explaining why a thing changes in the ways that it does rather than in other ways powers should explain why an acorn turns into an oak tree not a sunflower or why fire burns wood and wood can catch fire This volume examines the twists and turns of the fascinating history of a difficult philosophical concept focusing on the metaphysical sense of powers that is the powers that are invoked in the explanation of natural changes and activities Scholars probe the views of thinkers from antiquity to the present day Anaxagoras Plato the Stoics Abelard Anselm Henry of Ghent Gottfried Wilhelm Leibniz Margaret Cavendish Mary Shepherd Immanuel Kant Georg Wilhelm Friedrich Hegel and numerous others In addition the volume contains four short reflection essays that examine the concept of powers from the perspective of disciplines other than philosophy namely history of music West African religions history of chemistry and history of art The history of philosophy brims with controversies surrounding the concept of power and these controversies have not diminished particularly as potentialities or powers see a revival in contemporary analytic metaphysics Hence telling the history of philosophical theories of powers means exploring the trajectory of a concept whose importance to the past and present of philosophy can hardly be overstated
