft which has always been notorious for zeroing in on its opposition and crushing it Win lose or draw however Netscape's corporate culture of speed developing new programs and bringing them to market in under six months then giving them away for free has already transformed the way Silicon Valley does business and the way the world communicates *The Mid-net Zipper Ridge a Possible Cause of Unobserved Porpoise Mortality* D. B. Holts, 1980

Special Scientific Report, 1970 *Generative AI for a Net-Zero Economy* Subhra R. Mondal, Lukas Vartiak, Subhankar Das, 2025-08-11 This book covers the technological aspects of Generative AI its applications in achieving a net zero carbon economy the challenges of climate change and the economic and management implications of these transitions The book explores the transformative potential of Generative AI in driving the transition to a net zero economy It examines how this cutting edge technology is revolutionizing climate change mitigation strategies and reshaping business models in the digital age The book offers a comprehensive guide to leveraging AI for sustainable innovation through case studies expert insights and forward thinking analysis It addresses the challenges and opportunities in integrating AI into climate action plans economic policies and corporate strategies Essential reading for policymakers business leaders and technologists this book provides a roadmap for harnessing Generative AI to create a sustainable prosperous future encompassing several key elements that align with the United Nations Sustainable Development Goals in particular SDG 13 Climate Action *FCC Record* United States. High-Speed Networks Jorge Crichigno, Elie Kfoury, Elias Bou-Harb, Nasir Ghani, 2022-04-18 This book provides practical knowledge and skills on high speed networks emphasizing on Science Demilitarized Zones Science DMZs The Science DMZ is a high speed network designed to facilitate the transfer of big science data which is presented in this book These networks are increasingly important as large data sets are now often transferred across sites This book starts by describing the limitations of general purpose networks which are designed for transferring basic data but face numerous challenges when transferring terabyte and petabyte scale data This book follows a bottom up approach by presenting an overview of Science DMZs and how they overcome the limitations of

general purpose networks It also covers topics that have considerable impact on the performance of large data transfers at all layers link layer layer 2 and network layer layer 3 topics such as maximum transmission unit MTU switch architectures and router s buffer size transport layer layer 4 topics including TCP features congestion control algorithms for high throughput high latency networks flow control and pacing applications layer 5 used for large data transfers and for maintenance and operation of Science DMZs and security considerations Most chapters incorporate virtual laboratory experiments which are conducted using network appliances running real protocol stacks Students in computer science information technology and similar programs who are interested in learning fundamental concepts related to high speed networks and corresponding implementations will find this book useful as a textbook This book assumes minimal familiarity with networking typically covered in an introductory networking course It is appropriate for an upper level undergraduate course and for a first year graduate course Industry professionals working in this field will also want to purchase this book

High-Speed Networking James P. G. Sterbenz, Joseph D. Touch, 2002-02-28 Leading authorities deliver the commandments for designing high speed networks There are no end of books touting the virtues of one or another high speed networking technology but until now there were none offering networking professionals a framework for choosing and integrating the best ones for their organization s networking needs Written by two world renowned experts in the field of high speed network design this book outlines a total strategy for designing high bandwidth low latency systems Using real world implementation examples to illustrate their points the authors cover all aspects of network design including network components network architectures topologies protocols application interactions and more **Protocols for High Speed Networks IV** G. Neufeld, M. Ito, 2013-11-11 Welcome to the fourth IFIP workshop on protocols for high speed networks in Vancouver This workshop follows three very successful workshops held in Ziirich 1989 Palo Alto 1990 and Stockholm 1993 respectively We received a large number of papers in response to our call for contributions This year forty papers were received of which sixteen were presented as full papers and four were presented as poster papers Although we received many excellent papers the program committee decided to keep the number of full presentations low in order to accommodate more discussion in keeping with the format of a workshop Many people have contributed to the success of this workshop including the members of the program committee who with the additional reviewers helped make the selection of the papers We are thankful to all the authors of the papers that were submitted We also thank several organizations which have contributed financially to this workshop specially NSERC ASI CICS R UBC MPR Teltech and Newbridge Networks

Dynamics of Coupled Systems in High-Speed Railways Weihua Zhang, 2019-11-25 Dynamics of Coupled Systems in High Speed Railways Theory and Practice presents the relationship between various coupled systems that can affect train operation including interaction between track and train the pantograph catenary system and train power supply system and train and airflow and train with respect to the structure and characteristics of high speed railway The overall simulation

optimization and control are achieved based on an analysis of the dynamics generated by coupled systems in high speed trains with a theoretical framework for the dynamics presented in the book Presents the first book available on the dynamics of coupled systems in high speed trains Provides a systematic view of high speed vehicle dynamics covering the issues that are especially concerned for high speed operations such as high speed pantograph and catenary aerodynamic characteristics and running stability of high speed trains Covers the optimization of dynamic performance the design of parameters the simulation of high speed train service processes and the identification of high speed train state and condition assessment

Architecture and Protocols for High-Speed Networks Otto Spaniol, André Danthine, Wolfgang Effelsberg, 2013-06-29
Multimedia data streams will form a major part of the new generation of applications in high speed networks Continuous media streams however require transmission with guaranteed performance In addition many multimedia applications will require peer to multipeer communication Guaranteed performance can only be provided with resource reservation in the network and efficient multipeer communication must be based on multicast support in the lower layers of the network Architecture and Protocols for High Speed Networks focuses on techniques for building the networks that will meet the needs of these multimedia applications In particular two areas of current research interest in such communication systems are covered in depth These are the protocol related aspects such as switched networks ATM MAC layer network and transport layer and the services and applications Architecture and Protocols for High Speed Networks contains contributions from leading world experts giving the most up to date research available It is an essential reference for all professionals engineers and researchers working in the area of high speed networks
