fan to being an insider to now being an influencer of the entire program and began having daily meetings at Pastner's new office. Then the NCAA changed everything as it seemed convinced that Ryan coerced athletes from his tournaments to commit to Memphis. Over the course of three separate investigations all of which he was cleared in, NCAA coaches stopped talking to Ryan and his relationship with Pastner and his staff became more than strained. At the same time Ryan began to see the effects that his involvement in this recruiting world were having on everyone around him, especially his now 11-year-old son Carter who was intertwined in the world of basketball right in front of Ryan. Ryan began to realize that he wasn't going to change the way that recruiting works for college basketball programs. He had to find a way out. He needed to wake up from this Blue Dream.

Summary of Dave Asprey's Super Human Everest Media, 2022-08-19T22:59:00Z Please note: This is a companion version, not the original book. Sample Book Insights 1. I was a normal kid with few health problems until I moved to New Mexico at the age of five. I began acquiring health problems typically seen in people much older than I was. I was well on my way to prematurely developing all four of the diseases most likely to kill you as you age: heart disease, diabetes, Alzheimer's, and cancer. 2. The Four Killers are heart disease, Alzheimer's, diabetes, and cancer. They are the second largest preventable cause of death in the United States. I was beginning to experience the symptoms of these four killers, and I needed to find a way to stop them. 3. I found out that I was highly allergic to the eight most common types of toxic mold, which explained my rapid aging. I was also beginning to show symptoms of premature aging. 4. The very powerhouses of your cells are constantly engaged in a battle with their mortal enemy, and this fight leaves behind many casualties. When cells are under chronic stress, their mitochondria cannot make energy efficiently, leading to an increase in free radicals.
